1.1 SECRETARIAT UPDATE

Secretariat welcomed all to Capacity Market Workshop 37 noting that Capacity Market Code Version 11.0 was published in March 2024 and there are currently no Modification Proposals on the baseline.

RA Update

The RAs delivered a <u>presentation</u> on open items noting that the consultation on Workshop 36 Modifications closed recently, with decisions due at the end of June. Modifications associated with recent decisions on Early Delivery Incentives and Intermediate Length Contracts were in development and are likely to be proposed as 'urgent'.

TSO UPDATE

TSO gave an overview of new and existing system updates in progress noting that the volume and complexity of Modifications in recent times had increased and had caused some to be delayed while others were progressed.

Item	Name	Description	Status	Prev. Date	New Date
1	Intermediate Length Contracts	Give effect to SEM-24-035. The SEM Committee has decided to introduce ILCs for the 2028/29 T-4 auction in November 2024 and to all future auctions until further notice.	Working with RAs to introduce modifications which give effect to the decisions set out in SEM-24-035 and identify where any system changes may be required.	N/A	H2 FY23/24
2	Early Delivery Incentives	Give effect to SEM-24-037 The SEM Committee has expedited this workstream so as to develop an appropriate early delivery incentive policy and communicate this policy in sufficient time for the upcoming T-4 auction. the SEM Committee will work to propose the required implementing modifications to the CMC, and any necessary charges to the Trading & Settlement Code	Working with RAs to introduce modifications which give effect to the decisions set out in SEM-24-037 and identify where any system changes may be required.	N/A	H2 FY23/24
3	Online Secondary Trading Platform	Implementation of CMC_11_21 and CMC_09_22. Online submission of secondary trades and automation of validation processes. Phase 1 relates to the reduction of processing time to 2 hours, which requires automation of process. Phase 2 relates to the implementation of trading above Gross De-Rated Capacity	Phase 1 requirements are complete. We are currently seeking to finalise timeline with vendor. Phase 2 requirements in development. Impact assessment being finalised for RAs' review.	H2 FY23/24	H1 FY24/25*
4	Online Qualification Platform	Online submission of Application for Qualification and automation of Alternative Qualification Process. More user-friendly application process, reduced need for PTs to submit forms, reduction in operational risk and delays in processing Applications for Qualification	Advanced design stage SOs currently working to complete final requirements	H2 FY23/24	H1 FY24/25*
5	Post Auction Process Improvements	Online Performance Security status. Online Implementation Progress Report submission. Online submission of milestone verification documents. Improved status tracking	Under Review	TBC	TBC

CMC 06 24 PERFORMANCE SECURITIES FOR EXTENDED PROJECTS

Shannon LNG delivered a <u>presentation</u> for this Modification Proposal noting that the principle of this Modification Proposal already exists in the Code.

A query on expanding the scope of the proposal and the applicability to broader delay scenarios was raised. It was advised that this could be explored during the consultation.

Modification Status - Under Consultation

CMC_07_24 TREATMENT OF CAPACITY CONTRACTS OF VARYING DURATION IN CONSTRAINED AUCTION SOLUTION

Energia gave an overview of the Modification Proposal noting that it was seeking to ensure that the principle of priority for shorter term contracts was preserved with the introduction of intermediate length contracts.

The System Operator advised that the implementation of the proposal would be complex and challenging to deliver. The Proposer provided assurance that they would work with the System Operator on what the best solution would be to implement the intent of this Modification Proposal.

There was support from a number of participants with concerns from others raised over potential disincentivising of new capacity if priority was given to longer duration contracts for existing capacity. It was suggested that in order to observe the underlying principle shorter offers ought to be given priority over longer offer rather than simply up to five years having priority of ten year offers.

Modification Status - Under Consultation

CMC_08_24 WIDENING OF LONG STOP EXTENSION PROCESS TO AWARDED CAPACITY FOR 2023-24 AUCTION

Grange Back Up Power Limited delivered an overview of this Modification Proposal and its background. The Proposer noted the changes to J.5.8.1 advising that it was intended to avoid undue discrimination between auctions.

Modification Status - Under Consultation

CMC_09_24 AMENDMENTS TO J.5.7 AND J.5.8

RAs delivered an overview on this Modification Proposal. The Proposer went through the rationale of the Proposal i.e. ensuring clarity of intent and to ensure that the Code is aligned with associated SEM decisions.

Modification Status - Under Consultation

3 AOB

Secretariat noted that Capacity Market Code Modifications Workshop 38 is provisionally scheduled for 23rd July 2024. Assurance was given that if an additional workshop is required in the interim, as RAs have suggested may be the case (ref. RA Update), Participants will be notified in advance.

3.1 NEXT STEPS

- 1. SOs to publish Workshop Report.
- 2. RAs to publish consultation timetable(s).
