1. Capacity Market Dispute Resolution Panel

1.1. Background and Purpose

For the purposes of disputes, and in line with the requirements of the Single Electricity Market Capacity Market Code (CMC), the System Operators shall establish and maintain a panel (the “Panel”) consisting of members whom have been approved by the Regulatory Authorities.

The Panel shall include suitably qualified experts from relevant disciplines who:

- (a) are experienced in and familiar with alternative dispute resolution procedures which do not involve litigation; and/or
- (b) have an understanding of the electricity industry or have the technical competence to acquire such an understanding.

From the Panel, the Capacity Market Dispute Resolution Board (CMDRB) is established, pursuant to Section B.14.5 or B.14.6 of the CMC.

This guide is intended to assist persons who may need to seek resolution of a dispute. The rules relating to dispute resolution are those set out in the CMC. For the avoidance of doubt, in the event of any conflict or inconsistency between the information following, and the CMC, the CMC shall prevail. Whilst this guide is intended to assist persons using it, it is not intended to be a substitute for the rules set out in the Capacity Market Code.

1.2. Definition of Dispute

According to paragraph B.14.1.1 and B.14.1.2 of the Code, a ‘Dispute’ means any claim, dispute or difference of whatever nature between any of the Parties howsoever arising under, out of, or in relation to the CMC or the Framework Agreement (including the existence or validity of the same).

The legality, validity or enforceability of a decision or determination of the Regulatory Authorities (including a decision to approve or reject any matter or thing, including Final Qualification Decisions or Capacity Auction Results) made under the CMC, deemed to have been made under the CMC or contemplated by the CMC cannot be the subject of a Dispute under section B.14. There are the following categories of Dispute under the Code:

- a. A “Qualification Dispute”: being a Dispute relating to or arising out of the Qualification Process; and
- b. A “General Dispute”: being a Dispute which is not a Qualification Dispute.

Disputes in relation to settlement of Capacity Payments and Capacity Charges, and Difference Payments and Difference Charges, other amounts payable under the Trading and Settlement Code in respect of the Capacity Market and related matters shall be dealt with in accordance with the Trading and Settlement Code, and not in accordance with the provisions of this section B.14 or any other provision of this Code (except for paragraph B.14.1.4 of the CMC).

1.3. Objectives of the Dispute Resolution Process

It is intended that the Dispute Resolution Process that is set out in, or implemented in compliance with, the CMC, to the extent possible:

- a. Be simple, quick and inexpensive;
- b. Preserve the relationship between the Disputing Parties;
- c. Preserve and allow for the continuing and proper operation of the CMC and the Capacity
- d. Market Objectives;

- e. Resolve Disputes on an equitable basis in accordance with the provisions of this Code having regard to the Capacity Market Code Objectives;
- f. Take account of the skills and knowledge that are required for the relevant Dispute; and
- g. Encourage resolution of Disputes without formal legal representation or reliance on legal procedures (other than as set out in section B.14 of the CMC)

1.4. Stages of Dispute Resolution Process

The Dispute Resolution Process is set out in Section B.14 of the Code. Further information along with required forms may be found in Section B.14 and the Appendices of the Code.

1.5. Appointment of the Dispute Resolution Board

The Disputing Parties enter into a contract with the Panel Members directly rather than with the Market Operator.

There are the following categories of Dispute under the CMC:

- a. a “Qualification Dispute”: a Dispute relating to or arising out of the Qualification Process; and
- b. a “General Dispute”: a Dispute which is not a Qualification Dispute.

The Form of Dispute Resolution Agreement is contained in Appendix B of the Capacity Market Code. Details of each category of Dispute can be found in Section B.14.

1.6. Fees Payable

Fees are covered by clause 8 of the Dispute Resolution Agreement (as set out in Appendix B to the Code) and it is a matter for the member(s) to propose and the Disputing Parties to agree. There are no fixed fees or published rates. This recognizes the range of disciplines and experience that may need to be called upon depending on the nature of the dispute.

Subject to paragraph B.14.7.7, each Disputing Party shall be responsible for paying an equal share of the costs of the CMDRB in respect of the Dispute involving them and shall bear its own costs of the CMDRB procedure.

The CMDRB may make a decision as to the award of costs in any Dispute which decision shall be binding on the Disputing Parties.

1.7. Disputes Resolution Panel

Paragraph B.14.4.2 of the CMC states that the Panel shall include suitably qualified experts from the relevant disciplines who:

- a. Are experienced in and familiar with alternative dispute resolution procedures which do not involve litigation; and/or
- b. Have an understanding of the electricity industry or have the technical competence to acquire such an understanding

Pursuant to paragraph B.14.4.2, members have been invited to sit on the Panel for their relevant experience and expertise in the electricity industry, construction, engineering and legal fields and alternative dispute resolution by the Regulatory Authorities and the MO. The Panel shall consist of no less than 10 members subject to any vacancies which may arise from time to time which shall be filled as soon as reasonably practicable. Any vacancies arising from time to time shall not invalidate the Panel.

1.7.1. Nomination of the Panel Chairperson

Pursuant to paragraph B.14.4.6 of the Code, the Regulatory Authorities have nominated Joe Behan as Chairperson of the Dispute Resolution Panel.

Panel Member Biographies

1.8. Joe Behan (Chairperson)

Dispute Resolution Panel Chairperson	
Name:	Joe Behan
Occupation:	Mediator, Adjudicator, Arbitrator, Conciliator and Consulting Engineer

1.9. Gordon Barry (Vice-Chairperson)

Dispute Resolution Panel Vice-Chairperson		
Name:	Gordon Barry (adjudication.eu)	
Occupation:	Arbitrator, Adjudicator & Mediator	
Qualifications followed by short synopsis:		
<p>BE DipArb Eurlng CEng CEnv CSci CWEM FCIArb FCIWEM FIEI FIChemE RPEQ FIDIC Accredited Dispute Adjudicator / CIArb Accredited Mediator</p> <p>Gordon Barry graduated with a degree in engineering in 1989, and initially worked with Contracting Organisations, before becoming a Consultant Engineer in 1998. In 2000 he started training in dispute avoidance and dispute resolution and has been providing dispute resolution services professionally since 2006, when he took charge of his first arbitration.</p> <p>ADR Expertise</p> <p>Gordon is experienced in the roles of Arbitrator, Dispute Board Member, Adjudicator and Conciliator, and is known internationally for his ability to combine a broad expertise in a range of dispute resolution procedures with a strong technical skill set. His ADR experience includes the management of jurisdictional challenges and other preliminary issues, the management of hearings with both Parties represented by counsel, and the subsequent preparation of reasoned decisions and awards</p> <p>Gordon's experience in dispute resolution has been recognised by his inclusion in a number of national and international panels, including the European Commission list of Arbitrators and Trade and Sustainable Development Experts for use in disputes arising under trade agreements with third countries, and the FIDIC President's list of Adjudicators and Mediators.</p> <p>Technical Expertise</p> <p>Gordon is recognised as having a broad technical expertise across the engineering, environmental and scientific disciplines and he is Chartered in all three disciplines. This expertise is initially founded in the process engineering and mechanical and electrical sectors with particular reference to the Water Services Sector.</p> <p>Gordon's technical experience also includes the delivery of infrastructure projects from initial feasibility studies, through to the supervision of the Operation and Maintenance of Facilities. He has been responsible for the management and supervision of a broad range of design and construction tasks, including those beyond his own personal area of expertise.</p>
