

Market Operator User Group

Dublin, 10 October 2018

Agenda

The Agenda for the session is as follows:

Item	Presenter
Welcome	Liam Ryan
Ex-Ante Market	Liam McAllister
Balancing Market	Diarmaid Gillespie, Simon Tweed
Settlement	Sean O'Rourke, John O'Dea, Nigel Thomson
Imbalance Pricing	Aodhagan Downey, Brendan O'Sullivan
Query Management	Claire Breslin

Welcome

- Go – Live 1st of October
- Market Operator user Group
 - EirGrid business owners
 - Performance of the processes
 - Analysis of the outcomes
 - Issues encountered
 - Resolution
 - Path to resolution
- 10 day in summary
 - Some issues encountered but resolved very quickly (Negative reserve, QBOA)
 - ExAnte markets performing very well
 - Balancing market have worked through some issues
 - Settlement working on overall performance

Agenda

The Agenda for the session is as follows:

Item	Presenter
Welcome	Liam Ryan
Ex-Ante Market	Liam McAllister
Balancing Market	Diarmaid Gillespie, Simon Tweed
Settlement	Sean O'Rourke, John O'Dea, Nigel Thomson
Imbalance Pricing	Aodhagan Downey, Brendan O'Sullivan
Query Management	Claire Breslin

Ex-Ante Markets

- Volumes from ex-ante auctions (01/10 – 08/10)
 - Highest volumes still clearing in DAM

	*Using Average Prices	% of DAM
DAM	€57,783,081	
IDA1	€3,896,304	6.74%
IDA2	€1,554,463	2.69%
IDA3	€278,967	0.48%
IDC	€1,897,603	3.28%
TOTAL	€65,410,419	

Ex-Ante Market Analysis

- DAM – average clearing price and volumes (01/10 – 08/10)
 - Prices in DAM continue to follow the profile of the load cleared
 - Suppliers clearing **97.8%** of their volume with average DAM price of **€74.10**

Ex-Ante Market Analysis

- IDA1 - Average volumes lower than MT, in the 140 MW range

Ex-Ante Market Analysis

- IDA2 - Average volumes in the 117 MW range

Ex-Ante Market Analysis

- IDA3 - Average volumes in the 38 MW range

Intraday Continuous Trading

- Volumes and values traded are slowing building
 - Highest no. of trades recorded on 7th, and values on the 2nd and 8th

Trade date	Total Trades	Traded Volumes MWh	Trade Value €	Average Price €
01/10/2018	594	2632.8	€ 173,377.97	€ 65.85
02/10/2018	760	4857.4	€ 402,656.43	€ 82.90
03/10/2018	242	439.8	€ 33,313.05	€ 75.75
04/10/2018	680	4231.6	€ 278,516.59	€ 65.82
05/10/2018	434	1310	€ 95,806.13	€ 73.13
06/10/2018	422	2297.4	€ 182,190.80	€ 79.30
07/10/2018	1932	8138.8	€ 329,366.62	€ 40.47
08/10/2018	904	6967.6	€ 402,376.09	€ 57.75
Grand Total	5968	30875.4	€ 1,897,603.68	€ 67.62

Ex-Ante Market Analysis

Prices following a similar range during the first 8 days of the market

Ex-Ante Market Analysis

- Lowest (and highest) prices being observed in the Intraday Auctions
- Low price of €0 set in IDA 2 on the 7th October (see below).
- High €145 price set in IDA 2 on the 4th October.

Ex-Ante Market Analysis

➤ Traded volumes (aggregate across markets)

Agenda

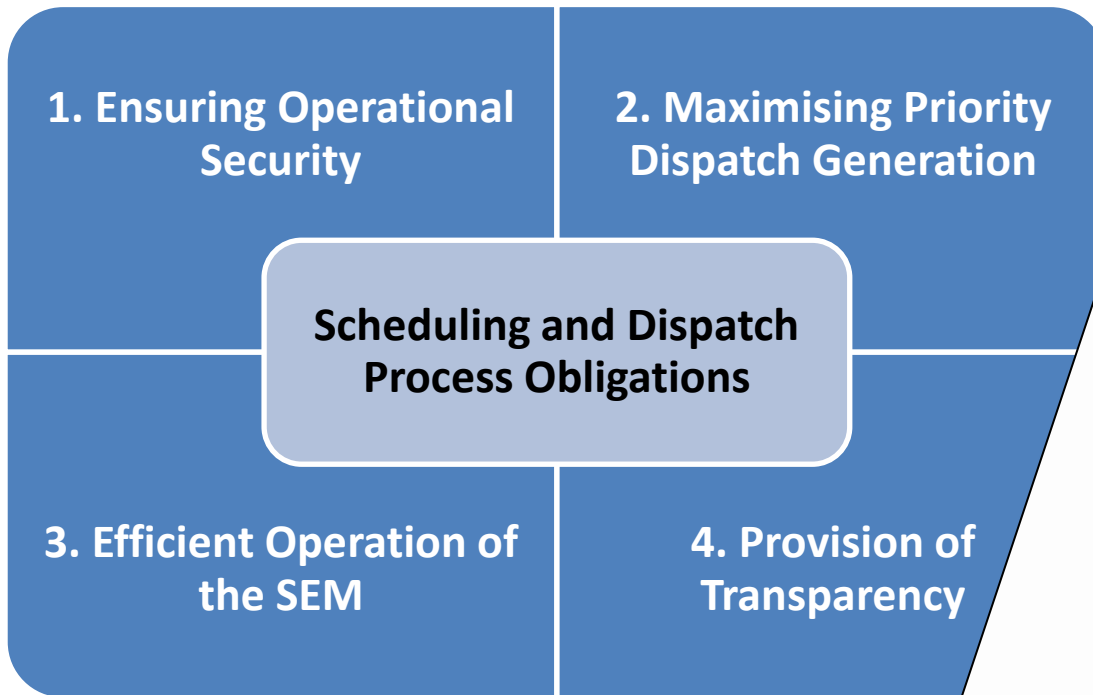

The Agenda for the session is as follows:

Item	Presenter
Welcome	Liam Ryan
Ex-Ante Market	Liam McAllister
Balancing Market	Diarmaid Gillespie, Simon Tweed
Settlement	Sean O'Rourke, John O'Dea, Nigel Thomson
Imbalance Pricing	Aodhagan Downey, Brendan O'Sullivan
Query Management	Claire Breslin

Balancing Market Operations Go-Live in CHCC and NCC

Balancing Market Principles - Scheduling & Dispatch

Inputs to the 'Indicative Operations Schedules'

Policy Objectives

- Priority Dispatch
- Cost Objective

Participants / System Service Providers

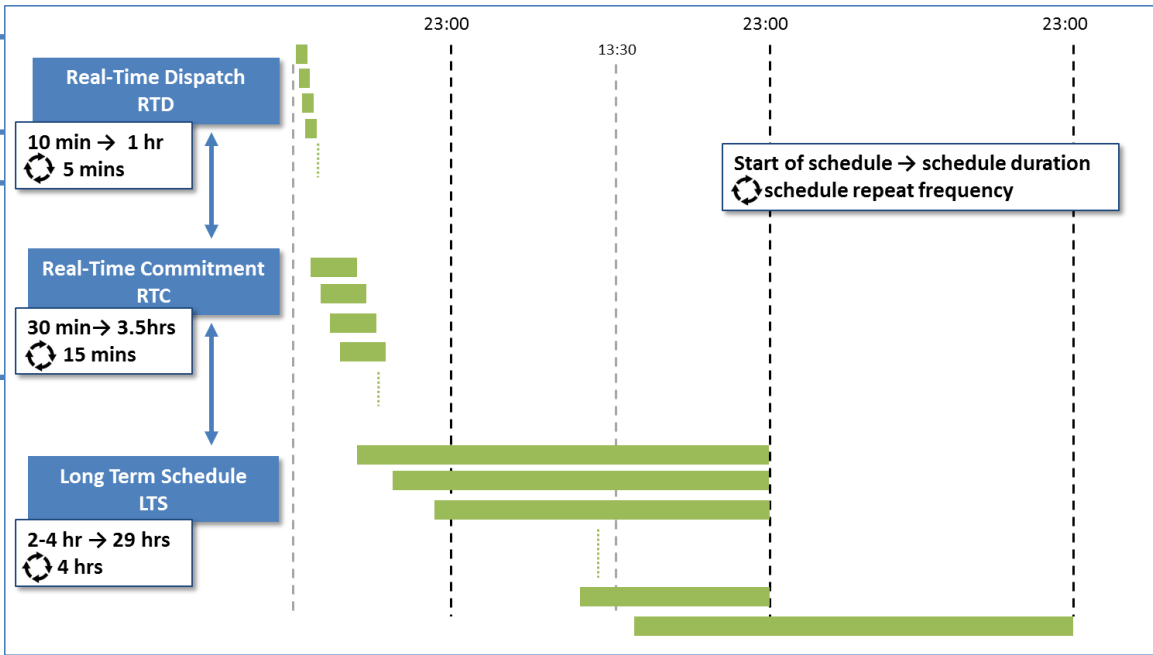

- TOD
- COD
- PNs
- System Services

Ex Ante Markets

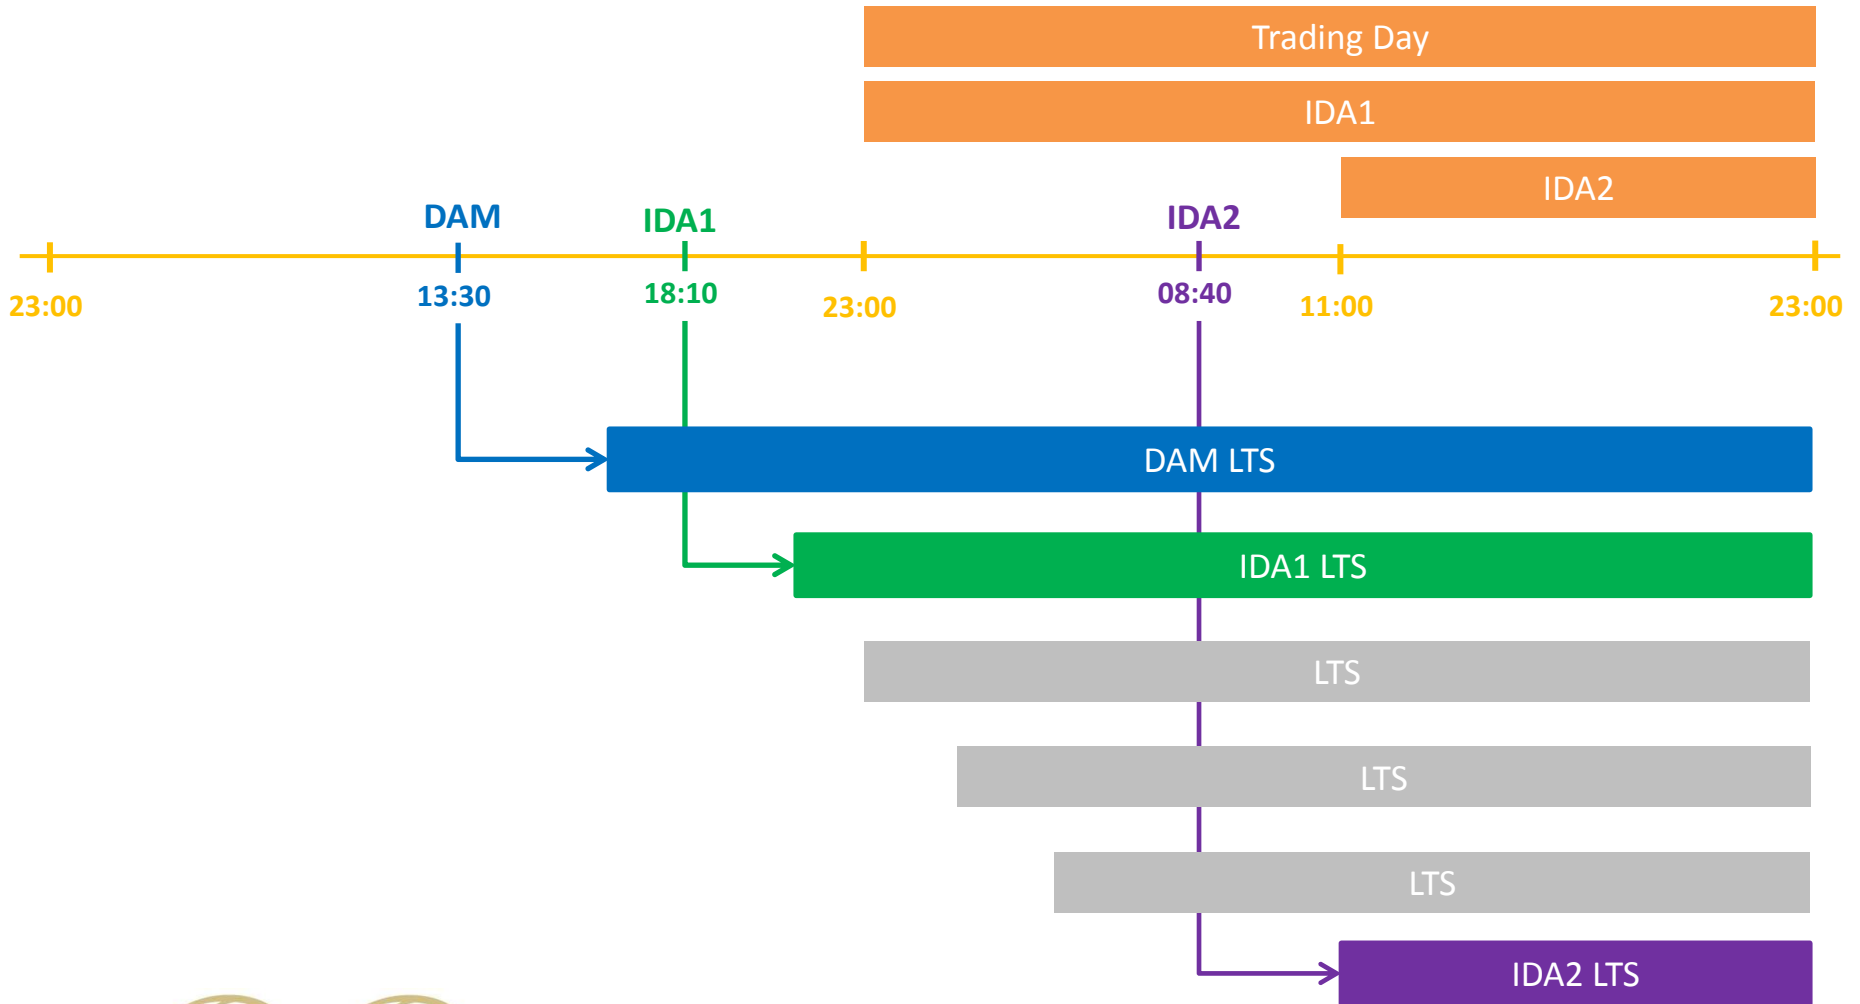

- Interconnector Schedules

System Operators

- Demand and Renewables Forecasts
- System Constraints
- System Service Requirements
- Real-Time System Conditions

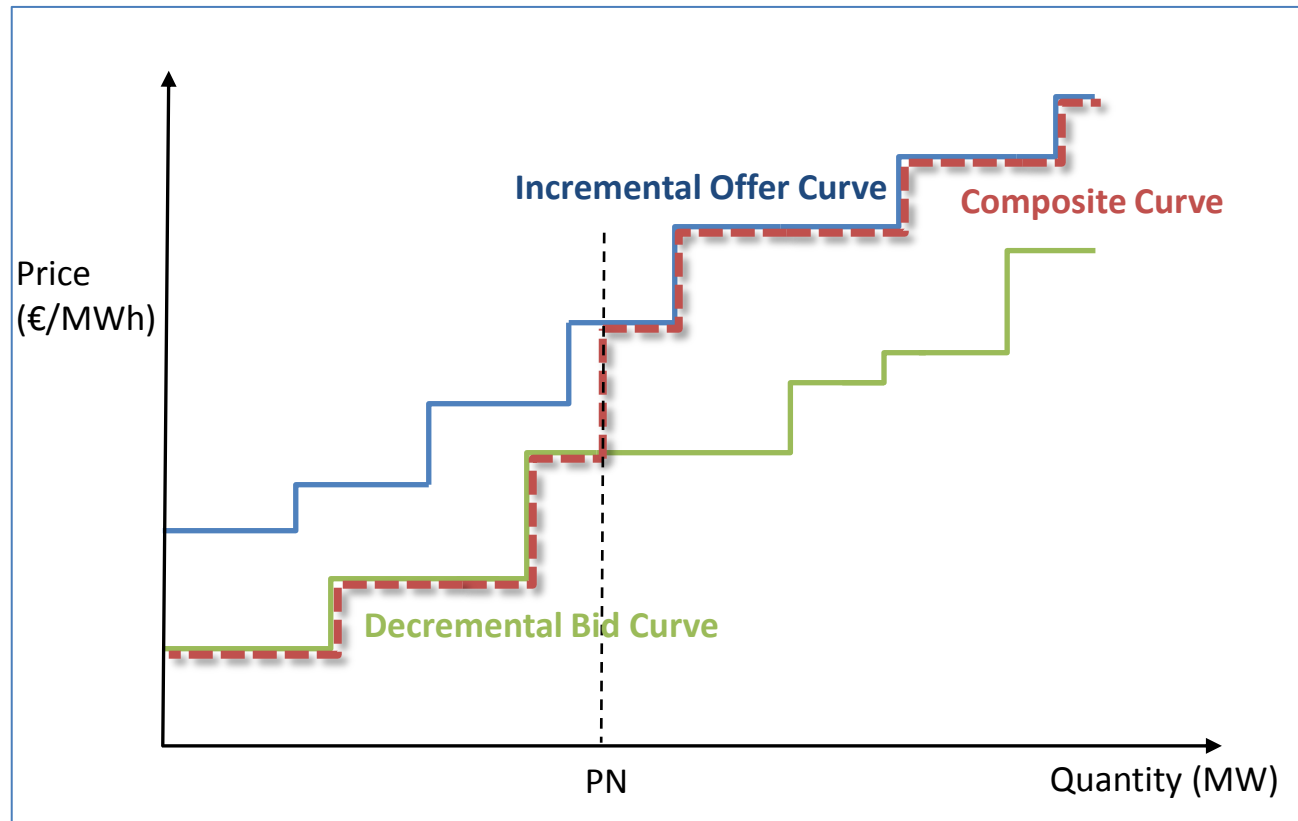

Long Term Schedule - LTS

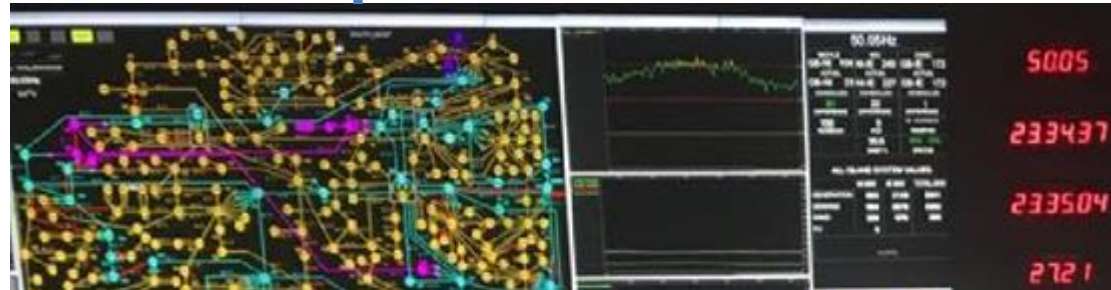

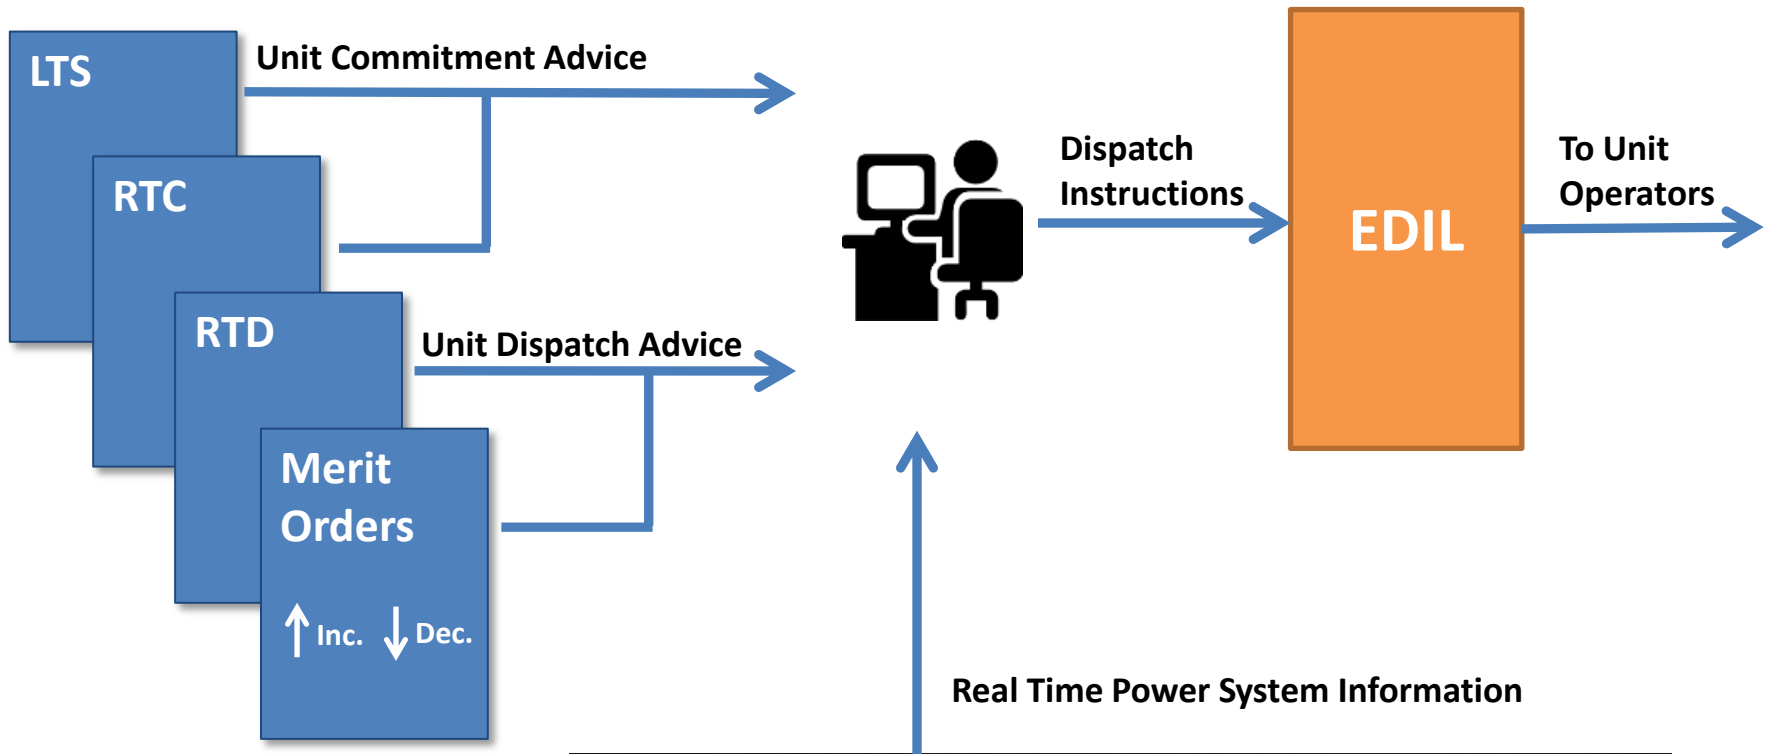

Cost Objective

'minimise the cost of diverging from physical notifications'

Dispatch

System Operator Trading over the Interconnectors

- Our focus is currently on core systems and processes.
- We will 'SO Trade' if required to maintain system security.
- 'SO Trade' for Priority Dispatch operational in November 2018.
 - Subject to market outcomes.
 - National Grid must approve any 'SO Trade' – but they can reject.
- 'SO Trade' trials ongoing.

Units Under Test

- All unit testing must be agreed with the respective TSO.
- PNs are submitted with a test flag.

Operational Constraints – New Weekly Update

Agenda

The Agenda for the session is as follows:

Item	Presenter
Welcome	Liam Ryan
Ex-Ante Market	Liam McAllister
Balancing Market	Diarmaid Gillespie, Simon Tweed
Settlement	Sean O'Rourke, John O'Dea, Nigel Thomson
Imbalance Pricing	Aodhagan Downey, Brendan O'Sullivan
Query Management	Claire Breslin

Settlement

- **Settlements Schedule Update – Sean O'Rourke**
- Cash Flow Analysis – John O'Dea
- Credit Update – Nigel Thomson

Settlements & Credit runs : Completed to date

Trade Dates	Type	Run Type	No of runs
30 th Sep – 9 th Oct	Settlements	Indicative	9
30 th Sep – 10 th Oct	Settlements	Initial	4
30 th Sep – 10 th Oct	Credit Reports	Daily	9

- As per Nigel Thomson update on credit reports: One credit report per day up to Oct 15th , two daily from Oct 16th and three daily reports from Oct 22nd
- Settlements team : high focus on meeting evening timelines

Settlements & Credit runs : Upcoming events

Trade Dates	Type	Run Type	Date
30 th Sep – 6 th Oct	Settlements Documents (includes last hour CRM)	Weekly	12/10/2018
30 th Sep (Last Hour)	MO Charges	Monthly	12/10/2018

BAL/IMB/CRM Payments in/out

- Payments in date for Settlement Documents issued 12th : D+3 by 12:00pm
- Payments out date for Settlement Documents issued 12th : D+4 by 17:00

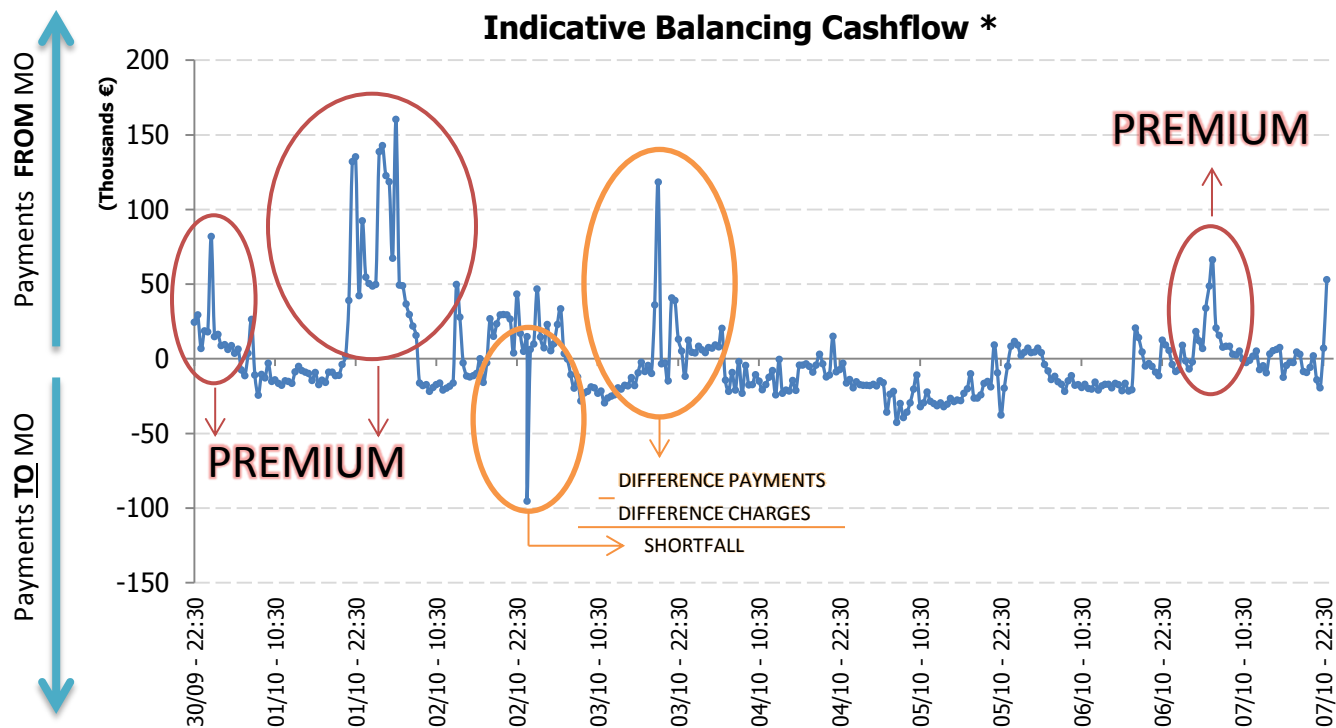

MO Payments in/out

- Payments in date for Settlement Documents issued 12th : D+5 by 12:00pm
- Payments out date for Settlement Documents issued 12th : D+6 by 17:00

Settlement

- Settlements Schedule Update – Sean O'Rourke
- **Cash Flow Analysis – John O'Dea**
- Credit Update – Nigel Thomson

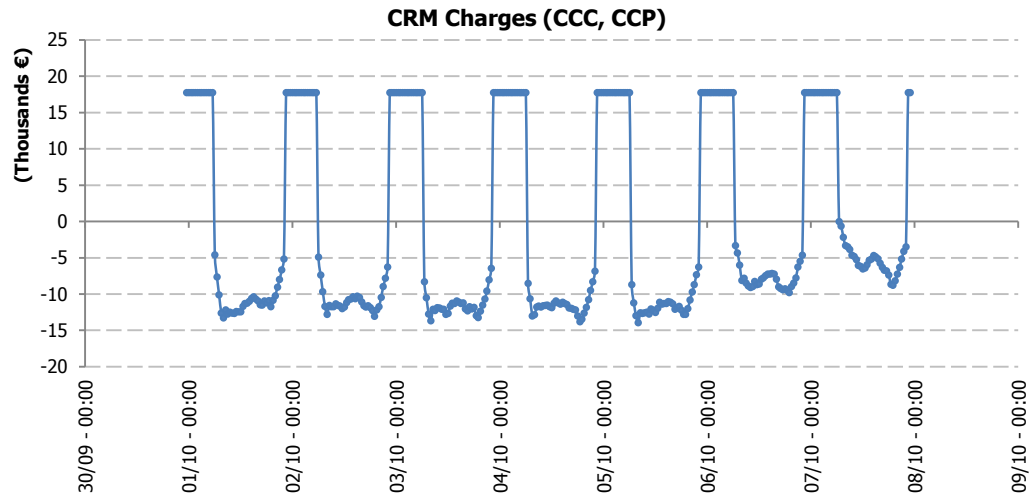

Balancing Cashflow Week 1 (Indicative)

- Net payment of €617K mainly driven by:**

- Premium and Discount payments [INC and DEC COD differences vs Imbalance Price]. This is mainly due to large positive and negative imbalance prices. There is also a defect in the selection of Simple COD instead of Complex COD after the Settlement Day Boundary.
- Difference and Shortfall: Imbalance price exceeding the strike price (currently 500€/MWh). Shortfall triggered by difference between difference payments and difference charges.
- Fixed Cost Payments of €704K Included in indicative settlement for Saturday 6th October for an Imbalance Settlement Period

CRM and MO Cashflow Week 1 (Indicative)

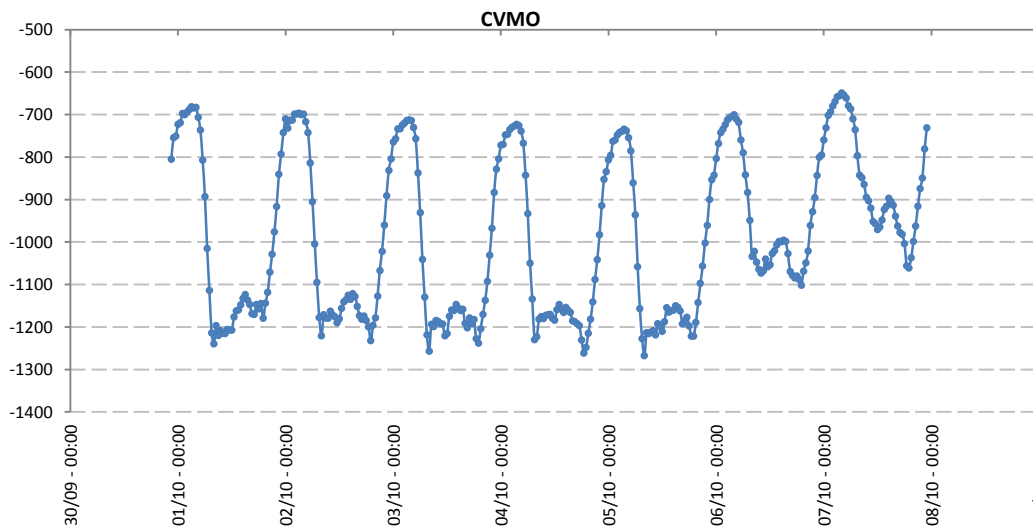

CRM (Capacity Remuneration Mechanism):

Payments are effective throughout the whole day while charges are applied only between 7am and 11pm.

$$CCP_{\Omega y} = \sum_{n \in \gamma, qCCOMMISS \neq 0} \left(qC_{\Omega n} \times PCP_{\Omega n} \times \frac{1}{ISPIY_y} \right)$$

$$CCC_{vy} = QMLF_{vy} \times FQMCC_y \times PCCSUP_y$$

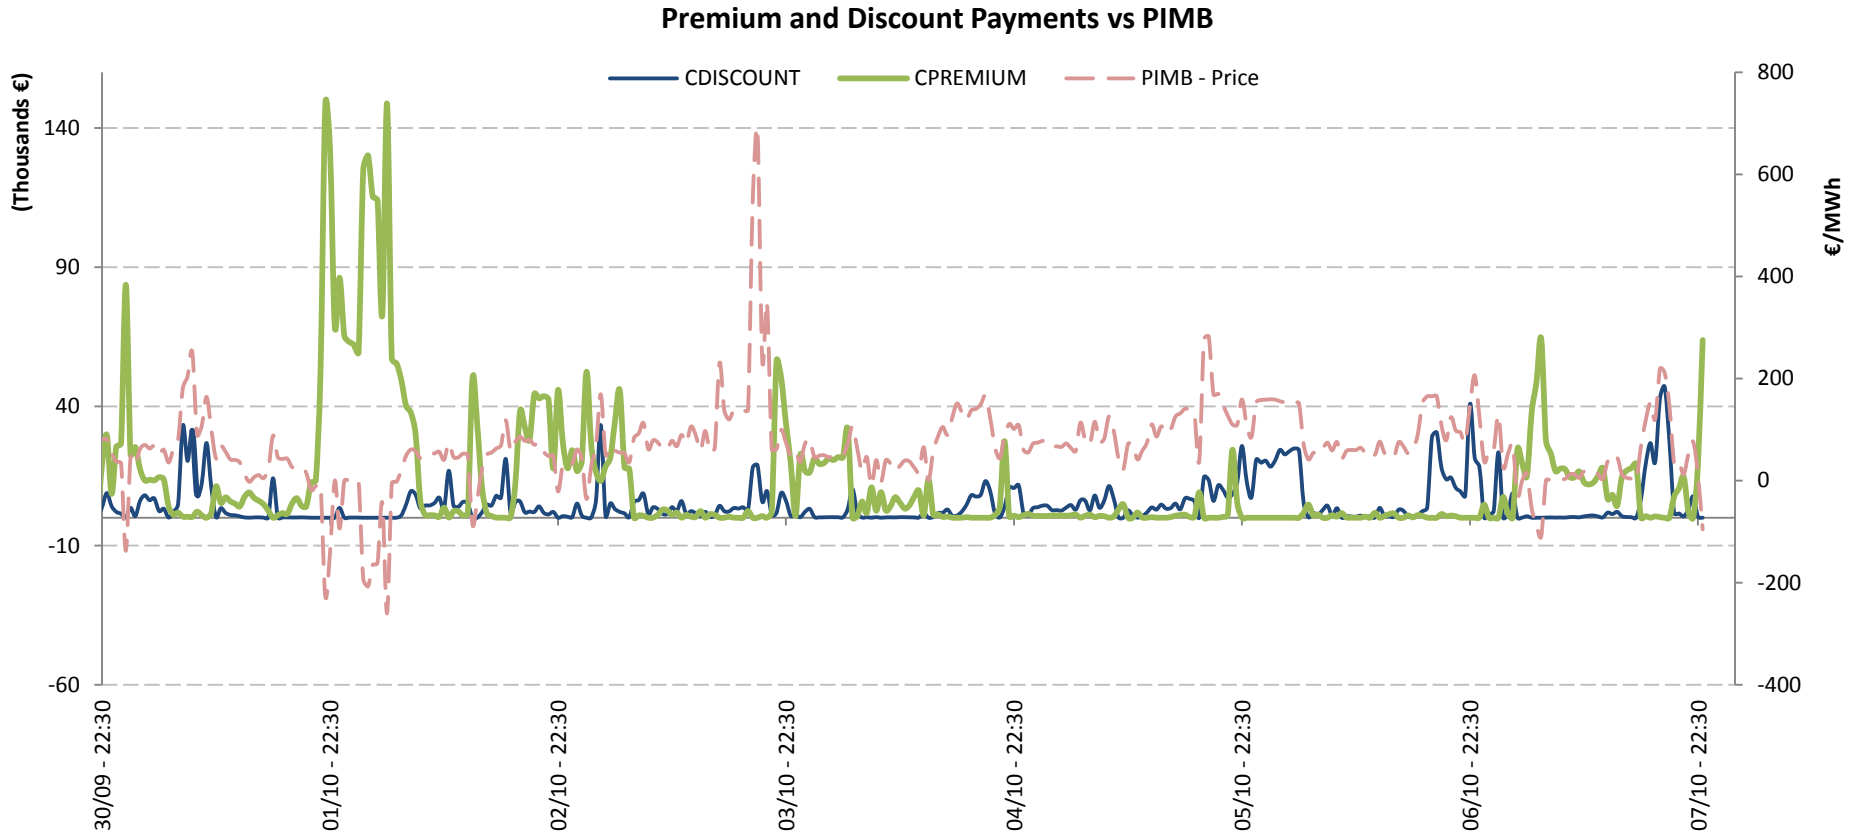

CVMO (Variable Market Operators Charge):

- Variable Charges are based Supplier Unit Metering
- Fixed Market Operators charges CMOAU and CMOAV are charged the last day of the month.

$$CVMO_{vb} = \sum_{y \text{ in } b} QMLF_{vy} \times PVMO_y$$

Premium and Discount Components

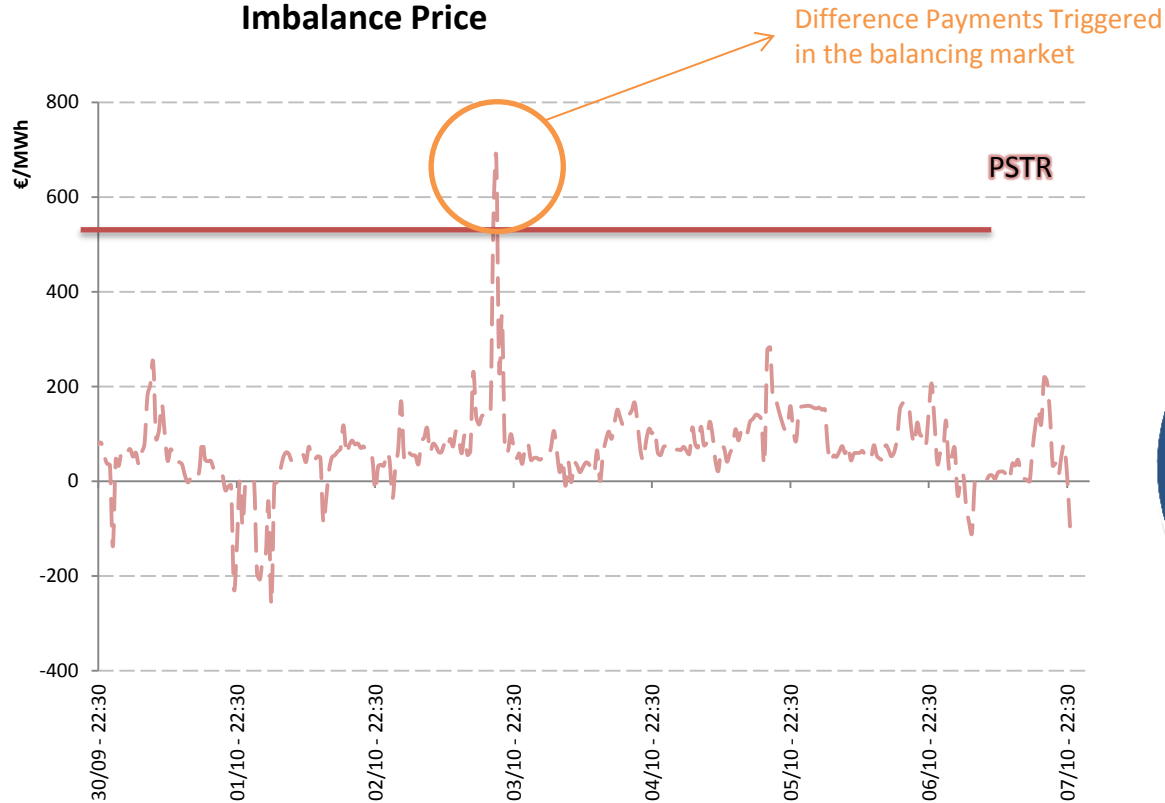

-With **higher** Imbalance prices we get **higher Discount** payments and with **lower** imbalance prices we get **higher Premium** payments.

$$\begin{aligned}
 &CPREMIUM_{uoy} \\
 &= \sum_o \sum_t \left(\overbrace{\text{Max}(PBO_{uoy} - PIMB_y, 0)} \right) \\
 &\times (QAOLF_{uoy} \\
 &- \text{Max}(QAOPOLF_{uoy}, QAOBIA_{uoy}, QAOUNDEL_{uoy}, QAOTOTSOLF_{uoy}))
 \end{aligned}$$

$$\begin{aligned}
 &CDISCOUNT_{uoy} \\
 &= \sum_o \sum_t \left(\overbrace{\text{Min}(PBO_{uoy} - PIMB_y, 0)} \right) \\
 &\times (QABLF_{uoy} \\
 &- \text{Min}(QABBPOLF_{uoy}, QABBIAS_{uoy}, QABUNDEL_{uoy}, QABNFLF_{uoy}, QABCURLLF_{uoy}, \\
 &QABTOTSOLF_{uoy}))
 \end{aligned}$$

Difference Payments and Charges

Imbalance Price

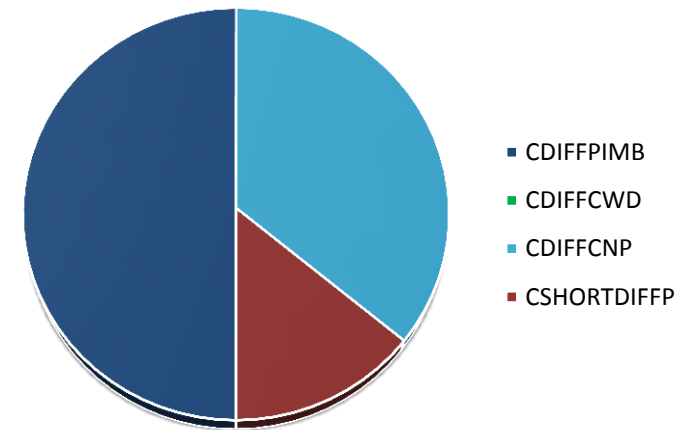

$$CDIFFPIMB_{v,d} = \sum_{y \in d} (QDIFFPIMB_{vy} \times \text{Min}(0, \overbrace{PSTR_m - PIMB_y}^{\text{Difference Payments Triggered in the balancing market}}))$$

— PIMB - Price

The Imbalance Price went above the strike price on the 3rd leading to Difference charges and payments.

Difference Payments and Charges

Causes for Shortfall:

- Defect regarding - Within day difference charges
- Stop Loss limits
- Autoproducers difference charges not being correctly calculated

Known Settlement Issues

- Selection of Simple COD instead of Complex COD at the Settlement Day Boundary- **Fix Delivered**
- Difference Within Day Charges reduced due to simple MAX/MIN logic change- **Fix Delivered**
- I/C CIMB/Premium/Discount Settlement not outputting from system - I/C trades interface issue
- Difference Charge Calculation - Autoproducer trading sites not being correctly calculated
- Missing BOA at the start of Settlement Day intermittently - related to QBOAs not being calculated for affected unit
- Units being skipped in QBOA calculation because of incomplete FPN submission or dispatched above Maximum Generation, causing units not to have QBOAs calculated - **Fix Delivered**
- Wind units skipped due to internal processing error – **Fix Delivered**

Settlement

- Settlements Schedule Update – Sean O'Rourke
- Cash Flow Analysis – John O'Dea
- **Credit Update – Nigel Thomson**

Temporary Process

Issue:

- Process issue with managing collateral allocation between SEM and I-SEM
 - It was not envisaged to be such high volumes
 - ~25+ small value Credit Cover Increase Notices (CCINs) in SEM would have occurred each day and the transitional process of requesting allocation of I-SEM to SEM posted collateral was too cumbersome to cope with this.

Solution:

- Temporary process implemented to manage in the short term
 - Communicated in daily call and email sent to all distribution list
 - Temporary process included:
 - a. **Automatic allocation of Posted Credit Cover to SEM** if CCIN
 - b. **Afternoon I-SEM credit report only** until after final SEM Initial Capacity payment cycle complete (15th Oct '18)
 - No morning or mid-day reports
- More details on the issue and mitigations are available from the SEM-O website [here](#)

Phase Out of Temporary Process

- Morning and mid-day I-SEM credit reports
 - Plan to publish morning credit reports from 16th October
i.e. 2 credit reports per day
 - Plan to publish mid-day credit reports from 22nd October
i.e. 3 credit reports per day

Credit Report	Credit run started	Estimated Publication Time
Morning	9:00	10:30
Mid-day	12:00	13:30
Afternoon	15:30	17:00

Automatic Allocation Phase Out

- **Automatic allocation** of collateral between SEM and I-SEM will stop from 16th Oct.
- **SEM Resettlement Invoices and SEM Credit Cover**
 - In SEM, you may get a Credit Cover Increase Notice (CCIN) when resettlement invoices created
 - You will need to either:
 - a. **Pay SEM resettlement invoice early**
 - within 2 working days [not standard 3 working days]
 - b. **Request transfer of excess collateral from I-SEM to SEM** to cover this (I-SEM collateral refund authorised person needs to request this following AP9 Collateral refund procedure. [[TSC Part C 11.12.2](#)])
 - Must be done within 1 working day of the CCIN
 - Must specify that the refund needed is part of a interim transfer facility and provide the related SEM Participant ID.
 - c. SEMO will also accept **requests to maintain an additional buffer** of SEM credit cover over and above the amount required by [[TSC Part C 11.9.3](#)])
 - Request in by Monday 15th October to crmteam@sem-o.com
 - From SEM Collateral Refund Authorised person

Resolving Credit Cover Increase Notices (CCIN)

- Whether breach is resolved or not is based on results of next I-SEM credit cover report
- If latest report is not in breach then CCIN considered resolved
- You will have 2 working days from the working day after the date of issue of the Credit Cover Increase Notice (i.e. credit breach report) to bring your credit cover back in line (i.e. a new credit report needs to show no breach)
- Just posting the difference between the required and posted credit cover from the first breach report may not be enough, as the inputs and calculations move on.

Agenda

The Agenda for the session is as follows:

Item	Presenter
Welcome	Liam Ryan
Ex-Ante Market	Liam McAllister
Balancing Market	Diarmaid Gillespie, Simon Tweed
Settlement	Sean O'Rourke, John O'Dea, Nigel Thomson
Imbalance Pricing	Aodhagan Downey, Brendan O'Sullivan
Query management	Claire Breslin

Imbalance Pricing - Key messages

- Balancing Market outcomes driven by:
 - Ex Ante Trading – DAM, IDAs and IDC
 - High wind, lower system margins
 - PNs and offers/bids
- Outcomes broadly reflective of fundamentals
 - Long → Low/negative prices; Short → Higher prices
 - Issue identified and fixed in relation to Negative Reserve Flagging

Imbalance Prices 1st – 9th Oct – Negative Res Flag

Signature of issue

- PAR Effect – When unflagged unit in PAR
 - constraint_id = 'S_NEGROI' or 'S_NEGNI'
 - Non-energy flag = 1 ... was not being flagged
 - PAR tag>0; and,
 - Replaced_bod_price = pboa
- PMEA Effect – When unflagged unit sets PMEA
 - constraint_id = 'S_NEGROI' or 'S_NEGNI'
 - Non-energy flag = 1 ... was not being flagged
 - price_marginal_engy_action = pboa
- N.B. Other constraints can have Non Energy Flags = 1.
- Issue was addressed in the systems on Monday 8th Oct.

Imbalance Pricing

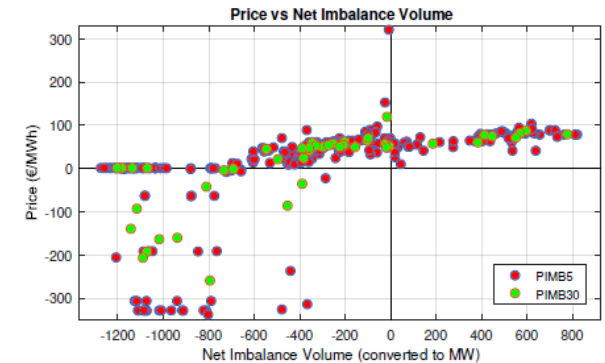

- Other lesser issues identified:
 - Very small QBOAs related to non-controllable wind
 - QBOAs for GU_400180 up to 15:00 on 2nd Oct.
 - QBOAs for GU_400202
- These issues will be considered with the Negative Reserve periods.

Imbalance Pricing – 2nd Oct

Imbalance Sett Price vs Net Imbalance Volume

Imbalance Settlement Prices vs Net Imbalance Quantity

1st – 9th Oct 2018

Route to correct pricing errors

- Pricing errors cannot be subject to **Settlement Queries**
- The intent of this is to ensure imbalance prices are firm as soon as possible and not subject to recalculation barring in exceptional circumstances
- A **Pricing Dispute** provides the route for a participant to challenge the published imbalance settlement prices
- A participant should submit a **Dispute Notice** within **five Working Day** of the publication
- Separately, paragraph **E.3.8.1** does allow the MO to identify a **manifest error** within **five Working Days** of publication of an imbalance price
- A recalculation and amendment of the imbalance price can only occur under paragraphs **E.3.8.1** and **E.3.8.2**

Route to correct pricing errors

- While the MO can initiate the process directly, it is felt that the Pricing Dispute provisions provide greater transparency and impose obligations on the MO around activities related to the resolution of the Dispute
- As part of the **Dispute Resolution Form**, the timeframe for any resolution activities must be agreed
- This is then communicated to the **Disputing Participant**, the SEM RAs and all other **Affected Participants**
- For a Pricing Dispute, all registered Participants become Affected Participants

Route to correct pricing errors

- SEMO has received Pricing Disputes in relation to the trade dates of **October 1st** and **October 2nd** submitted in accordance with paragraph **B.19.1.3**
- In accordance with paragraph **E.3.8.1**, SEMO has determined that a manifest error has occurred on these days (in that the Negative Reserve Constraint flags were not applied correctly in the calculation of the prices)
- Given this, SEMO will respond to these Disputes within five Working Days in accordance with paragraph **B.19.2.2(a)**
- As per paragraph **B.19.2.2(b)**, as SEMO has determined that a manifest error has occurred, the other provisions (referral to a Dispute Resolution Board) are not required

Route to correct pricing errors

- SEMO will set out in the Dispute Resolution Form
 - The specific five minute Imbalance Prices that have been calculation incorrectly;
 - Those that are required to be recalculated;
 - The timeline for re-calculation and publication of these Imbalance Price and related Imbalance Settlement Prices; and
 - The timeline for any special **ad-hoc Settlement Reruns**
- Note
 - In the resolution of each five minute Imbalance Price that has been calculated incorrectly, SEMO will apply the **Price Materiality Threshold** to assess if recalculation is required;
 - When Imbalance Settlement Prices have been recalculated, SEMO will apply the **Settlement Recalculation Threshold** and the **Materiality** assessment to determine if a special ad-hoc Settlement Rerun is required

Route to correct pricing errors

- **Next Steps –**

- SEMO will continue our assessment of the Price Materiality for each imbalance price calculated incorrectly;
- We will propose to the Disputing Participant(s) and SEM RAs the timeline for resolution of the issue which may include recalculation of a number of imbalance prices and ad-hoc Settlement Reruns;
- When agreed, all Affected Participants will be notified of the resolution of the Dispute and timelines for any activities that need to be applied;
- This issue remained in place until October 8th, so there are a number of trade dates not yet under Pricing Dispute;

Agenda

The Agenda for the session is as follows:
