Table of Contents

Table of Contents.....	2
Table of Figures	46
Table of Tables	79
1 Disclaimer and Content Information.....	1315
2 Introduction	1446
2.1 Scope of this Volume	1446
2.2 Balancing Market Interfaces.....	1446
2.3 Structure of this Volume.....	1517
3 Treatment of time in the I-SEM Systems	1618
3.1 Trading Periods	1618
3.2 Time Representation.....	1618
3.2.1 Type 3 - UTC Time.....	1618
3.2.2 Type 2 - Local Time	1618
4 Balancing Market Registration.....	1749
4.1 Scope of I-SEM Registration system.....	1749
4.2 Gaining access to the I-SEM Systems	1749
4.3 Type 2 and Type 3 Query & Submission	1749
4.3.1 Type 2 Query & Submission via the I-SEM Registration System	1924
4.3.2 Type 3 Query & Submission via the I-SEM Registration System	2022
4.4 User Access Management	2122
4.4.1 User Access Roles.....	2123
4.4.2 System Access	2123
4.5 Balancing Market Registration - Queries	2224
4.5.1 Registration Query - Methods & Validations for Common Attributes	2224
4.5.2 Registration Query - Elements & Validations	2224
4.6 Validation and XML dataset examples	2224
4.6.1 Participant.....	2326
4.6.2 Participant Validity.....	2628
4.6.3 Participant: Balancing Market Data	2729
4.6.4 Participant: Capacity Market data.....	2830
4.6.5 Participant: EirGrid/SONI SEMOpX Data.....	2934
4.6.6 User.....	3133
4.6.7 User: System Access	3336
4.6.8 User: Key Contacts	3537
4.6.9 User: Authorisation.....	3638
4.6.10 User: Notifications	3739
4.6.11 Bank Data	3840
4.6.12 Trading Site	4042
4.6.13 Resource	4144
4.6.14 Resource Validity	4346
4.6.15 Resource: Balancing Market Data.....	4547
4.6.16 Resource: Capacity Market Data	5153
4.6.17 Resource: SEMOPX Data.....	5356
4.6.18 Resource: AoLR Data	5456
5 Balancing Market Trading.....	5759
5.1 Introduction.....	5759
5.2 Type 3 Submission Structure	5759
5.3 Market Interface Data Submission Process.....	5860
5.3.1 Market Interface Data Submission Overview	5860
5.3.2 Trading Windows	5961
5.3.3 Gate Windows (data submission timings).....	6062
5.3.4 Default and Trading Day "complex" Commercial Offer Data & Forecast availability	6062
5.4 Message Validation and Sample XML.....	6163
5.5 Commercial Offer Data	6264
5.5.1 Simple Commercial Offer Data.....	6264
5.5.2 Complex Commercial Offer Data	6264
5.5.3 Forecast Availability Data	6264
5.5.4 Unit-Specific Parameters	6365
5.5.5 Generator Offers	6365
5.5.6 Demand Offers	7276
5.6 Validation Technical Offer Data (VTOD).....	7781
5.6.1 Default and Trading Day Validation Technical Offer Data	7781
5.6.2 Generator VTOD Set.....	7781
5.6.3 Demand VTOD Set	8790
5.6.4 VTOD Set Choice	8992
5.7 Physical Notifications (PN).....	9194
5.7.1 Physical Notifications - Methods.....	9194
5.7.2 Physical Notifications - Data Elements and Validations	9194
5.7.3 Physical Notifications - Sample XML	9497
5.8 Settlement Reallocation Agreements	9598
5.8.1 SRA Overview.....	9598
5.8.2 SRA Submission & Approval	9599

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

5.8.3	SRA Cancellation and Termination.....	95400
5.8.4	Settlement Reallocation Agreement - Methods.....	96400
5.8.5	Settlement Reallocation Agreement - Data Elements and Validations.....	96400
5.8.6	Settlement Reallocation Agreement - Sample XML.....	97404
6	Reporting.....	98403
6.1	Introduction.....	98403
6.2	I-SEM Balancing Market Trading Interface Reports.....	98403
6.3	Type 3 Report List / Reporting query process.....	98403
6.3.1	Requesting Report List Process.....	98403
6.3.2	Requesting a Specified Report Process.....	99404
6.4	Report Query validation.....	100406
6.4.1	MI Reports.....	100406
6.4.2	CSB Reports.....	101406
6.5	Balancing Market Interface Reports and Content Details.....	103408
6.5.1	MI Reports.....	103408
6.5.2	CSB Reports.....	104409
6.6	Reports Listing.....	104409
6.6.1	Annual Reports.....	104409
6.6.2	Monthly Reports.....	104409
6.6.3	Daily Reports – Forecasts.....	104409
6.6.4	Daily Reports – COD and TOD.....	104409
6.6.5	Daily Reports – Results and PNs.....	105440
6.6.6	Daily Reports – Operational Schedules.....	105440
6.6.7	Daily Reports – Imbalances.....	105440
6.6.8	Daily Reports – Other.....	105440
6.6.9	Daily Reports – Ex Post.....	105440
6.6.10	Reports - Event Driven.....	106444
6.6.11	Settlement Reports.....	106444
6.7	Trading Reports.....	107442
6.7.1	Annual Reports.....	107442
6.7.2	Monthly Reports.....	108444
6.7.3	Daily Reports – Forecasts.....	110445
6.7.4	Daily Reports – COD and TOD.....	116424
6.7.5	Daily Reports – DAM/IDM Results and PNs.....	124430
6.7.6	Daily Reports – Operational Schedules.....	129434
6.7.7	Daily Reports – Imbalances.....	133437
6.7.8	Daily Reports – Other.....	137442
6.7.9	Daily Reports – Ex Post.....	139443
6.7.10	Reports - Event Driven.....	151456
6.7.11	Settlement Reports.....	152457
7	Appendix A: Special Characters.....	182487
8	Appendix B: Charge Code Mapping to Settlement Reports.....	183488
9	Appendix C: Determinants Mapping to Settlement Reports.....	184489
10	Appendix D: Report Types and Sub-Types.....	187493

Document History

Version	Date	Author	Comment
1.0	3 June 2016	EirGrid and SONI	Initial Draft.
2.0	21 June 2016	EirGrid and SONI	Update with Settlement Reports (Section 6.7.11) and XML data set examples (Section 4.6).
3.0	19 August 2016	EirGrid and SONI	Update to include further detail on Balancing Market Registration (Section 4). Minor amendments to Reporting (Section 6) and Balancing Market Trading (Section 5), including content on SRA.
4.0	6 September 2016	EirGrid and SONI	Update to Settlement Document – addition of 3 rows within Settlement Document Summary Field Description and addition of the Settlement Document VAT Proportions Table Minor updates to Balancing Market Registration (Section 4.6) with the inclusion of applicable Resource Type validations and to Balancing Market Trading (Section 5) with the addition of footnotes.
5.0	31 January 2017	EirGrid and SONI	Update to AOLR Unit Report – removal of “Actual Demand” field.
6.0	5 May 2017	EirGrid and SONI	Minor updates to Section 5.5.5.2 (Generator Offer – Data Elements and Validations) and Section 5.5.6.2 (Demand Offer – Data Elements and Validations) Minor updates to Section 5.7.2 Physical Notifications Addition of the Dispatch Quantity Report
7.0	17 July 2017	EirGrid and SONI	DSU PN Changes Updates to SRA Validations
8.0	13 October 2017	EirGrid and SONI	Change name from NEMO to SEMOpX where applicable Update to User: Key Contacts and User: Authorisation validations and data types Minor update to Generator VTOD validations Minor update REPT_011 field formats Make Whole Payment I-SEM Reference Report updated to REPT_074 Updated field descriptions in Daily Technical Offer Data Report
9.0	01 December 2017	EirGrid and SONI	New reports added: REPT_101, REPT_102, REPT_103 Removed REPT_001a and REPT_002a Further updates outlined in I-SEM ITS R7 Release Notes
10.0	09 February 2018	EirGrid and SONI	1. Added the new field “accept_time” to REPT_057/058. 2. Updated filemask for filename on REPT_052 and REPT_053 to clarify the use of the Participant ID for these two member Private reports. 3. Added new subsection to 6.4 Report Query Validation for clarity on Type 3 (API) access for CSB reports from the MPI. 4. Updated REPT_043 description for CHARGE_SUMMARY: AMOUNT field to clarify the value is for all of the Market Participant's units. 5. Updated date (year) in document footer
11.0	28 March 2018	EirGrid and SONI	1. Updated “EXCESS” to “EXCEED” for CREDIT STATUS field in REPT_048 – Approved SDG #306 2. Clarification to summary description of Aggregated Physical Notifications report. 3. Clarification to REPT_012 and REPT_016 - the use of “GEN” as a permitted value, correcting use of “GU” 4. Updates to REPT_067 – Filename, RUN to RUN_TYPE, and updated sample XML image 5. Updated classification for REPT_052 to Member Public per request from RWG. Updated filename and report name.
12.0	31 July 2018	EirGrid and SONI	1. Clean up edits to the ITS pre go-live. Complete description of all changes made can be found in the I-SEM ITS Release 9.0, Release Notes, that accompany this document.

1 DISCLAIMER AND CONTENT INFORMATION

This document has been prepared to provide Participants with sufficient information in order to develop their own systems to interface with the I-SEM.

The following disclaimers relate to the content of this document and associated volumes and any use by Participants of the information provided therein.

1. EirGrid and SONI accept no responsibility for decisions made or actions taken by Participants as a result of the information presented in this document or associated documents. Furthermore, EirGrid and SONI do not indemnify any commercial or organisational decisions made by Participants in relation to the information herein.
2. This document represents the most up-to-date information on the I-SEM Systems as they have been developed. With this in mind, it is not appropriate simply to compare the document against the market rules; instead, the document is aligned with a release of the I-SEM Systems.
3. The information provided in this document is based entirely on documentation and information provided by the software vendor. Although EirGrid and SONI have made all reasonable efforts to ensure that the information presented is correct, it cannot guarantee the information provided.
4. Further changes to the processes described or schema elements presented may result as new information comes to light during future phases of the market development. To mitigate the impact of such changes, EirGrid and SONI will be issuing planned updates to this document and associated documents (where appropriate).

2 INTRODUCTION

2.1 SCOPE OF THIS VOLUME

The I-SEM Technical Specification¹ (ITS) comprises a number of volumes which provide participants with the information necessary for them to develop their own systems to interface with the I-SEM central market systems.

The volumes of the I-SEM Technical Specification are:

Volume	Document
A	I-SEM TS (Overarching Volume)
B	I-SEM TS (Technical Volume)
C	I-SEM TS (Balancing Market Volume)
D	I-SEM TS (SEMOpX Ex-Ante Markets Volume)
E	I-SEM TS (Capacity Market Volume)
F	Intentionally blank
G	I-SEM TS (Glossary)

Table 1: I-SEM Technical Specification Volumes

This volume covers all aspects of the Balancing Market Interface (previously known as the MPI and including the I-SEM Registration System) which forms part of the I-SEM Systems. This document principally addresses the **functional aspects** of the Balancing Market interface and is provided to enable Participants to communicate with the I-SEM Balancing Market Systems. A separate volume (B) covers the **technical aspects** of the Balancing Market interface.

The focus of this document is the Type 3 Communication Channel, i.e. submission and retrieval of I-SEM Data Transactions via Web Services. In addition, some of the introductory sections also refer to the Type 2 Communication Channel (i.e. data submission and retrieval using the Balancing Market Interface by Participant users), where such references are relevant.

Notes:

1. References in this document to “query” relate to the retrieval of data from the I-SEM Systems as opposed to the concept of formal queries as defined in the Trading and Settlement Code.
2. Whilst this document refers to the market as “I-SEM”, the market will continue to legally be referenced as the “Single Electricity Market (SEM)”.
3. For the avoidance of doubt, please note that references in this document to ‘NEMO’ relate to SEMOpX.

2.2 BALANCING MARKET INTERFACES

The entire suite of systems delivered by the I-SEM Market Operator/Transmission System Operators is known as the **I-SEM Systems**.

The **I-SEM Systems** include the **Balancing Market Interface**, which comprises:

1. The **I-SEM Registration System** enables:
 - a. Interaction regarding SEMOpX registration, enabling ex-ante (non-balancing) trading;

¹ The market arrangements and associated delivery project are known as the I-SEM, but parties are asked to note that the legal name for the new arrangements will be the Single Electricity Market (SEM).

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

- b. Balancing Market Registration, including Participant and Unit registration, deregistration, interaction with SEMOpX regarding participation via Agent of Last Resort (AOLR), Trading Site registration etc.; and
 - c. Capacity Market registration.
2. The **I-SEM Balancing Market Trading Interface** enables trading in the Balancing Market (including submission/query of bids/offers, Technical Offer Data and retrieval of market reports).

2.3 STRUCTURE OF THIS VOLUME

The remainder of the I-SEM TS: Balancing Market Volume is structured as follows:

- **Section 3** provides information relating to the treatment of time in the Balancing Market Interface.
- **Section 4** provides information relating to the submission and querying of Registration Data by Participants (via the I-SEM Registration System) in relation to the following entities:
 - User;
 - Party;
 - Participant;
 - Unit; and
 - Trading Site.
- **Section 5** provides information relating to the submission and querying of Balancing Market trading data by Participants via the Balancing Market Trading Interface, in relation to the following:
 - Commercial Offer Data, including the use of Default Data and the submission of “Simple Commercial Offer Data” and “Complex Commercial Offer Data”;
 - Technical Offer Data, including submission of VTOD (Validation Technical Offer Data) sets and selection of VTOD sets;
 - Settlement Reallocation Agreements;
 - Forecast Availability; and
 - Physical Notifications.
- **Section 6** provides information relating to the content, publication timing and granularity of reports provided via the Balancing Market Trading Interface as:
 - Member Private (i.e. provided to a single Participant in respect of its registrations or trading activities); and
 - Member Public (i.e. provided to all Participants).
- **Section 7** is an Appendix providing information on freetext characters used within the I-SEM Registration System.

3 TREATMENT OF TIME IN THE I-SEM SYSTEMS

3.1 TRADING PERIODS

Time² handling in the original SEM was handled by end of hour notation where the specific Trading Period was identified by a combination of Trading Day, Hour in Day and Trade Interval attributes. This approach will not be carried forward into the I-SEM, primarily as this approach is not suitable for a market which includes numerous different time intervals (e.g. minute-by-minute Physical Notifications, 5 minute Imbalance Pricing Period, 30 minute Imbalance Settlement Period and 1 hour Day Ahead Market trading intervals).

In the I-SEM, all interval data will be handled via Start_Time and End_Time attributes. These attributes will be in date/time format and will be validated as follows:

- The Start Time attribute must denote the beginning of a Trading Period.
- The End Time attribute must denote the (inclusive) end of a Trading Period.

For example, a single Trading Period starting at 06:00am would be denoted by Start and End Times, as follows:

- Start Time '2016-10-31T06:00:00'
- End Time '2016-10-31T06:30:00'

3.2 TIME REPRESENTATION

The following sections identify the time representations for both Type 2 and Type 3.

3.2.1 TYPE 3 - UTC TIME

All data submitted to the MMS via Type 3 submission will be in *Coordinated Universal Time (UTC)*. All data outputs provided via Type 3 will be in UTC Time.

3.2.2 TYPE 2 - LOCAL TIME

All data captured via Type 2 (e.g. via the Graphical User Interface, GUI) will be in "local time" (i.e. adjusted for daylight savings). The Balancing Market Systems will convert times submitted via Type 2 to UTC as required. All data presented via the Graphical User Interface (GUI), including reports, will be represented in "local time". Download of reports from the GUI will be as follows:

Type of Report	Time Representation
HTML	Local time
CSV	Local time
PDF	Local time
XML	UTC

Table 2: Type 2 Report Type, Time Representation

² Local time convention in the I-SEM will (as currently in the SEM) refer to the time in Belfast.

4 BALANCING MARKET REGISTRATION

This section provides information regarding the registration process and the necessary information in order to interacting with the I-SEM Registration System.

4.1 SCOPE OF I-SEM REGISTRATION SYSTEM

The I-SEM Registration System manages registrations for the following markets:

- Balancing Market;
- Capacity Market;
- Day Ahead Market (for the EirGrid/SONI SEMOpx only); and
- Intra-Day Market (for the EirGrid/SONI SEMOpx only).

The I-SEM Registration System does not include any functionality in relation to registration activities for any forward market or Financial Transmission Rights (FTR) market.

4.2 GAINING ACCESS TO THE I-SEM SYSTEMS.

Prior to using the I-SEM Market Systems to perform registration activities, applicants must register as a Party. In order to be registered as a Party, an applicant must access the registration form from the SEM website.

Once the application has been reviewed and approved by the Market Operator, the applicant is registered as a Party and provided access to the Balancing Market Interface (currently known as the MPI, including the I-SEM Registration System), comprising issuance of credentials (in the form of a Digital Certificate) to a designated Party Administration User (PAU). The PAU will then have access to create other authorised users, who are set out further in Section 4.4.1 of this document. Digital Certificates are provided to Authorised Users, allowing such Users to access the Balancing Market Interface on behalf of Participants registered under the relevant Party for which they have been granted access (see Technical Volume for details). Party Administration Users enable the Party to self-manage its user access and authorisations to the I-SEM Registration System, from which other registrations (e.g. Participant or Unit) can be initiated.

Once an applicant is successfully registered as a Party, a Registration User (acting on behalf of the Party) can register Units which enable trading in the I-SEM markets.

4.3 TYPE 2 AND TYPE 3 QUERY & SUBMISSION

Section 4.3 primarily relates to interactions with the I-SEM Registration System via Type 2 (human-to-computer) or Type 3 (computer-to-computer) communications³. Each transaction with the I-SEM Registration System is categorised as a “submit” (submission of new registration data or update to existing registration data) or “query” (viewing or download of registration data held within the I-SEM Registration System).

Table 3 below shows the data (element groups and sub-groups) that can be submitted via the I-SEM Registration System, along with the methods (Type 2/3) that are relevant to “submit” and “query” transactions.

Interface	Element Group	Element Sub-Group	Type 2	Type 3
I-SEM Registration	Participant	General	Submit, Query	Submit, Query

³ Note: Type 3 interaction with the I-SEM Registration System will not be available for I-SEM Go-Live.

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

System		Validity	Submit, Query	Submit, Query
		Balancing Market data	Submit, Query	Submit, Query
		Capacity Market data	Submit, Query	Submit, Query

		Capacity Market data	Submit, Query	Submit, Query
		NEMO data	Submit, Query	Submit, Query
		Agent of Last Resort data	Submit, Query	Submit, Query

Table 3: Type 2/3 Submission and Query

Note: While it is possible to submit (new or amended) Registration data as described in the following sections, Participants must ensure they follow the correct business process. The relevant business processes to approve submitted registration data will be set out in the relevant market rules.

As set out in [Figure 1](#) below, registration data that is submitted by Participants is initially set to a status of "Submitted" once successfully submitted to and validated by the I-SEM Registration System. The data is validated upon submission and is set to a status of 'Received' if it passes initial Market Operator validations. Only approved data can be active in terms of market participation.

Formatted: Font: Arial, Italic

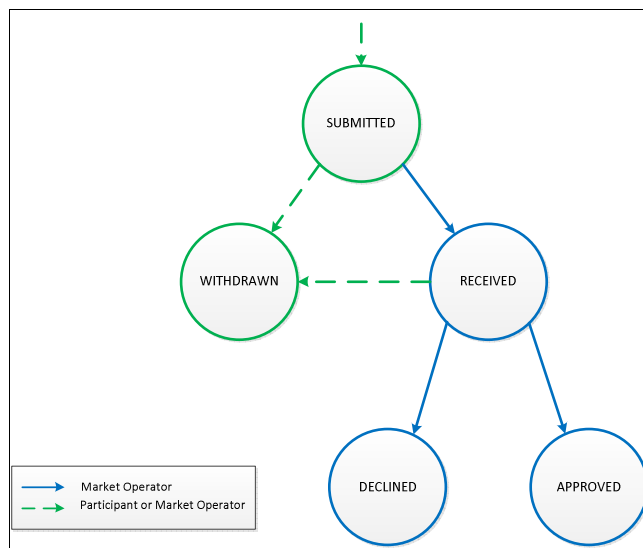

Figure 1: Registration Data, Application Status

Once a registration application is successfully received by the Market Operator, the status may be updated by the Market Operator to:

- 'Approved', i.e. the registration application is approved by the Market Operator, once accepted by all relevant reviewers (e.g. Market Operator, Transmission System Operator, Meter Data Provider);
- 'Declined', i.e. the registration application is denied; or

- 'Withdrawn', i.e. the registration application has been withdrawn (either by the applicant directly or is deemed withdrawn per the market rules).

4.3.1 TYPE 2 QUERY & SUBMISSION VIA THE I-SEM REGISTRATION SYSTEM

(Note: Type 3 interaction with the I-SEM Registration System will not be available for I-SEM Go-Live).

Type 2 submissions of registration data relate to "human-to-computer" interaction via the I-SEM Registration System. *Figure 2* below provides an overview of the steps required to submit registration data via Type 2.

Formatted: Font: Italic

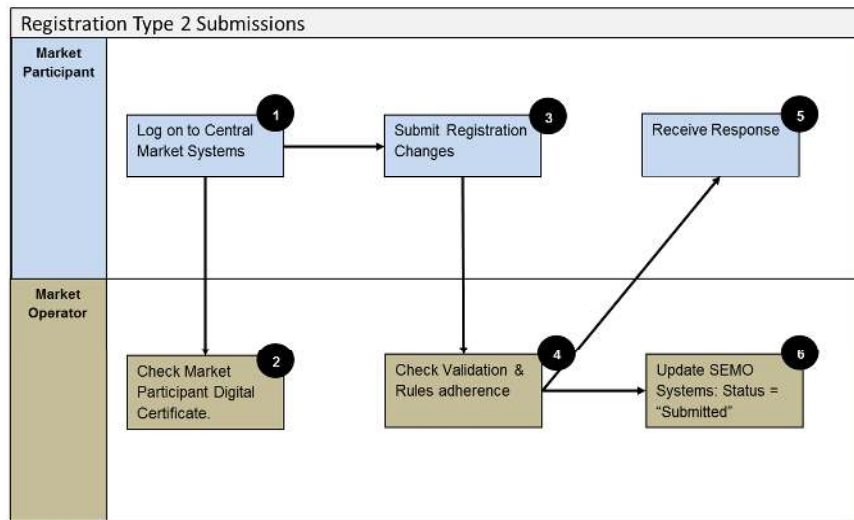

Figure 2: Registration Type 2 flow

Step 1: Participants log on to the I-SEM Registration System, using the Digital Certificate and application password as supplied to them by SEMO.

Step 2: The I-SEM Registration System verifies that the Digital Certificate and application password is correct and logs the Participant into the system.

Step 3: The Participant can view and edit their registration details. They must click on the 'Submit' button to submit changes to their registration details.

Step 4: The I-SEM Registration System ensures that the changes made are valid and adhere to the market rules (i.e. passed validations).

Step 5: The Participant receives a response from the I-SEM Registration System which indicates if the change has successfully submitted to the system or not.

Step 6: If the change has been successful, then the I-SEM Registration System updates the record to a status of 'Submitted'.

For registration data queries, steps 1 and 2 apply. Once a connection to the I-SEM Registration System is established, Participants can query any registration data by selecting the relevant

element group and/or sub-group (e.g. selecting the “Trading Site” element group will initiate a query of the data attributes relating to the Trading Site). Once an element group is selected, the relevant registration data for that element group is shown.

4.3.2 TYPE 3 QUERY & SUBMISSION VIA THE I-SEM REGISTRATION SYSTEM

(Note: Type 3 interaction with the I-SEM Registration System will not be available for I-SEM Go-Live).

Figure 3

Figure 3 provides a summary of how Participants may use Type 3 communication (i.e. computer-to-computer) to submit and query certain data via the I-SEM Registration System.

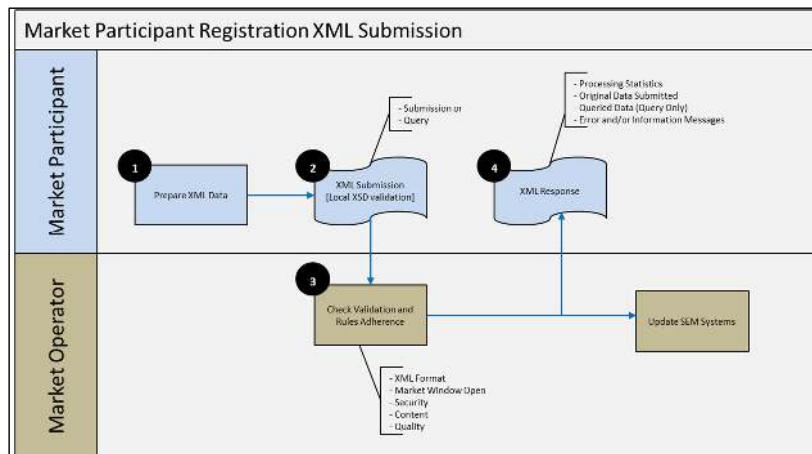

Figure 3: Registration Type 3 flow

Step 1: Participants prepare the XML Data. (Details on how this needs to be packaged, in terms of SOAP, WSDL, etc. are covered in the I-SEM Technical Specification, Volume B).

Step 2: Submissions or queries will be validated on the client (Participant) system to ensure compliance with the XML Schema rules, prior to submission.

Step 3: Once submitted, the Transaction is received by the I-SEM Registration System Interface and further validation checks, including business rules, are applied (see validations and sample XML for each transaction throughout this volume).

Step 4: If the Step 3 validations are successful, the Balancing Market Trading Interface accepts the submission as appropriate, and an XML response is issued to the Participant

- For submissions, if the Stage 3 validations are passed, the I-SEM Registration System is updated as appropriate (with a status of 'Submitted' for the submission) and an XML response is issued to the Participant. If the validations are unsuccessful, a response is issued detailing the error(s).
- For queries, if the Stage 3 tests are passed, the latest data set that qualifies for the range of Participant-supplied dates will be returned to the Participant User. This will include the Status associated with the relevant data.

Formatted: Font: Italic

Formatted: Don't keep with next

4.4 USER ACCESS MANAGEMENT

Section 4.4 of this document sets out the User Access roles and System Access types that are administered through the I-SEM Registration System by the Party Administrative User, on behalf of that registered Party.

Note: The I-SEM Technical Specification Volume B describes in more detail how the digital certificates and user application passwords are managed. Security aspects is not covered in Volume C.

4.4.1 USER ACCESS ROLES

There are three types of users that can be created within the I-SEM Registration System, enabling users to access to the Balancing Market Interface. Each role is unique, allowing the user type specific access rights within the Balancing Market Interface (I-SEM Registration System and Balancing Market Trading Interface). These roles are summarised below and in [Table 4](#).

- **Party Administrative User (PAU):** A user has to be a PAU to be able to create and/or modify other Users under the Party under which the PAU is registered.
- **Registration User (RU):** A user has to be a RU to be able to create, modify or view Participant and other related entities for all Participants under the relevant Party for which they are registered e.g. Resources, Bank Account, Trading Site, etc..
- **Other Subsystem User (OSU):** A User that is not set up as a PAU or a RU, but has System Access is called an Other System User. This user type is to permit access a number of sub-functions within the Balancing Market Trading Interface (e.g. Balancing Trading Balancing and Capacity Market Settlement etc). The OSU access is allocated at a Participant level, allowing the PAU to restrict access to an OSU on a jurisdictional basis, if required. Further information on system access is detailed in Section 4.6.7.

User Role	Create/Amend New Users ⁴	Submit/Query Registration ⁵	Other System Access
PAU	Y	N	N
RU	N	Y	N
OSU	N	N	Y

Table 4: User Access Roles

A User can be any combination of the above user types. A user with complete rights who can create new users, update/query registration data and access the Balancing Market Trading Interface must be set as a PAU, a RU and an OSU. A user can also have their role privileges updated at any time to a PAU, RU or OSU, only by submission by an approved PAU.

Authentication information is entered by the PAU and may subsequently updated by the user thereafter.

4.4.2 SYSTEM ACCESS

⁴ RU and OSU can view their own User information.

⁵ OSU & RU can only view Party information. Only a PAU or an RU can amend Party information.

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

System access is managed by the Party Administrative User and is allocated to each user at a Participant level. Users can be given "Read", "Write" or "No Access" to a number of subfunctions of the Balancing Market Interface, identified below;

- CRM_TRADER
- BAL_TRADER
- BAL_CRM_SETTLEMENT
- BAL_CRM_OTHER
- NEMO_AUCTION_TRADER
- NEMO_CONTINUOUS_TRADER

Table 5 offers an example of how each Access Type is applied in the context of a user with different access permissions to the Balancing Trader subfunction.

Formatted: Font: Italic

Access Type	Access Type Description
Read	If given "READ" access to "BAL_TRADER" subsystem for a Participant (PT_500900), the user will be able to retrieve their Balancing Market data.
Write	If given "WRITE" access to "BAL_TRADER" subsystem for a Participant (PT_500900), the user will be able to retrieve, add and modify their Balancing Market data.
No Access	If given "NO ACCESS" to "BAL_TRADER" subsystem for a Participant (PT_500900), the user will not be able to retrieve, add or modify their Balancing Market data.

Table 5: Access Type

Note: SEMOpX trading and Capacity Market trading access permissions will be captured within the System Access function within the I-SEM Registration System. However, trading for these markets will not be carried out through the Balancing Market Trading Interface. Information related to trading in the Ex-Ante and Capacity markets are set Volume D and Volume E respectively.

4.5 BALANCING MARKET REGISTRATION - QUERIES

This section provides the methods, elements and validations necessary for registration query.

4.5.1 REGISTRATION QUERY – METHODS & VALIDATIONS FOR COMMON ATTRIBUTES

Interface Name	I-SEM Reference	Methods	Interface Type	Submitted By
Registration – Query	INT-01	QUERY, SUBMIT	XML Type 2 & 3	Participants

Table 6: Registration Query Methods

4.5.2 REGISTRATION QUERY - ELEMENTS & VALIDATIONS

Name	Validation	Mandatory /Optional
PartyName	Must be a STRING Must be valid in combination with USER_NAME Must have system privileges to allow Registration access	Mandatory
Action	The default value of this attribute is "NORMAL" and need not to be submitted	Optional
Date	YYYY-MM-DD This attribute should be the relevant Trade Date. If specified, all records with specified date between StartDate and EndDate are retrieved	Optional
DateType	The default value of this attribute is "TRADE" and need not be submitted	Optional
RecordStatus	If specified, all records with specified status are retrieved	Optional

Table 7: Registration Query, elements and validations

4.6 VALIDATION AND XML DATASET EXAMPLES

The table below provides a description of the XML Dataset examples within this section.

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Dataset name	Description
Participant	Submit, approval and query of Participant general information
Participant Validity	Submit, approval, and query of Participant Status
Participant: Balancing Market data	Submit, approval, and query of Balancing Market data relating to a Participant
Participant: Capacity Market data	Submit, approval, and query of Market data relating to a Participant
Participant: NEMO data	Submit, approval and query of NEMO(SEMOpx) data relating to a Participant
User	Submit, approval, and query of general details relating to a user
User: system access	Submit & query of system access relating to a user
User: key contacts	Submit & query of key contacts relating to a user
User: authorisation	Submit & query of authorisations relating to a user
User: notifications	Submit & query of notifications relating to a user
Bank data	Submit, approval, and query of banking details relating to a Participant
Trading Site	Submit, approval and query of Trading Site details relating to a Participant.
Resource	Submit, approval and query of Resource general information
Resource Validity	Submit, approval and query of Resource Status
Resource: Balancing Market Data	Submit, approval, and query of Balancing Market data relating to a Resource
Resource: Capacity Market data	Submit, approval, and query of Capacity Market data relating to a Resource
Resource: NEMO data	Submit, approval and query of NEMO(SEMOpx) data relating to a Resource
Resource: Agent of Last Resort data	Submit, approval and query of Agent of Last Resort data relating to a Resource

Table 8: XML Datasets

Note: The same resource (Unit) identifier will be used for all market types, where applicable. However, there is provision for resources to be represented differently in each market. Further detail on resource types will be included within the relevant market codes and agreed procedures.

4.6.1 PARTICIPANT

The following table describes the field descriptions and validations for submitting a request to register a Participant and modifying existing Participant data.

4.6.1.1 PARTICIPANT GENERAL INFORMATION – DATA ELEMENTS AND VALIDATIONS

Name	Data Type	Validation	Mandatory/Optional
General Information			
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9-]" This field is non-editable and generated by the system upon initial submission based on the Participant Class and Jurisdiction.	n/a
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Participant Class	VARCHAR2 (2)	Must be a valid participant class and set to TRADING_PARTICIPANT (TP).	Mandatory
Company Name	VARCHAR2 (60)	String Type ⁶	Mandatory
Place of Establishment	VARCHAR2 (20)	String Type	Mandatory
VAT Region	VARCHAR2 (6)	Valid values: <ul style="list-style-type: none">EUNON_EU	Mandatory
VAT Registration Number	VARCHAR2 (32)	String Type	Mandatory
EIC Code	VARCHAR2 (16)	String Type	Optional
ACER Code	VARCHAR2 (12)	String Type	Optional
Jurisdiction	VARCHAR2 (6)	Valid values: <ul style="list-style-type: none">NIROI	Mandatory

⁶ Any field marked as "String Type" may use the full list of characters identified in Appendix A of this document, unless the character restriction is otherwise specified.

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Name	Data Type	Validation	Mandatory/Optional
		<ul style="list-style-type: none"> OTHER 	
Vat Status	VARCHAR2 (6)	Valid values: <ul style="list-style-type: none"> EXEMPT NON_EXEMPT 	Optional
Remit Reporting	CHAR(1)	If submitted, must be true or false. ('T' or 'F') Default is false = 'F'	Optional
Open Cash Collateral Account	CHAR(1)	If submitted, must be true or false. ('T' or 'F') Default is false = 'F'	Optional
Cash Collateral Account Status	VARCHAR2 (2)	Valid values: <ul style="list-style-type: none"> COMPLETE (C) INCOMPLETE (I) NA This field is entered by the Market Operator only.	Optional
Application reference	NUMBER(18)	System generated unique reference assigned for each application change cycle. This field is non-editable and returned upon query: <unique_numeric_sequence_ upto_18_digits>	N/A
Record Status	VARCHAR(15)	The default value is "SUBMITTED" and need not be submitted.	N/A
Company Address Information			
Care of	VARCHAR2 (50)	String Type	Optional
Address Line 1	VARCHAR2 (128)	String Type	Mandatory

4.6.2 PARTICIPANT VALIDITY

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for Participant Validity and sample XMLs for reference.

4.6.2.1 PARTICIPANT VALIDITY – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations for Participant Validity. This can be used to query the status of the Participant or Party. There are three possible states: "Registered", "Deregistered", and "Suspended".

Name	Data Type	Validation	Mandatory/Optional
General Information			
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9_]*/>"	Mandatory
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Participant State	VARCHAR(1)	Set to REGISTERED (R) upon approval by the Market Operator.	Mandatory
Application reference	NUMBER(18)	System generated unique reference assigned for each application change cycle. This field is non-editable and returned upon query: <unique_numeric_sequence_up_to_18_digits>	N/A
Record Status	VARCHAR(15)	The default value is "SUBMITTED" and need not be submitted.	N/A
Comments			
Text box	VARCHAR2 (256)	String Type	Optional

Table 10: Participant Validity - Data Elements and Validations

4.6.2.2 PARTICIPANT VALIDITY – SAMPLE XML

The figures below are sample XMLs relating to the submission, approval and querying of Participant Validity.

4.6.4 PARTICIPANT: CAPACITY MARKET DATA

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for Participant Capacity Market data and sample XMLs for reference.

4.6.4.1 PARTICIPANT: CAPACITY MARKET DATA – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations required for making a Participant active in the Capacity Market.

Name	Data Type	Validation	Mandatory/Optional
General Information			
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9-]" />	
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Application reference	NUMBER(18)	System generated unique reference assigned for each application change cycle. This field is non-editable and returned upon query: <unique_numeric_sequence_ upto_18_digits>	N/A
Record Status	VARCHAR(15)	The default value is "SUBMITTED" and need not be submitted.	N/A
Attachments			
PT CRM Additional document	Attachment	If submitted then up to 5 attachments allowed for this type.	Optional
Comments			
Text box	VARCHAR2 (256)	String Type	Optional

Table 12: Participant Capacity Market - Data Elements & Validations

4.6.4.2 PARTICIPANT: CAPACITY MARKET DATA – SAMPLE XML

The figures below are sample XMLs relating to the submission, approval and querying of Participant Capacity Market data.

The image shows a sample XML document for submitting participant capacity market data. The XML is in UTF-8 encoding and uses the schema location 'mpr-isem.xsd'. It contains a single element 'RegistrationData' with a namespace 'xsi:noNamespaceSchemaLocation'. Inside 'RegistrationData', there is a 'RegistrationApproval' element with attributes 'PartyRole' set to 'MARKET_OPERATOR' and 'PartyName' set to 'PY_NAME'. The 'RegistrationApproval' element contains a 'ParticipantCrm' element with attributes 'Action' set to 'APPROVED', 'TransactionId' set to '99999', and 'ParticipantName' set to 'PT_NAME'. The 'ParticipantCrm' element contains a 'Comments' element with the text 'Additional comments, if any.'.

Figure 13: Participant: Capacity Market (Submit)

The image shows a sample XML document for approving participant capacity market data. The XML is in UTF-8 encoding and uses the schema location 'mpr-isem.xsd'. It contains a single element 'RegistrationData' with a namespace 'xsi:noNamespaceSchemaLocation'. Inside 'RegistrationData', there is a 'RegistrationApproval' element with attributes 'PartyRole' set to 'MARKET_OPERATOR' and 'PartyName' set to 'PY_NAME'. The 'RegistrationApproval' element contains a 'ParticipantCrm' element with attributes 'Action' set to 'APPROVED', 'TransactionId' set to '99999', and 'ParticipantName' set to 'PT_NAME'. The 'ParticipantCrm' element contains a 'Comments' element with the text 'Additional comments, if any.'.

Figure 14: Participant: Capacity Market (Approval)

The image shows a sample XML document for querying participant capacity market data. The XML is in UTF-8 encoding and uses the schema location 'mpr-isem.xsd'. It contains a single element 'RegistrationData' with a namespace 'xsi:noNamespaceSchemaLocation'. Inside 'RegistrationData', there is a 'RegistrationQuery' element with attributes 'RecordStatus' set to 'APPROVED', 'DateType' set to 'TRADE', 'Date' set to '2016-01-01', and 'Action' set to 'NORMAL'. The 'RegistrationQuery' element contains a 'ParticipantCrm' element with attribute 'ParticipantName' set to 'PT_NAME'.

4.6.8 USER: KEY CONTACTS

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for User Key Contacts data and sample XMLs for reference.

4.6.8.1 USER: KEY CONTACTS – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations for registering User Key Contact data and modifying existing User Key Contact data. This function allows the Party Administrative User to nominate specific key contacts pertaining to different markets, or sub functions within those markets (e.g. Balancing Market Trading, Balancing and Capacity Market Settlement).

Name	Data Type	Validation	Mandatory/Optional
User Name	VARCHAR2 (16)	String Type "[A-Z_0-9-]*"/>	Mandatory
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9-]*"/>	Mandatory
Key ContactType	VARCHAR2 (50)	MAIN_CONTACT REGISTRATION BALANCING_TRADING CAPACITY_TRADING SETTLEMENT PAYMENTS CREDIT_COVER	Mandatory
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Opt out of Standard Notification	CHAR(1)	If submitted, must be true or false. ('T' or 'F') Default is false = 'F'	Optional

Table 16: User Key Contacts - Data Elements & Validations

4.6.8.2 USER: KEY CONTACTS – SAMPLE XML

The figures below are sample XMLs relating to the submission and querying of User Key Contacts data.

4.6.9 USER: AUTHORISATION

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for User Authorisation data and sample XMLs for reference.

4.6.9.1 USER: AUTHORISATION – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations for registering Authorised Persons and modifying existing Authorised Person data. This function allows the Party Administrative User to nominate specific Authorised Persons permitted to authorise specific ad hoc offline processes on behalf of the Participant.

Name	Data Type	Validation	Mandatory/Optional
User Name	VARCHAR2 (16)	String restricted to "[A-Z_0-9-]*"	Mandatory
Participant Name	VARCHAR2 (12)	String restricted to "[A-Z_0-9-]*"	Mandatory
Authorisation Type	VARCHAR2 (50)	SUBMIT_SETTLEMENT_QUERY_AND_RAISE_DISPUTE DECLARE_LIMITED_COMMUNICATION_FAILURE REQUEST_COLLATERAL_REFUND	Mandatory
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Secondary Signatory	VARCHAR2 (256)	String Type	Mandatory

Table 17: User Authorisations - Data Elements & Validations

4.6.13 RESOURCE

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for Resource data and sample XMLs for reference.

4.6.13.1 RESOURCE: GENERAL – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations for submitting a request to register a Resource (Unit) and modifying existing resource data. Resource general information must be present before a Unit can be registered to participate in the Balancing Market, Capacity Market or EirGrid/SONI SEMOpX (Ex-Ante) markets

Name	Data Type	Validation	Mandatory/Optional
General Information			
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9\-\"]"/>	Mandatory
Resource Name	VARCHAR2 (12)	String Type "[A-Z_0-9\-\"]"/> Does not need included on first submission, generated by the system.	Mandatory
Resource Type	VARCHAR2 (3)	Valid values: <ul style="list-style-type: none">• GENERATOR (GEN)• DEMAND_SIDE_UNIT (DSU)• ASSETLESS_TRADING_UNIT (AU)• TRADING_UNIT (TU)• EXTERNAL_UNIT (EU)• SUPPLIER_UNIT (SU)• INTERCONNECTOR (IU)• CAPACITY_AGGREGATION_UNIT (CAU)• INTERCONNECTOR_ERROR_UNIT (IEU)• INTERCONNECTOR_RESIDUAL_CAPACITY_UNIT (IRCU)	Mandatory
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Name	Data Type	Validation	Mandatory/Optional
Jurisdiction	VARCHAR(32)	Valid values: <ul style="list-style-type: none"> ROI NI 	Mandatory
Associated Unit	VARCHAR(32)	Optional Field. Must be a valid Resource Name under the same jurisdiction.	
Assetless Unit Subtype	CHAR(4)	Optional Field. If submitted, then it must be one of the following values; <ul style="list-style-type: none"> CCPS CCPT SA This field is only applicable to Resource Type AU.	
Acting as Intermediary	CHAR(1)	If submitted, must be true or false. ('T' or 'F') This field can be checked only if the Resource Type is GEN or DSU.	Optional
EIC Code	VARCHAR2 (16)	String Type This field must not be submitted for Resource Types SU and CAU.	Optional
Fee Submitted	CHAR(1)	If submitted, must be true or false. ('T' or 'F') This field can be checked only if the Resource Type is GEN, DSU, AU, TU, SU and EU.	Optional
Collateral Amount	NUMBER (6,2)	If submitted, must be a NUMBER (min 0 - max 999999.99) <i>Note: This field is entered by the Market Operator, only.</i>	Optional
Contract Data Provider	VARCHAR2(64)	StringType	Optional
Application Reference	NUMBER(18)	System generated unique reference assigned for each application change cycle. This field is non-editable and returned upon query: <unique_numeric_sequence_upto_18_digits>	N/A
Record Status	VARCHAR2(15)	The default value is "SUBMITTED" and need not be submitted.	N/A
Station Information - Applicable only for Resource Types GEN, DSU and IU			
Station Name	VARCHAR2 (16)	String Type	Mandatory
Station ID	VARCHAR2 (32)	String Type	Optional
Address Line 1	VARCHAR2 (128)	String Type	Mandatory
Address Line 2	VARCHAR2 (128)	String Type	Optional
License Information - Applicable only for Resource Types GEN, DSU, AU and SU			
Exemption from Licence	CHAR(1)	If submitted, must be true or false. ('T' or 'F') Default is False = 'F'	Optional
License ID	VARCHAR2 (24)	String Type If Exemption from Regulatory License is unchecked then it is a mandatory field.	Optional
License Effective Date	Date	If submitted, must be YYYY-MM-DD	Optional
Attachments			
RES Collateral Data	Attachment	At least one attachment for this type is mandatory. Up to 5 attachments allowed for this type.	Mandatory
Comments			
Text Box	VARCHAR2 (256)	String Type	Optional

4.6.15 RESOURCE: BALANCING MARKET DATA

This section addresses the data elements and validations used within the I-SEMI-SEM Registration System for Resource Balancing Market data and sample XMLs for reference.

4.6.15.1 RESOURCE: BALANCING MARKET DATA – DATA ELEMENTS AND VALIDATIONS

The following table describes the field descriptions and validations required for registering a Unit to participate in the Balancing Market, or for modifying existing Balancing Market data for a Unit. Resource general information set out in Section 4.6.13 must be present before a Unit can be registered to participate in the Balancing Market.

Name	Data Type	Validation	Mandatory/Optional
General Information			
Participant Name	VARCHAR2 (12)	String Type "[A-Z_0-9\~]*"/>	Mandatory
Resource Name	VARCHAR2 (12)	String Type "[A-Z_0-9\~]*"/>	Mandatory
Resource Type	VARCHAR2 (3)	Valid values: <ul style="list-style-type: none">• GENERATOR (GEN)• DEMAND_SIDE_UNIT (DSU)• ASSETLESS_TRADING_UNIT (AU)• TRADING_UNIT (TU)• EXTERNAL_UNIT (EU)• SUPPLIER_UNIT (SU)• INTERCONNECTOR (IU)⁷• CAPACITY_AGGREGATION_UNIT (CAU)• INTERCONNECTOR_ERROR_UNIT (IEU)• INTERCONNECTOR_RESIDUAL_CAPACITY_UNIT (IRCU)	Mandatory
Start Date	Date	Must be YYYY-MM-DD	Mandatory
End Date	Date	If submitted, must be YYYY-MM-DD	Optional
Fuel Type	VARCHAR(22)	Valid values: <ul style="list-style-type: none">• BATTERY_STORAGE• BIOMASS• COAL• COMBINED_HEAT_POWER• COMPRESSED_AIR_STORAGE• DISTILLATE• FLY_WHEEL• GAS• HYDRO• MULTI_FUEL• NUCLEAR• OIL• PEAT• PUMP_STORAGE• SOLAR• WIND• OTHER	Optional
Dispatchable	CHAR(1)	Must be true or false. ('T' or 'F') Must be submitted for Resource Type GEN and DSU. <u>Must be true for Resource Type DSU.</u> <u>Must be true for Fuel Type BATTERY_STORAGE and PUMP_STORAGE.</u>	Mandatory
Priority Dispatch	CHAR(1)	Must be true or false. ('T' or 'F') Must be submitted for Resource Type GEN and DSU.	Mandatory
Energy Limited	CHAR(1)	Must be true or false. ('T' or 'F') Must be submitted for Resource Type GEN.	Mandatory

⁷ Used to represent the Interconnector

4.6.15.2 RESOURCE: BALANCING MARKET DATA – SAMPLE XML

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

The figures below are sample XMLs relating to the submission, approval and querying of Resource Balancing Market data.

The XML document is a submission for resource balancing. It includes a root element with a namespace declaration. The document contains several nested elements, including a header section with metadata and a main section for resource balancing data. Red annotations highlight specific fields and their requirements, such as mandatory attributes, valid values, and comments. The document is structured to provide detailed information about the resource balancing process, including the submission of data for various resources and the approval of the submission.

Figure 42: Resource: Balancing (Submit)

The XML document is an approval for resource balancing. It includes a root element with a namespace declaration. The document contains several nested elements, including a header section with metadata and a main section for resource balancing data. Red annotations highlight specific fields and their requirements, such as mandatory attributes, valid values, and comments. The document is structured to provide detailed information about the resource balancing process, including the approval of the submission.

5 BALANCING MARKET TRADING

5.1 INTRODUCTION

The transactions covered in this section relate to trading in the Balancing Market and are summarised as follows:

Transaction Type	Principal Element(s)	Content
Commercial Offer Data (Generators)	forecast fuel_use pump_storage_detail battery_storage_detail energy_limit_detail cod_detail – "complex" cod_detail – "simple"	Forecast Availability Fuel Usage indicators Pumped Storage Unit parameters Battery Storage parameters Energy Limited Unit parameters Complex Commercial Offer Data Simple Commercial Offer Data
Commercial Offer Data (Demand Side Units)	forecast cod_detail – "complex" cod_detail – "simple"	Forecast Availability Complex Commercial Offer Data Simple Commercial Offer Data
Technical Offer Data	sem_gen_technical_offer sem_dem_technical_offer	Technical Offer Data for Generators Technical Offer Data for Demand Side Units
VTOD Choice	sem_gen_technical_offer_choice	VTOD choice (sets 1-6)
Physical Notifications	sem_pn_submit	PN submission (start time/mw and end time/mw; Unit Under Test flag where PN is associated with proposed period of testing)

Table 27: Trading Transactions

This section describes the submission and retrieval of trading data via the I-SEM Balancing Market Interface, via Type 3. In order to submit such data, a Participant must:

1. establish a connection to the I-SEM Balancing Market Interface using a valid Digital Certificate; and
2. submit the relevant Balancing Market trading data to the Balancing Market Trading Interface.

Upon receipt of a submission of Balancing Market trading data to the Balancing Market Trading Interface, the content of the submission will be validated. Each submission will receive a response, which will give information messages on the success or failure of the submission and its constituent elements.

The Balancing Market Trading Interface also provides capability to retrieve trading data for the Participant and/or its Units (and associated Trading Sites), using the "market_query" method.

5.2 TYPE 3 SUBMISSION STRUCTURE

In general, the structure of each Type 3 submission is summarised as follows:

- submission or query element (e.g. "market_submit", "market_query"), which:
 - determines if the submission relates to data submission or query;
 - always contains common elements, as set out below in this section; and
 - determines the validity of the submission or query.
- external_id, which is a Participant-defined field which is returned in the web service response message. The external_id has no functional effect in the I-SEM Systems and does not need to be submitted.
- Transaction-specific element(s), for example:
 - sem_pn_submit contains a PN submission for a Unit.

Table 28 contains the common attributes that apply to both "market_submit" and "market_query" submissions via Type 3 interface. Details of common attributes required for reporting are covered in Section 6.4.1.1.

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard / Soft	Submission	Query
application_type	Specific application request type.		H	Mandatory	Mandatory
	Must be "BM".		H		
trading_date, date	YYYY-MM-DD		H	Mandatory	Mandatory
	There are different validation rules based on the message type, which are detailed in each individual message section below.				
standing_flag	Indicates if the bid request is for a normal or for a standing bid.		H	**See details elsewhere in this document for each individual submission transaction	**See details elsewhere in this document for each individual query transaction
	Must be TRUE or FALSE				
	There are different validation rules based on the message type, which are detailed in each individual message section below.				
participant_name, user_name	Must be STRING.		H	Mandatory	Mandatory
	Must be valid in combination with user_name.	Invalid combination of participant_name {0} and user_name {1} for trading_date {2}.	H		
	Must have system privileges to allow Market Trading.	The user_name {0} for participant_name {1} does not have system access privileges to participate in Market Trading for trading_date {2}.	H

Table 28: Common Type 3 submission attributes and validations

5.3 MARKET INTERFACE DATA SUBMISSION PROCESS

5.3.1 MARKET INTERFACE DATA SUBMISSION OVERVIEW

Section 5.3 sets out the structure of each Type 3 submission or query transaction for the Balancing Market Interface. *Figure 54* summarises the process by which Type 3 submission/queries are prepared and submitted.

Formatted: Font: Italic

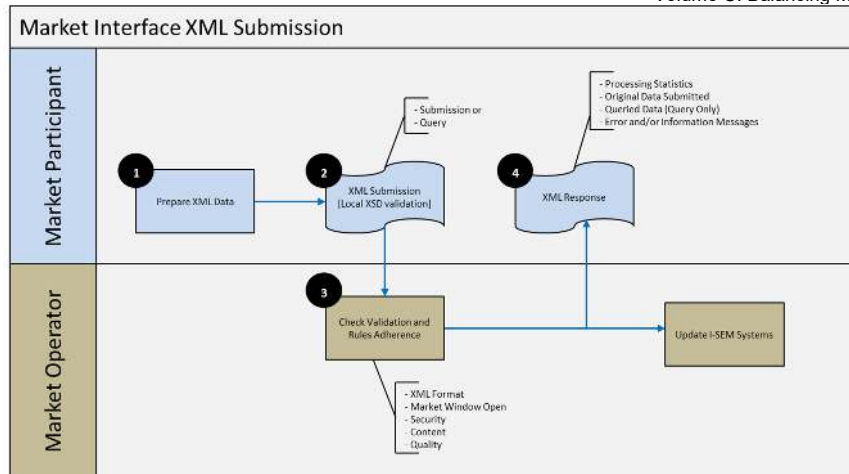

Figure 54: Balancing Market Trading Interface, processing overview

- **Step 1:** Participants prepare the XML Data. (Details on how this needs to be packaged, in terms of SOAP, WSDL, etc. are covered in the I-SEM Technical Specification, Volume B);
- **Step 2:** Submissions or queries will be validated on the client (Participant) system to ensure compliance with the XML Schema rules, prior to submission;
- **Step 3:** Once submitted, the Transaction is received by the Balancing Market Trading Interface and further validation checks, including business rules, are applied (see validations and sample XML for each transaction throughout this volume);
- **Step 4:** If the Step 3 validations are successful, the Balancing Market Trading Interface accepts the submission as appropriate, and an XML response is issued to the Participant. If the tests are unsuccessful, a response is issued detailing the errors.

Each submission may contain multiple submissions in a single Transaction (e.g. a single submission may contain submission of Forecast Availability and Commercial Offer Data).

As set out in [Table 28: Common Type 3 submission attributes and validations](#) each transaction must contain required common elements.

Each Transaction has a Gate Window associated with its submission:

- When a Gate Window is opened, this signifies the start of the period of time within which the Participant may submit data to be accepted and used in the associated Trading Window.
- When a Gate Window is closed, this signifies the end of the period of time in which any Participant Data submissions relating to the associated Trading Window is accepted.

Section 5.3.2 sets out the Trading Periods that define each Trading Window. Section 5.3.3 defines the Gate Windows that apply to the submission of each transaction required for each Trading Window.

5.3.2 TRADING WINDOWS

[Table 29](#) sets out the set of Trading Periods that comprise each Trading Window. A Trading Window defines those Trading Periods in a Trading Day whereby transactions may be submitted (e.g. Commercial Offer Data, Technical Offer Data, or Physical Notification Data), as

Formatted: Font: Italic

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

applicable. There are normally 48 Trading Windows in each Trading Day (although for long and short days there will be 50 or 46 Trading Windows respectively).

Trading Window	Start of Trading Window ¹⁵	End of Trading Window
TW1	Trading Period commencing at 23:00 on the Trading Day	Trading Period commencing at 22:30 on the day on which the Trading Day ends
TW2	Trading Period commencing at 23:30 on the Trading Day	Trading Period commencing at 22:30 on the day on which the Trading Day ends
TW3	Trading Period commencing at 00:00 on the Trading Day	Trading Period commencing at 22:30 on the day on which the Trading Day ends
....
TW48	Trading Period commencing at 22:30 on the Trading Day	Trading Period commencing at 22:30 on the day on which the Trading Day ends

Table 29: Trading Window definitions

5.3.3 GATE WINDOWS (DATA SUBMISSION TIMINGS)

Table 30 shows the submission timings (i.e. applicable Gate Windows) in respect of each of the Balancing Market transactions.

Formatted: Font: Arial

Table 30: Data Submission Gate Windows

5.3.4 DEFAULT AND TRADING DAY “COMPLEX” COMMERCIAL OFFER DATA & FORECAST AVAILABILITY

For Complex Commercial Offer Data and Forecast Availability data see Section 5.5.2 and Section 5.5.3. Default Data applies and a daily Gate Open event takes place which converts Default Data to Trading Day data (i.e. always ensures data for these datasets is available). The process for Default Data conversion is further set out in Section 5.3.4.1. Once converted, data for these datasets can be superseded by any updated submission of data for the corresponding Trading Day, or for a defined set of Trading Windows for the Trading Day, as outlined in Table 30.

Formatted: Font: Arial

5.3.4.1 STANDING (DEFAULT) DATA

Standing Data (also called Default Data) is converted to Trading Day Data at the time of Gate Window opening. This conversion process populates the operational “Complex COD” data with the

¹⁵ All times in this table are in “Local Time”

¹⁶ All times in this table are in “Local Time”

Standing Data for the Trading Day that is 19 days in the future. Participants can update these values until the Gate Window closes (timings specified above). The following notes apply to Standing Data:

- Standing Data can be created at any time.
- As part of Unit Registration, one set of data is entered by the Participant with a parameter of "ALL" (i.e. valid for all days). There is no expiration date for type "ALL", as Default Data (see below) is always required for use by the I-SEM Systems.
- Standing Data applies to the following data only:
 - Complex Commercial Offer Data; and
 - Forecast Availability, Forecast Minimum Stable Generation and Forecast Minimum Output.
- After Communication Channel Qualification – i.e. once access to the system is granted, Participants must update the Standing Data (type "ALL").
- Participants may also submit Standing Data for specific day types (SUN, MON, ..., SAT). These have an optional expiration date.
- If an expiration date is used, the data will be used daily and up until the expiration date (inclusive).
- If no expiration date is given, the data will be used indefinitely, or until the Participant supersedes the specific day type data.
- Updated Standing Data will be used in the next Gate Window opening (i.e. will be used for Trading Days that are at least 19 days in the future).
- During each Gate Window opening, if there is Standing Data for both "specific day type" and "ALL", the system will use the "specific day type" rather than the "ALL" type.

5.3.4.2 TRADING WINDOW DATA

Standing Data will be converted to Trading Window Data at Gate Window opening (and must always be present for type "ALL"). Any subsequent data submission in the Gate Window (i.e. whilst the Gate Window is open) will supersede the Trading Window Data, if it passes validations. The communication mechanism during data submission is synchronous, that is the Participant submits the data and waits for the response from the Web Server.

For each Unit, the use of Trading Day Data, pre-populated by Standing Data, ensures that there is always valid (or Default) data for the following:

- Complex Commercial Offer Data; and
- Forecast Availability, Forecast Minimum Stable Generation and Forecast Minimum Output.

Participants have the ability to revise Trading Day Data as many times as necessary within the appropriate Gate Window. Trading Day Data submissions will be validated and processed upon receipt, and the Participant will be informed of the results of validation and processing synchronously.

5.4 MESSAGE VALIDATION AND SAMPLE XML

In the following sections, the validation applicable to each message type and the corresponding response messages are specified. Also included are sample XML files of Submit and Query submissions.

Notes:

1. *In the Validation Message column, variables to be included in the message are represented by {0}, {1}, {2}, etc.*
2. *The last two columns of the tables within this section indicate whether the field is relevant for a Submission or Query and, if relevant, whether the field is mandatory, optional or not applicable.*

5.5 COMMERCIAL OFFER DATA

Generator Offers and Demand Offers (i.e. offers for Demand Side Units) in the I-SEM may comprise the following transactions:

- “Simple” Commercial Offer Data, which is comprised of:
 - Up to 10 Incremental price/quantity pairs; and
 - Up to 10 Decremental price/quantity pairs.
- “Complex” Commercial Offer Data, which is comprised of:
 - Up to 10 Incremental price/quantity pairs;
 - Up to 10 Decremental price/quantity pairs;
 - Up to three start-up costs (hot, warm, cold) for Generators or one shut-down cost for Demand Side Units; and
 - No Load Cost for Generator Units.
- Forecast Availability, Minimum Stable Generation and Minimum Output profiles; and
- Specific parameters for Pumped Storage Units, [Battery Storage Units](#) and Energy Limited Units (i.e. not applicable for any other type of Unit).

5.5.1 SIMPLE COMMERCIAL OFFER DATA

“Simple” Commercial Offer Data is primarily used by the Transmission System Operator to determine actions / dispatch instructions (e.g. Generator/Demand Side Unit commitment and/or output changes) which occur once the Gate Window has closed (e.g. one hour ahead of each Trading Period). “Simple” Commercial Offer Data may be submitted for any subset of Trading Periods within a given Trading Window.

Note: where “simple” Commercial Offer Data is required and has not been submitted, the Inc/Dec elements of the Complex Commercial Offer Data will be used as the “simple” Commercial Offer Data.

5.5.2 COMPLEX COMMERCIAL OFFER DATA

“Complex” Commercial Offer Data is used to determine TSO actions / dispatch instructions which occur prior to the Gate Window closure for a given Trading Window. “Complex” Commercial Offer Data may be submitted at any time up to the Gate Window closure time for a Trading Window, but will apply in all Operational Schedule Runs for the entire Optimisation Time Horizon containing the Trading Window.

Complex offers (i.e. Complex Commercial Offer Data) are initially created by the conversion of standing bids at the opening of the relevant Gate Window (e.g. 12:00 on the day, 19 days prior to the start of the relevant Imbalance Settlement Period).

5.5.3 FORECAST AVAILABILITY DATA

Forecasts of availability (at an Imbalance Settlement Period) granularity are required for Generator Units and Demand Side Units, containing:

- Forecast Availability;
- Forecast Minimum Stable Generation; and
- Forecast Minimum Output.

5.5.4 UNIT-SPECIFIC PARAMETERS

As part of Generator Offers, various Unit-Specific parameters (specified below) may be submitted for Pumped Storage Units, Battery Storage Units and Energy Limited Units.

5.5.5 GENERATOR OFFERS

5.5.5.1 GENERATOR OFFERS - METHODS

Element	Requirement
market_submit	Mandatory if submit request
market_query	Mandatory if query request

Table 31: Generator Offers – Methods

5.5.5.2 GENERATOR OFFERS - DATA ELEMENTS AND VALIDATIONS

Name	Validation	Validation Message	Hard / Soft	Submission	Query
market_submit Element					
participant_name ^{††}	The "participant_name" attribute is mandatory and the Participant should be registered in the I-SEM. It should not be more than 12 characters.	The user_name {0} for participant_name {1} does not have system access privileges to participate in Market Trading for trading_date {2}.	H	Mandatory	Mandatory
sem_gen_offer Element (mandatory)					
trading_date, standing_flag	When the standing flag is false, the Trading Window must be open.	Market Window for normal bid is not open for trading_date {0} and application_type {1}	H	Mandatory	Optional
	When the standing flag is false, the status of the trading_date gate must be set to "Open".	An error occurred when fetching data from the cm_market table for trading_date {0}	H	Mandatory	Not Applicable
	When the standing_flag is false, the trading date must be for past 7 days, current date and future 19 days.	The trading_date {0} is invalid. It must fall within the past {1} days and future {2} days		Not Applicable	Mandatory
	When the standing flag is true and day type is SUN, MON, TUE, WED, THU, FRI or SAT, the valid trade_date must be greater than or equal to the max(market_date with current state as "OPEN") + 1 day.	Invalid trading_date {0}. The trading_date must be greater than or equal to {1} for standing bid with day type as {2}	H	Mandatory	Not Applicable
	When the standing flag is true and day type is ALL: For an existing standing bid, the valid trade_date must be equal to the max (market_date with current state as "OPEN") + 1 day. For a new standing bid, the valid trade_date must be greater than or equal to max(market_date with current state as "OPEN") + 1 day.	No record in cm_market table Invalid trading_date {0}. The trading_date must be equal to {1} for an existing standing bid with day type as ALL. Please contact a Market Operator for clarification and assistance Invalid trading_date {0}. The trading_date must be greater than or equal to {1} for a new standing bid with day type as ALL	H	Mandatory	Not Applicable

^{††} This is the PT_xxxxx identifier as is used in the current SEM.

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard / Soft	Submission	Query
standing_flag, standing	If the Standing Flag is equal to true, Standing must exist.	Standing Element must be present when standing_flag is set to true	H	Mandatory	Not Applicable
	If the standing element is present, the standing flag must be true.	The standing_flag must be set to true when Standing Element is present	H	Mandatory	Mandatory
resource_name	Must be valid Resource and belong to the Participant.	The resource name {0} is invalid	H	Mandatory	Optional
version_number	Must be "1.0"		H	Mandatory	Mandatory
Standing Element (mandatory if standing_flag=true) (only applicable for Forecast and Complex COD)					
expiry_date	YYYY-MM-DD			Optional	Not Applicable
	Must be in the future.	The expiry_date {0} must be in the future			
	Must be greater than or equal to the Trading Date.	The expiry_date {0} must be greater than or equal to trading_date {1}			
	Only applicable if the day type is SUN, MON, TUE, WED, THU, FRI or SAT.				
	Not required when DAY_TYPE is "ALL".	The expiry_date attribute must not present when day type is ALL		Not Applicable	
day_type	If STANDING_FLAG is TRUE then must be MON, TUE, WED, THU, FRI, SAT, SUN or ALL. If a standing bid is in place with DAY_TYPE=ALL, then no other DAY_TYPE bids can be submitted. If there is a standing bid with DAY_TYPE other than "ALL", then no further bid with DAY_TYPE=ALL can be submitted.	Submitted Standing Data with type {0} conflicts with existing Standing Data with type {1} for trading_date {2}		Optional	Optional
Identifier Element (optional)					
external_id	Must be STRING.			Optional	Not Applicable
Fuel Use Flag Element (optional)					
type	If there is a fuel_use element with type attribute value as "SECONDARY", then the unit must be registered as a dual fuel unit	Message detail to be included later in the implementation phase		Optional	Not Applicable
start_time	Must be the beginning of a Trading Period e.g. Must be of form '2016-10-31T13:30:00'	Message detail to be included later in the implementation phase		Optional	Not Applicable
end_time	Must be the end of a Trading Period (inclusive), e.g. Must be of form '2016-10-31T13:30:00'	Message detail to be included later in the implementation phase		Optional	Not Applicable
Forecast Element (optional submission in Generator Offer, mandatory if standing_flag is "true") The following Generator Units need to provide Forecast Availability, Forecast Minimum Stable Generation and Forecast Minimum Output: <ul style="list-style-type: none">Dispatchable Generator Units;Dual Rated Generator Units;Pumped Storage Units;Battery Storage Units;Dispatchable Priority Dispatch Units;Non-Priority Dispatch Renewable Units;Energy Limited Units; andZero Cost Dispatchable Units For all Forecast submissions (Maximum Availability, Minimum Stable Generation and Minimum Output), header includes an identifier of the Trading Day to which the submission relates. The forecast details are a part of the gen_detail element					
Gen_detail Element: start_time	Must be the beginning of a Trading Period e.g. Must be of form '2016-10-31T13:30:00'	Message detail to be included later in the implementation phase	H	Mandatory	Not Applicable

	Must be less than or equal to operational maximum storage quantity	<i>Message detail to be included later in the implementation phase</i>	H	Optional	Not applicable
Energy Limit Parameters (mandatory if Energy Limited)²⁰. This is a part of cod_complex_detail element					
limit_mwh	Must be between 999999.99 and -999999.99.			Mandatory	Not Applicable
COD detail (optional), with type parameter "SIMPLE or "COMPLEX" <ul style="list-style-type: none"> The cod_detail element allows submission of 'simple' and 'complex' Commercial Offer Data (including separate Inc and Dec curves), which is separately treated in the Balancing Market Systems. The cod_simple_details allows submission of 'simple' Commercial Offer Data which has separate Inc and Dec Curves. This element allows submission of multiple simple offers for the same trading day. 'simple' and 'complex' elements may be submitted in the same transaction. Simple' Data - If Incs/Decs are not submitted for a particular Trading Period, the system will use the corresponding Incs/Decs from their 'Complex' offers inc_curve_detail element - Can contain up to 10 price/quantity pairs. This element will be required for Dispatchable Generator Units.					

¹⁸ Registered maximum storage quantity data element is detailed in section 4.6.15, Resource: Balancing Market Data.

¹⁹ Registered minimum storage quantity data element is detailed in section 4.6.15, Resource: Balancing Market Data.

²⁰ As in the current-previous market (SEM), energy limits must be submitted to cover the entire Trading Day (see Trading and Settlement Code, clause 1.3D). As a result, Energy Limit start and stop times have been removed for I-SEM. The Energy Limit Factor is relevant for the SEM as it is used to calculate the portion of the Energy Limit that applies in the Ending Overlap Optimisation Period. As the Ending Overlap Optimisation Period concept is not relevant for I-SEM, it is not required in submissions.

5.5.6 DEMAND OFFERS

This section relates to Commercial Offer Data for Demand Side Units.

5.5.6.1 DEMAND OFFERS - METHODS

Element	Requirement
market_submit	Mandatory if submit request

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

market_query	Mandatory if query request
--------------	----------------------------

Table 33: Demand Offers - Methods

5.5.6.2 DEMAND OFFERS - DATA ELEMENTS AND VALIDATIONS

Name	Validation	Validation Message	Hard / Soft	Submission	Query
market_submit Element					
participant_name	The "participant_name" attribute is mandatory and the Participant should be registered in the I-SEM. It should not be more than 12 characters.	The user_name {0} for participant_name {1} does not have system access privileges to participate in Market Trading for trading_date {2}.	H	Mandatory	Mandatory
sem_demand_offer Element (mandatory)					
trading_date, standing_flag	When the standing flag is false, the Market Window must be open.	Market Window for normal bid is not open for trading_date {0} and application_type {1}	H	Mandatory	Optional
	When the standing flag is false, the status of the trading_date gate must be set to "Open".	An error occurred when fetching data from the cm_market table for trading_date {0}	H	Mandatory	Not Applicable
	When the standing_flag is false, the trading date must be for past 7 days, current date and future 19 days.	The trading_date {0} is invalid. It must fall within the past {1} days and future {2} days		Not Applicable	Mandatory
	When the standing flag is true and day type is SUN, MON, TUE, WED, THU, FRI or SAT, the valid trade_date must be greater than or equal to the max(market_date with current state as "OPEN") + 1 day.	Invalid trading_date {0}. The trading_date must be greater than or equal to {1} for standing bid with day type as {2}	H	Mandatory	Not Applicable
	When the standing flag is true and day type is ALL: For an existing standing bid, the valid trade_date must be equal to the max (market_date with current state as "OPEN") + 1 day. For a new standing bid, the valid trade_date must be greater than or equal to max(market_date with current state as "OPEN") + 1 day.	No record in cm_market table Invalid trading_date {0}. The trading_date must be equal to {1} for an existing standing bid with day type as ALL. Please contact a Market Operator for clarification and assistance Invalid trading_date {0}. The trading_date must be greater than or equal to {1} for an new standing bid with day type as ALL	H	Mandatory	Not Applicable
standing_flag, standing	If the Standing Flag is equal to true, Standing must exist.	Standing Element must be present when standing_flag is set to true	H	Mandatory	Not Applicable
	If the standing element is present, the standing flag must be true.	The standing_flag must be set to true when Standing Element is present	H	Mandatory	Mandatory
resource_name	Must be valid Resource and belong to the Participant.	The resource name {0} is invalid	H	Mandatory	Optional
version_number	Must be "1.0"		H	Mandatory	Mandatory
Standing Element (mandatory if standing_flag=true) (only applicable for Forecast and Complex COD)					
expiry_date	YYYY-MM-DD Must be in the future.	The expiry_date {0} must be in the future		Optional	Not Applicable
	Must be greater than or equal to the Trading Date.	The expiry_date {0} must be greater than or equal to trading_date {1}			
	Only applicable if the day type is SUN, MON, TUE, WED, THU, FRI or SAT.				
	Not required when DAY_TYPE is "ALL".	The expiry_date attribute must not present when day type is ALL		Not Applicable	

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Volume C. Balancing Market	Hard / Soft	Submission	Query
day_type	If STANDING_FLAG is TRUE then must be MON, TUE, WED, THU, FRI, SAT, SUN or ALL. If a standing bid in place and DAY_TYPE=ALL, then no other DAY_TYPE bids can be submitted. If standing bid with DAY_TYPE not ALL accepted, then no bid with DAY_TYPE=ALL can be submitted.	Submitted Standing Data with type {0} conflicts with existing Standing Data with type {1} for trading_date {2}			Optional	Optional
Identifier Element (optional)						
external_id	Must be STRING.				Optional	Not Applicable
Forecast Element (optional submission in Demand Offer, mandatory if standing_flag is "true") . This is submitted as part of demand_detail element. For all Forecast submissions (Maximum Availability, Minimum Stable Generation and Minimum Output) submissions, header includes an identifier of the Trading Day to which the submission relates.						
Demand_detail Element: start_time	Must be the beginning of a Trading Period e.g. Must be of form '2016-10-31T13:30:00'	Message detail to be included later in the implementation phase		H	Mandatory	Not Applicable
Demand_detail Element: end_time	Must be the end of a Trading Period (inclusive) e.g. Must be of form '2016-10-31T13:30:00'	Message detail to be included later in the implementation phase		H	Mandatory	Not Applicable
Forecast Element	The forecast must comprise the next open Balancing Window to the end of the Trading Day +1	Message detail to be included later in the implementation phase		H	Optional	Optional
	Must not contain start / end time outside the Trading Window	Message detail to be included later in the implementation phase		H	Optional	Optional
Start time of Forecast element	Start_time must be the start of the earliest Trading Period on the Trading_Date in the header for which the ex-ante market (either the DAM or IDM) is open (which for a submission in advance, will be the start of the Trading Day)	Message detail to be included later in the implementation phase		H	Optional	Optional
End_time of the forecast element	End_time must be the later of: i. end of the trading_date in the header; or ii. end of the trading_date for which the DAM has closed	Message detail to be included later in the implementation phase		H	Optional	Optional
maximum_mw	Must be >=0.	Message detail to be included later in the implementation phase		H	Mandatory	Not Applicable
	MAXIMUM_MW>=MINIMUM_MW.	Message detail to be included later in the implementation phase				
minimum_mw	Must be >=0.	Message detail to be included later in the implementation phase		H	Mandatory	Not Applicable
	MAXIMUM_MW>=MINIMUM_MW.	Message detail to be included later in the implementation phase		H		
minimum_output_mw	Standing flag is true with day type: ALL. Must be<= 0	Message detail to be included later in the implementation phase		H	Mandatory	Not Applicable
	Standing flag is set to false or standing flag is set to true with day type: SUN, MON, TUE, WED, THU, FRI or SAT. Must be = 0 if not pumped storage unit.	Message detail to be included later in the implementation phase		H		
	Standing flag is set to false or standing flag is set to true with day type: SUN, MON, TUE, WED, THU, FRI or SAT.	Message detail to be included later in the implementation phase		H		
COD detail (optional), with type parameter "SIMPLE or "COMPLEX"						
The cod_complex_detail element allows submission of 'complex' Commercial Offer Data (including separate Inc and Dec curves), which is separately treated in the Balancing Market Systems.						
The cod_simple_details allows submission of 'simple' Commercial Offer Data which has separate Inc and Dec Curves. This element allows submission of multiple simple offers for the same trading day.						
'Simple' and 'complex' elements may be included in the same submission.						
Simple' Data - If Incs are not submitted for a particular Trading Day, the system will use the corresponding Incs from their 'Complex' offers						
inc_curve_detail element - Can contain up 10 price/quantity pairs. This element will be required for Demand Side Units.						

I-SEM Technical Specification (ITS)

5.6 VALIDATION TECHNICAL OFFER DATA (VTOD)

This section covers Validation Technical Offer Data and incorporates the following:

- Application of Default and Trading Day Validation Technical Offer Data;
- VTOD Submission and Approval; and
- VTOD Set Selection.

5.6.1 DEFAULT AND TRADING DAY VALIDATION TECHNICAL OFFER DATA

For Validation Technical Offer Data (VTOD), the same default rules used for Commercial Offer Data are applied, unless otherwise specified in the market rules, in order to ensure that valid data will always be available at Gate Window closure. The VTOD set number one is used as the default VTOD data set. This means that VTOD set number one will be used as Trading Day VTOD, unless another Validated TOD set is chosen to be used on that Trading Day.

- Each Generator Unit and Demand Side Unit can have up to six pre-approved VTOD sets;
- VTOD sets are identified by their respective set numbers (i.e. 1 to 6);
- If Participants do not submit a VTOD set choice for a given Trading Day, the default set (VTOD set number 1) will be used;
- Changes to data within a VTOD set require approval from the Market Operator and the Transmission System Operator (via business process); and
- The latest accepted VTOD set choice will be used at a Gate Window closure which applies for the remainder of the Trading Day.

5.6.2 GENERATOR VTOD SET

The Validation Technical Offer Data (VTOD) consists of operational characteristics for Units dependent on resource type. The system allows Participants to create up to six sets of VTOD for each Unit (numbered 1 to 6). These sets must be approved by the TSO and Market Operator before they become valid.

At any point of time, at least one valid VTOD set has to be in place. Approval of any VTOD set is via a business process.

5.6.2.1 GENERATOR VTOD - METHODS

Element	Requirement
market_submit	Mandatory if submit request
market_query	Mandatory if query request

Table 35: Trading (VTOD), methods and element groups

5.6.2.2 GENERATOR VTOD - DATA ELEMENTS AND VALIDATIONS

Name	Validation	Validation Message	Hard / Soft	Submission	Query
market_submit / market_query element					
date_type	Must be "SUBMISSION".	"Unable to process bid upload request..."	H	Mandatory	Mandatory
sem_gen_technical_offer element					
resource_name, participant_name	Must be valid Resource and belong to the Participant.	The resource name {0} is invalid	H	Mandatory	Optional
set_number	Must be integer between 1 and 6.	Unable to process bid upload request: attribute "set_number" has a bad value: the value is out of the range (maxInclusive specifies 6)	H	Mandatory	Optional
Status	Only applicable to queries. Must be "NON_APPROVED", "APPROVED" or "RECEIVED_OR_PENDING"	Unable to process bid upload request: attribute "status" has a bad value:...		Not Applicable	Mandatory
version_number	Must be "1.0"		H	Mandatory	Mandatory
identifier element (optional)					
Identifier	external_id value is free text.			Optional	Optional
block_loading element					
Flag	Valid values are "true" or "false". Must be "false" for Non-Priority Dispatch Renewable and Battery Storage units	<i>Message detail to be included later in the implementation phase</i>	H	Mandatory	Not Applicable
Hot	MW Value. Must be a NUMBER between 0 and 99999.999.	Unable to process bid upload request: attribute {1} has a bad value: the value is out of the range (minInclusive specifies 0)	H	Optional(Mandatory if Flag is True)	Not Applicable
Warm	MW Value. Must be a NUMBER between 0 and 99999.999.		H	Optional(Mandatory if Flag is True)	Not Applicable
Cold	MW Value. Must be a NUMBER between 0 and 99999.999.		H	Optional(Mandatory if Flag is True)	Not Applicable
load_up element					
	3 possible types: type="HOT", type="WARM", type="COLD" (each of which may be submitted). Each type must contain at least 2 points and at most 3 points. Each point attribute contains a rate value and a quantity attribute, except for the first load up point, in which case the quantity attribute must not be submitted. This is because rate 1 always applies from 0MW to the next quantity.				
Rate	MW/min. Value must be between 0 and 99999.999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard / Soft	Submission	Query
deloading element					
	Must contain 2 points. Each point contains a rate attribute and a quantity attribute, except for the first Deloading point, in which case the quantity attribute must not be submitted.				
Rate	MW/min. Value must be between 0 and 99999.999			Optional	Not Applicable
Quantity	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
cooling_boundary element (time taken to move between heat states)					
Hot	Hours. Value must be between 0 and 999.99			Optional	Not Applicable
warm	Hours. Value must be between 0 and 999.99			Optional	Not Applicable
cold	Hours. Value must be between 0 and 999.99. Field is not used.			Optional	Not Applicable
startup_time element					
hot	Hours. Value must be between 0 and 999.99			Optional	Not Applicable
warm	Hours. Value must be between 0 and 999.99			Optional	Not Applicable
cold	Hours. Value must be between 0 and 999.99			Optional	Not Applicable
dwell_time element, type = "UP"					
	Must contain at least 1 point and at most 3 points. Each point must contain a time attribute and a quantity attribute.				
time	Minutes. Value must be between 0 and 999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
dwell_time element, type = "DOWN"					
	Must contain at least 1 point and at most 3 points. Each point must contain a time attribute and a quantity attribute.				
time	Minutes. Value must be between 0 and 999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
on_time element					
Max	Hours. Value must be between 0 and 99999999.999			Optional	Not Applicable
Min	Hours. Value must be between 0 and 99999999.999			Optional	Not Applicable
off_time element					
	Contains only 1 attribute: "min"				
Min	Hours. Value must be between 0 and 99999999.999			Optional	Not Applicable
pump_parameters element					
pump_storage_cycle_efficiency ²¹	Percentage. Must be a NUMBER between 0 and 100.			Optional	Not Applicable
pumping_load_capacity	MWh Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
off_to_generating	Mins Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
off_to_spin_pump	Mins Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
spin_pump_to_pumping	Mins Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
max_ramp_rate element (only required for Demand Side Units)					
up	MW/min. Value must be between 0 and 99999.999			Optional	Not Applicable
down	MW/min. Value must be between 0 and 99999.999			Optional	Not Applicable

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard / Soft	Submission	Query
ramp_rate element					
	2 possible types: type="UP", type="DOWN" (each of which may be submitted) Must contain between 1 and 5 points. Each point contains a rate attribute and a quantity attribute, except for the first point, in which case the quantity attribute must not be submitted. <u>This is because rate 1 always applies from either the registered minimum generation, orMinGen, minimum stable generation should this be submitted for a non-Batterynon-Battery Storage unit, to the next quantity.</u>				
rate	MW/min. Value must be between 0 and 99999.999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between - 99999.9999 and 99999.999, up to which the associated ramp rate applies.			Optional	Not Applicable
restricted_region element					
	If included, this element must contain at least 1 region and at most 2 regions				
start	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
end	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
soak_time element					
	3 possible types: type="HOT", type="WARM", type="COLD" (each of which may be submitted). Each type must contain between 1 and 2 points. Each point must contain a time attribute and a quantity attribute.				
time	Minutes. Value must be between 0 and 999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between 0 and 99999.999			Optional	Not Applicable
short_term_maximization element					
	If included, this element must contain at a time and a quantity attribute.				
time	Minutes. Value must be between 0 and 99999999.999			Optional	Not Applicable
quantity	MW Value. Must be a NUMBER between 0 and 99999.999.			Optional	Not Applicable
minimum_stable_generation element					
quantity	MW Value. Must be a NUMBER between 0 and 99999.999. <u>Must be 0 for Non-Priority Dispatch Renewable and Battery Storage units</u>			Optional (Mandatory for Non-Priority Dispatch Renewable and Battery Storage units)	Not Applicable
energy_parameters element (for Battery Storage units only)					
esps_storage_cycle_efficiency	Must be between 0 to 100.0000		H	Mandatory	Not Applicable

5.6.3 DEMAND VTOD SET

The Validation Technical Offer Data (VTOD) for Demand Side Units consists of specific operational characteristics for Demand Side Units. The system allows Participants to create up to six sets of VTOD for each Unit (numbered 1 to 6). These sets must be approved by TSO and Market Operator before they become valid.

At any point of time, at least one valid VTOD set has to be in place. The process for approval of a new VTOD set, or a change to an existing VTOD set, is largely a manual process. The current process for the SEM will persist for the I-SEM.

5.6.3.1 DEMAND VTOD - METHODS

Element	Requirement
market_submit	Mandatory if submit request
market_query	Mandatory if query request

Table 37: Trading (Demand VTOD), methods and element groups

5.6.3.2 DEMAND VTOD - DATA ELEMENTS AND VALIDATIONS

Name	Validation	Validation Message	Hard / Soft	Submission	Query
market_submit / market_query element					
date_type	Must be "SUBMISSION".	Unable to process bid upload request...	H	Mandatory	Mandatory
sem_demand_technical_offer element					
resource_name	Must be valid Resource and belong to the Participant.	The resource name {0} is invalid	H	Mandatory	Optional
set_number	Must be integer between 1 and 6.	Unable to process bid upload request: attribute "set_number" has a bad value: the value is out of the range (maxInclusive specifies 6)	H	Mandatory	Optional
status	Only applicable to queries. Must be either "NON_APPROVED", "APPROVED" or "RECEIVED_OR_PENDING"	Unable to process bid upload request: attribute "status" has a bad value:...		Not Applicable	Mandatory
version_number	Must be "1.0"		H	Mandatory	Mandatory
identifier element (optional)					
identifier	external_id value is free text.			Optional	Optional
max_ramp_rate element					
Optional element. 2 possible attributes: "UP" or "DOWN"				Optional	Not Applicable
up	MW/min. Value must be between 0 and 99999.999				
down	MW/min. Value must be between 0 and 99999.999				
down_time element					
Optional element. 2 possible attributes: type="MIN", type="MAX"					
min	Hours. Value must be between 0 and 99999999.999			Optional	Not Applicable
max	Hours. Value must be between 0 and 99999999.999			Optional	Not Applicable

Figure 6064: Sample XML - VTOD query

5.6.4 VTOD SET CHOICE

For each Trading Day, the Participant has a choice of one of the valid 6 VTOD sets to be applied for that Trading Day and can be submitted in accordance with *Table 29*. Participants may query which VTOD set applies for a selected Trading Day at any given point.

Formatted: Font: Italic

5.6.4.1 VTOD SET CHOICE - METHODS

Element	Requirement
market_submit	Mandatory if submit request
market_query	Mandatory if query request

5.7 PHYSICAL NOTIFICATIONS (PN)

Physical Notifications (PNs) are submitted by Participants at any point up to the Balancing Market Gate Closure for the associated Imbalance Settlement Period. PNs are submitted in either A01 or A04 curve type, formats, available from the www.ENTSOE.eu website, depending on the type of unit as set out below.

PN data submissions define a stepwise (A01) linear profile or piecewise (A04) linear profile versus time consisting of a set of segments where the ordinate is the MW level. Each dataset submitted will form a continuous curve for the minimum timeframe required; that is, except for the first and last segment, for every "Time From" in a record there is an equal "Time To" in the previous record. Each date/time value in a PN dataset must be to a one minute resolution (i.e. at the start of a minute).

When submitted, PNs will be validated in the Balancing Market Interface to ensure that the entire set of PNs is feasible according to the relevant Unit's technical characteristics, and that the dataset covers the correct timeframe. The latest validated and approved set of PNs is retrieved by every execution of Operational Schedule Runs.

PN submissions may also contain indicators of periods when a Participant wishes a Unit to be 'Under Test'. When such submissions are received, the PNs are only used in downstream processes (e.g. scheduling) once approved by the TSO.

- When a PN submission containing any Unit Under Test indicator is submitted, the entire submission will be assigned a status of 'Received'. No part of the PN submission will at this stage be active in the I-SEM Systems;
- The Transmission System Operator is notified that a submission has been received and needs to be reviewed and Approved/Denied;
- The Transmission System Operator will then 'Approve' or 'Deny' this as appropriate. Once approved, the entire PN submission will be active in the I-SEM Systems.

5.7.1 PHYSICAL NOTIFICATIONS - METHODS

Element	Requirement
market_submit	Mandatory if submit request.
market_query	Mandatory if query request.

Table 41: Trading (PNs), methods

5.7.2 PHYSICAL NOTIFICATIONS - DATA ELEMENTS AND VALIDATIONS

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard/Soft	Submission	Query
sem_pn_submit Element					
curve_type	Must be 'A01' or 'A04'	<i>Message detail to be included later in the implementation phase</i>	H	Mandatory	Not Applicable
	If 'A01' format, must be one of: a) AOLR Unit b) Supplier Unit c) Generator Unit with registered capacity < 10MW d) Demand Side Unit with dispatchable capacity of < 10MW e) Generator Unit that is not Dispatchable (including Non-Priority Dispatch Renewable Unit) Otherwise, curve type 'A04' must be used. Units providing A01 cannot submit A04 and vice versa.	<i>Message detail to be included later in the implementation phase</i>	H		
resource_name, participant_name	Must be valid Resource and belong to the Participant and User.	The resource name {} is invalid	H	Mandatory	Optional
start_time, from_mw	Must be of form 'YYYY-MM-DDTHH24:MI:SS' Time portion should be the start of a minute. Seconds portion of the time should always be '00'.		H	Mandatory	Optional
	Start time must be the start of the earliest Trading Period on the Trading Date in the header for which the ex-ante market (either the DAM or IDM) is open (which for a submission in advance, will be the start of the Trading Day)	<i>Message detail to be included later in the implementation phase</i>	H		
	Must be contiguous curve for submitted period	<i>Message detail to be included later in the implementation phase</i>	H		
	start_time < end_time	<i>Message detail to be included later in the implementation phase</i>	H		
	start_time must be at the start of a minute	<i>Message detail to be included later in the implementation phase</i>	H		
from_mw	Must be >=0 for all Generators apart from Pumped Storage and Battery Storage Units . Where the Unit is not a Supplier Unit, From_mw cannot be less than Minimum Generation and cannot be greater than Maximum Generation for the unit (where Minimum Generation is zero for Generator Units that are not Pumped Storage or Battery Storage Units). For DSU From_mw cannot be less than zero and cannot be greater than Dispatchable Capacity.	<i>Message detail to be included later in the implementation phase</i>	H	Mandatory	Not applicable

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Name	Validation	Validation Message	Hard/Soft	Submission	Query
	For the first PN segment in any submission for A04 curve type, from_mw must be within a defined tolerance (e.g. 0.02MW, inclusive) of the PN value (rounded to 3dp) at the start_time associated with that from_mw, which may be derived (e.g. interpolated) from the latest accepted PN segment covering that time	Message detail to be included later in the implementation phase	H		
	For A04 type, from_mw should equal to_mw of the previous row.(Except for the first row as there would be no previous row). A01 adheres to the block format validation.	Message detail to be included later in the implementation phase	H		
end_time, to_mw	Must be of form 'YYYY-MM-DDTHH24:Mi:SS'. Time portion should be the start of a minute. Seconds portion of the time should always be '00'	Message detail to be included later in the implementation phase	H	Mandatory	Optional
	End_time must be the later of: <ul style="list-style-type: none"> end of the trading_date in the header; and end of the trading_date for which the DAM has recently closed 	Message detail to be included later in the implementation phase	H		
	Must be contiguous curve for submitted period	Message detail to be included later in the implementation phase	H		
	end_time > start_time	Message detail to be included later in the implementation phase	H		
	end_time must be at the start of a minute. The seconds portion should always be '00'	Message detail to be included later in the implementation phase	H		
to_mw	For A04 type, from_mw should equal to_mw of the previous row. (Except for the last row , as there will no next row). A01 adheres to the block format validation.	Message detail to be included later in the implementation phase	H	Mandatory	Not applicable
	For the last PN segment in any submission for A04 curve type, to_mw must be within a defined tolerance (e.g. 0.02MW, inclusive) of the PN value (rounded to 3dp) at the end_time associated with that to_mw, which may be derived (e.g. interpolated) from the latest accepted PN segment covering that time	Message detail to be included later in the implementation phase	H		

I-SEM Technical Specification (ITS)

5.8 SETTLEMENT REALLOCATION AGREEMENTS

5.8.1 SRA OVERVIEW

A Settlement Reallocation Agreement (SRA) is an agreement between two Participants and the Market Operator, under which the parties agree that the Market Operator shall allocate to one Participant (the "**Principal Participant**") all amounts owed by or to the other Participant (the "**Secondary Participant**") under Settlement Documents. A Settlement Reallocation Agreement is a legal document, which must be submitted to the Market Operator and approved, before submission through the Balancing Market Trading Interface.

There are a number of prevailing rules which govern the submission of SRAs;

- 1) A Principal Participant can have SRAs with more than one Secondary Participant.
- 2) A Principal Participant cannot also be a Secondary Participant.
- 3) A Secondary Participant can have an SRA with only one Principal Participant.

5.8.2 SRA SUBMISSION & APPROVAL

For an SRA to be valid, matching agreement requests must be submitted through the Balancing Market Trading Interface by both the Principal Participant and the Secondary Participant.

Once matching SRA requests have been received, the matching agreement requests shall be considered "pending" Market Operator approval. Pending SRAs will then be approved or rejected by the Market Operator, in line with the Agreed Procedure 10²².

Once approved, SRA shall become effective from the approved start date in the request.

5.8.3 SRA CANCELLATION AND TERMINATION

If a Participant wishes to cancel an SRA request that is pending Market Operator approval, the Participant shall contact the Market Operator to request that the "pending" SRA request is rejected.

A Participant can also request to Terminate an approved SRA, by submitting a request to the Market Operator, following the relevant process outlined in Agreed Procedure 10, Settlement Reallocation.

²² Legal paperwork must be submitted to the Market operator to be approved before the SRAs can become effective.

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

Note: Upon approval of the termination request, both the Principal Participant and Secondary Participant will be responsible for their own financial obligations from the approved end date of the agreement.

5.8.4 SETTLEMENT REALLOCATION AGREEMENT - METHODS

Element	Requirement
market_submit	Mandatory if submit request.
market_query	Mandatory if query request.

Table 43: Trading (PNs), methods

5.8.5 SETTLEMENT REALLOCATION AGREEMENT - DATA ELEMENTS AND VALIDATIONS

Name	Validation	Validation Message	Hard / Soft	Submission	Query
market_submit_Element					
participant_name	The "participant_name" attribute is mandatory and the Participant should be registered in the I-SEM. It should not be more than 12 characters.	The user_name {0} for participant_name {1} does not have system access privileges to participate in Market Trading for trading_date {2}.	H	Mandatory	Mandatory
sem_settlement_reallocation_Element (mandatory)					
principal_participant_name	The "principal_participant_name" attribute is mandatory and the participant_name should be registered in I-SEM	The principal participant name {0} is invalid	H	Mandatory	Mandatory
secondary_participant_name	The secondary participant name is mandatory and the participant name should be registered in I-SEM	The secondary participant name {0} is invalid	H	Mandatory	Mandatory
principal_participant_name, secondary_participant_name ²³	The participant_name in the header should be one of the either the principal_participant_name or the secondary_participant_name in the SRA submission	The principal or the second participant name is not matching with the submitting participant name {0}	H	Mandatory	Optional
start_date	This is the starting date of the SRA. It has to be greater than D for a new submission.	Invalid start date {0}	H	Mandatory	Optional
end_date	This is the ending date of the SRA. It has to be greater than D for any submission. The end date also has to be greater than equal to the start_date.	Invalid end date {0} for the SRA	H	Mandatory	Optional
agreement_name	Any valid string	Agreement name cannot be null	H	Mandatory	Optional
cancel_flag	The cancel_flag can be either true or false. This is optional and the default value is false. When cancel_flag is submitted as true, an existing SRA with the principal_participant_name,	Invalid SRA cancellation request	H	Optional	Optional

²³ This field is used to validate the submitted SRA and does not need to be included in the submission.

Name	Validation	Validation Message	Hard / Soft	Submission	Query
	secondary_participant_name, start_date and end_date must exist

6 FIGURE 6674: SRA - (QUERY)REPORTING

6.1 INTRODUCTION

This section of the I-SEM TS: Balancing Market Volume details the means by which reports are accessed via the MPI (Type 2 and Type 3) and provides details in relation to:

- report audience;
- report frequency, timing, granularity etc.; and
- report formats, including file types, data fields etc.

The focus of this document is on the Type 3 Communication Channel, i.e. submission and retrieval of I-SEM Reports via Web Services. In addition, some of the introductory sections also refer to the Type 2 Communication Channel (i.e. data submission and retrieval using the Market Participant Interface).

6.2 I-SEM BALANCING MARKET TRADING INTERFACE REPORTS

The Balancing Market Interface reports are accessed through web service queries and logging into the I-SEM Balancing Market Trading Interface, in some instances CSV and PDF are also available. XML queries are validated by defining the XML Schema.

Type 2 reports are available to all qualifying Participants by logging in through the Balancing Market Interface with the appropriate log in credentials. The Participant can then navigate, filter and select a report which is required for viewing. These reports can then be saved offline by the Participant.

All reports queried to the MMS via Type 3 submission will be in **Coordinated Universal Time (UTC)**. Reports viewed on screen via Type 2 will be in local time. Further explanation is provided in Section3.

6.3 TYPE 3 REPORT LIST / REPORTING QUERY PROCESS

Type 3 interaction enables Participants to:

- Retrieve a list of reports that are available and which match a supplied set of the available selection criteria; or
- Retrieve a specific report by defining all of the required selection criteria for the report (this approach may be used by Participants to determine if a particular report is available).

6.3.1 REQUESTING REPORT LIST PROCESS

In order for a Participant to request and receive a list of available reports, they must submit an XML query.

The following diagram illustrates the process for request and retrieval of a report list, or a specific report:

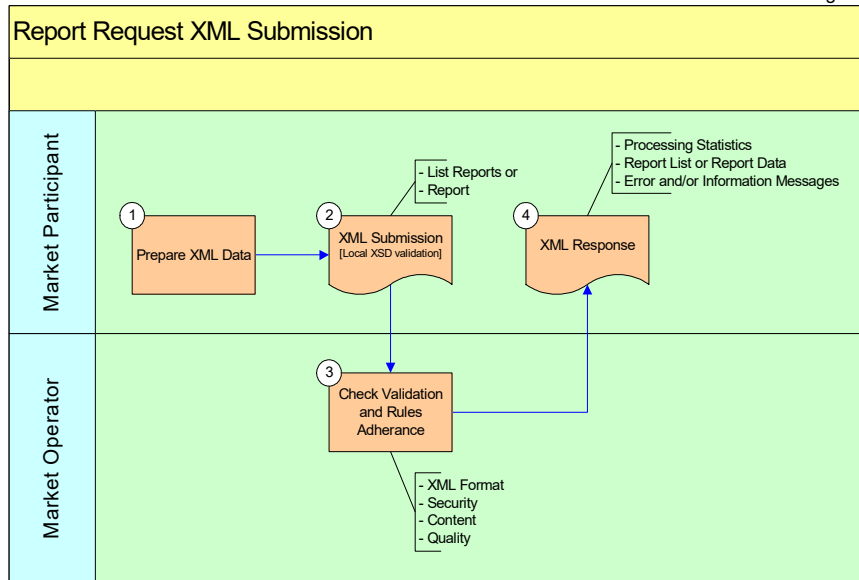

Figure 6772: Report Request XML Submission Process

- **Step 1:** Participants prepare the XML Data (details on how this needs to be packaged, in terms of SOAP, WSDL, etc. are covered in the **Technical Volume** of the I-SEM Technical Specification).
- **Step 2:** A Report or a List of Reports can be requested and will typically be validated on the client (Participant) system to ensure compliance with the XML Schema rules.
- **Step 3:** The Transaction is received by the Balancing Market Interface and validation checks, including business rules, are applied.
- **Step 4:** If the Step 3 tests are passed then the Report or List of Reports is issued to the Participant as an XML response. If the request is unsuccessful, a response is issued detailing the relevant errors.

6.3.2 REQUESTING A SPECIFIED REPORT PROCESS

The Participant can request to receive individual reports from the list of reports received through the Reporting Query Process, as detailed in Section 6.3.1.

The process for requesting a specified report is similar to that shown in [Figure 67](#)~~Figure 69~~.

6.4 REPORT QUERY VALIDATION

This section describes the validations for the report queries submitted to the Balancing Market Interface. This section is divided into two distinct sections, MI Reports and CSB Reports, both of which use their own reporting schema and query parameters.

6.4.1 MI REPORTS

6.4.1.1 VALIDATIONS FOR COMMON ATTRIBUTES –MI REPORTS

Name	Mandatory / Optional	Validation
application_type	Mandatory	Must be "MARKET_REPORT".
participant_name	Mandatory	Must be STRING. Must be validation combination with USER_NAME. Must have system privileges to allow Market Trading.
User_name	Mandatory	Must be STRING. Must be validation combination with PARTICIPANT_NAME. User must have system privileges for Market Trading.
version_no	Mandatory	Must be "1.0".
mode	Mandatory	Must be NORMAL.

Table 4546: Generic Report Parameters

6.4.1.2 VALIDATIONS FOR REPORT AND LIST REPORT PARAMETERS –MI REPORTS

Name	Mandatory / Optional	Validation
request_type	Mandatory	"LIST_REPORTS" or "REPORT".
action	Mandatory	Must be "DOWNLOAD".
report_type	Mandatory	Valid REPORT_TYPE and REPORT_SUB_TYPE combinations: APPLICATION – ADHOC24 APPLICATION – NOTIFICATIONS
report_sub_type ²⁵ ²⁶ ²⁷	Mandatory for request_type "REPORT" Optional for request_type "LIST_REPORTS"	INTERFACE - IGMG INTERFACE - DYNAMICS INTERFACE - EMS INTERFACE - MISCELLANEOUS INTERFACE - INTERCONNECTOR INTERFACE - NEMO MARKET - DAM_STANDING_CLOSE MARKET - IMBALANCE_PRICE MARKET - SCHEDULES MARKET - DISPATCH MARKET - METERING MARKET - MISCELLANEOUS MARKET - PARTICIPANT_DATA MARKET - DAM_STANDING_OPEN REGISTRATION - SNAP_SHOT
periodicity	Mandatory	Valid PERIODICITY: DAILY, MONTHLY, YEARLY, ADHOC "Periodicity" does not define how often a report is produced; rather it is used by Participants to retrieve different categories of reports.
access_class	Optional	MP (Member Private Specific reports); ALLMP (All MP specific reports); PUB (Public reports).
trade_date	Optional	YYYY-MM-DD For Daily market reports, the entire date is used. For monthly and yearly reports, the month and year are extracted from the trade date.

²⁵ If report_sub_type = "ADHOC", then periodicity should also be "ADHOC".

²⁶ Report sub type is not applicable for Settlement reports.

²⁷ See Appendix D for Report Type and Sub-Types mapping

Table 4647: Report and Report List Parameters

6.4.1.3 VALIDATIONS FOR REPORT SPECIFIC PARAMETERS –MI REPORTS

Name	Mandatory / Optional	Validation
file_type	Mandatory	"XML", "HTML" or CSV – The format of the report to be downloaded.
report_name	Mandatory	Must be STRING.
file_name	Mandatory	Must be STRING.
multiple_messages	Mandatory	Must be "false".

Table 4748: Report Specific Parameters

6.4.2 CSB REPORTS

6.4.2.1 VALIDATIONS FOR COMMON ATTRIBUTES –CSB REPORTS

Name	Mandatory / Optional	Validation
ApplicationType	Mandatory	Must be "CSB_REPORT".
ParticipantName	Mandatory	Must be STRING. Must be validation combination with USER_NAME@PARTY_ID@PARTICIPANT_ID.

Table 4849: Generic Report Parameters, CSB Reports

6.4.2.2 VALIDATIONS FOR REPORT LIST PARAMETERS –CSB REPORTS

Name	Mandatory / Optional	Validation

ReportID	Mandatory	Must be Long (retrieved from the csbReportList response file)
BatchID	Mandatory	Must be Long (retrieved from the csbReportList response file)
ReportIdentifier	Mandatory	Must be String
MarketName	Optional	Valid MarketName: BALIMB BMCRM CRM MO FMOC ALL
AccessClass	Mandatory	Valid AccessClass: MEMBER_PRIVATE MEMBER_GEN_PUB GENERAL_PUB ENTSO_E
FileName	Optional	Must be String. Limit 120 characters.

Name	Mandatory / Optional	Validation
FileType	Optional	Valid FileType: CSV XML HTML

Table 5054: Report Specific Parameters, CSB Reports

6.5 BALANCING MARKET INTERFACE REPORTS AND CONTENT DETAILS

This section describes the report interface queries submitted to the Balancing Market Interface. This section is divided into two distinct sections, MI Reports and CSB Reports, both of which use their own reporting schema and query parameters.

6.5.1 MI REPORTS

Report Categories (confidentiality)

- Member Public: The report data is available to all Participants. The REPORT_NAME in each REPORT_HEADER will start with the prefix "PUB".
- Member Private: The report data is specific to the Participant. This is determined by the digital certificate used to download the report. The REPORT_NAME in each REPORT_HEADER will start with the prefix "MP".

Note:

- For all reports listed in this section, any fields which contain no values (null values) are represented in the reports by a hyphen ("-").
- The report timings listed for each report represent the time that the report generation event is triggered in the Balancing Market Interface.

Report element format types referenced in this section are defined in the following table:

Format	Description	Example
CHAR(x)	Character field of exactly length x.	CHAR(1) = 'P'
VARCHAR2(x)	Character field of length x or less	VARCHAR2(4) = 'NI'
NUMBER(x, y)	Number field: x : number of digits (including after the decimal). y : number of digits to the right of the decimal. Where no values to the right of the decimal point exist, there will be no y value in the format definition. When there is no value available for the field in the MO database, the reports will populate the field with '-'. As such, this is not a NUMBER value in the true database sense, and interfaces to handle report downloads should be written to cater for this.	NUMBER(8,3) = 99999.999
DATE (YYYY-MM-DD)	Date, format defined in parenthesis. When there is no value available for the DATE field in the MO database, the reports will populate the field with '-'. As such, this is not a DATE value in the true database sense, and interfaces to handle report downloads should be written to cater for this.	2007-01-31
DATE TIME(YYYY-MM-DDTH24:MI)	Date and Time, format utilising a 24-hour clock. When there is no values available for the DATE field in the MO database, the reports will populate the field with '-'. As such, this is not a DATE value in the true database sense, and interfaces to handle report downloads should be written to cater for this.	2016-06-02 19:59:50
TIME (YYYY-MM-DDTH24:MI)	Time, format utilising a 24-hour clock. Refer to Section 3.2 for further detail.	2016-06-02 19:59:50

Table 5152: Report Data Formats

6.5.2 CSB REPORTS

Report Categories (confidentiality)

This section is for CSB settlement reports. Those are found in Section 6.7.11 of this document.

- Member Public: The report filename will begin with **XX_PT_ALL**, where **XX** = Report Identifier (e.g. **SC_PT_ALL**... is the Member Public Settlement Calendar Report).
- Member Private: The report filename will begin with **XX_PT_PTACPT_ID**, where **XX** = Report Identifier and **PARTICIPANT_ID** is the Participant Identifier. (e.g. **SS_PT_123456**... is the Member Private Settlement Statement Report, for Participant 123456).
- General Public: The report filename will begin with **XX_GP_ALL**, where **XX** = Report Identifier (e.g. **MW_GP_ALL**... is the General Public Make Whole Payment Report).

Report element format types referenced in this section are defined in the following table:

Format	Description	Example
DATE (YYYY-MM-DD)	Date, format defined in parenthesis.	2007-01-31
Long	Long integer format. The value used in CSB report query comes directly from the csbReportDownload query result set.	20171180000022189

6.7 TRADING REPORTS

6.7.1 ANNUAL REPORTS

This section specifies reports which will be produced on an annual basis.

6.7.1.1 ANNUAL COMBINED LOSS ADJUSTMENT FACTOR REPORT

This report details Combined Loss Adjustment Factors (CLAFs) for Units for each Trading Period in the relevant year, accounting for Transmission and Distribution losses associated with the transfer of energy.

I-SEM Report Reference: REPT_023
Periodicity: Annual
Report Name: PUB_AnnualCLAF
File Names: PUB_AnnualCLAF.xml
Report Title: Annual Combined Loss Adjustment Factor Report
Audience: Member Public
Resolution: Trading Period
Time Span: Following year
Frequency: Once every year, in August and ad hoc upon new Unit registration
Report Format: XML

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day
PARTICIPANT NAME	VARCHAR2(12)	The PT Identifier, which represents the name of Market Participant, as registered in the I-SEM Balancing Market Trading Interface.
RESOURCE NAME	VARCHAR2(32)	Resource identifier, e.g. GU_XXXXXX
DELIVERY DATE	DATE (YYYY-MM-DD)	Calendar Day (referred to as "Day" in the Code).
START TIME	TIME(YYYY-MM-DDTH24:MI)	Start time of the time period to which the Loss Factor relates
END TIME	TIME(YYYY-MM-DDTH24:MI)	End time of the time period to which the Loss Factor relates
LOSS FACTOR	NUMBER (4,3)	Loss Factor

6.7.1.2 ANNUAL LOAD FORECAST REPORT

This report contains the load forecast per jurisdiction (ROI & NI) and an aggregated value for both Jurisdictions, for each Trading Period in the relevant year.

I-SEM Report Reference: REPT_018
Periodicity: Annual
Report Name: PUB_AnnualLoadFcst
File Names: PUB_AnnualLoadFcst.xml
Report Title: Annual Load Forecast Report
Audience: Member Public
Resolution: Trading Period
Time Span: Following year
Frequency: Once every year, in August
Report Format: XML

Field Name	Format	Description
DELIVERY DATE	DATE (YYYY-MM-DD)	Calendar Day (referred to as "Day" in the Code).
START TIME	TIME(YYYY-MM-DDTH24:MI)	Start time of the 30 minute Trading Period
END TIME	TIME(YYYY-MM-DDTH24:MI)	End time of the 30 minute Trading Period
LOAD FORECAST ROI	NUMBER(10)	Load Forecast for ROI (MW)
LOAD FORECAST NI	NUMBER(10)	Load Forecast for NI (MW)
AGGREGATED FORECAST	NUMBER(10)	Aggregated Load Forecast for both Jurisdictions.

Figure 7378: REPT_027: Four Day Rolling Wind Unit Forecast Report - Sample

6.7.3.4 FOUR DAY AGGREGATED ROLLING WIND UNIT FORECAST REPORT

This report is run four times per day, containing the aggregated output (MW) across all Wind Units in each jurisdiction, for the next four Trading Days, produced following the receipt of each Wind Unit Forecast.

I-SEM Report Reference: REPT_028
Periodicity: On Demand
Report Name: PUB_4DayAggRollWindUnitFcst
File Names: PUB_4DayAggRollWindUnitFcst_YYYYMMDDHHMM.xml
Report Title: Four Day Aggregated Rolling Wind Unit Forecast Report
Audience: Member Public
Resolution: 15 mins
Time Span: Next four Trading Days
Frequency: Four times per day
Report Format: XML

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day
START TIME	TIME(YYYY-MM-DDTH24:MI)	Start date/time of forecast data
END TIME	TIME(YYYY-MM-DDTH24:MI)	End date/time of forecast data
DELIVERY DATE	DATE (YYYY-MM-DD)	Calendar Day (referred to as "Day" in the Code).
LOAD FORECAST ROI	NUMBER(11,3)	Load Forecast for ROI (MW)
LOAD FORECAST NI	NUMBER(11,3)	Load Forecast for NI (MW)
AGGREGATED FORECAST	NUMBER(11,3)	Aggregated Load Forecast for both Jurisdictions.

6.7.3.6 FORECAST IMBALANCE REPORT

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

This reports details the sum of all the Spot MW Physical Notifications which are submitted by Participants, the net Interconnector schedule, the TSO renewables forecast for non-Dispatchable renewable Units and the calculated imbalance, for each Imbalance Settlement Period until the end of the latest Trading Day for which the Day Ahead Market gate is closed.

<i>I-SEM Report Reference:</i>	<i>REPT_042</i>
<i>Data Source</i>	<i>Balancing Market Runs</i>
<i>Periodicity:</i>	<i>Hourly</i>
<i>Report Name:</i>	<i>PUB_HrlyForecastImbalance</i>
<i>File Names:</i>	<i>PUB_HrlyForecastImbalance_YYYYMMDDHHMM.xml</i>
<i>Report Title:</i>	<i>Forecast Imbalance Report</i>
<i>Audience:</i>	<i>Member Public</i>
<i>Resolution:</i>	<i>Imbalance Settlement Period</i>
<i>Time Span:</i>	<i>Starting from the Hour Ahead of Imbalance Settlement Period until the end of the latest Trading Day for which the Day Ahead Market gate is closed with a value for each Imbalance Pricing Period (e.g. 5 mins)..</i>
<i>Frequency:</i>	<i>Every Hour</i>
<i>Report Format:</i>	<i>XML</i>

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day
START TIME	TIME(YYYY-MM-DDTH24:MI)	Settlement Imbalance Period Start Time
END TIME	TIME(YYYY-MM-DDTH24:MI)	Settlement Imbalance Period End Time
CALCULATED IMBALANCE	NUMBER(8,3)	Resulting calculated imbalance for the next Imbalance Settlement Period until the end of the latest Trading Day for which the Day Ahead Market has closed, <u>calculated as:</u> $\text{TSO DEMAND FORECAST} - (\text{TOTAL PN} + \text{NET INTERCONNECTOR SCHEDULE} + \text{TSO RENEWABLE FORECAST (PRIORITY DISPATCH)})$ <p><u>Note:</u> TSO RENEWABLE FORECAST (NPDR) is not included in the CALCULATED IMBALANCE as the PN volumes for Non-Priority Dispatch Renewable Units will already be included in the TOTAL PN values.</p>
TOTAL PN	NUMBER(8,3)	Sum of the Spot PNs (MW) on the Settlement Imbalance Period Start Time.
NET INTERCONNECTOR SCHEDULE	NUMBER(8,3)	Net Interconnector schedule
TSO DEMAND FORECAST	NUMBER(8,3)	TSO demand forecast (MW)
TSO RENEWABLE FORECAST (PRIORITY DISPATCH)	NUMBER(8,3)	TSO renewables forecast (for <u>Priority Dispatch Renewable Units</u>)
TSO RENEWABLE FORECAST (NPDR)	NUMBER(8,3)	TSO renewables forecast (for Non-Priority Dispatch Renewable Units)

6.7.4 DAILY REPORTS – COD AND TOD

This section details daily TOD and COD reports including:

- Technical Offer Data
- Bid Offer Data
- Forecast Availability
- Commercial Offer Data

6.7.4.1 DAILY TECHNICAL OFFER DATA REPORT

This report details the relevant Technical Offer Data for both Generator Units and Demand Side Units, for the previous Trading Day.

I-SEM Report Reference: REPT_011
Data Source: Market Participant
Periodicity: Daily
Report Name: PUB_DailyTechnicalOfferData
File Names: PUB_DailyTechnicalOfferData.xml
Report Title: Daily Technical Offer Data Report
Audience: Member Public
Resolution: Trading Day
Time Span: Previous Trading Day (TD-1)
Frequency: Daily
Report Format: XML

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day
START TIME	TIME(YYYY-MM-DDTH24:MI)	Settlement Imbalance Period Start Time
END TIME	TIME(YYYY-MM-DDTH24:MI)	Settlement Imbalance Period End Time
DELIVERY DATE	DATE (YYYY-MM-DD)	Calendar Day (referred to as "Day" in the Code)
RESOURCE NAME	VARCHAR2(32)	The name of the resource (e.g. the name of the Generating Unit, Supplier Unit, Demand Side Unit, Interconnector for which data is being reported).
RESOURCE TYPE	VARCHAR2(4)	Indicates the type of resource for which data is being submitted - permitted values include: GU, DSU
JURISDICTION	VARCHAR2(32)	ROI (Republic of Ireland) or NI (Northern Ireland)

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Field Name	Format	Description
FUEL TYPE	VARCHAR2(22)	Fuel type. Possible values are: Oil Gas Peat Wind Biomass CHP Hydro Coal Distillate Nuclear Battery Storage Multi Fuel Pump Storage Fly Wheel Solar Compressed Air Storage Other
PRIORITY DISPATCH YN	CHAR(1)	Indication of unit's priority in the physical market schedule if in a tie to serve marginal demand. (Y/N)
DISPATCHABLE YN	CHAR(1)	Dispatchable flag 'Y' or 'N'
CONTROLLABLE YN	CHAR(1)	Controllable flag 'Y' or 'N'
PUMP STORAGE YN	CHAR(1)	It is a Y/N/Null field. Null for supplier, demand and Interconnector Y for Pumped Storage Unit
ENERGY LIMIT YN	CHAR(1)	Only applicable to Generators
UNDER TEST YN	CHAR(1)	It is a Y/N/Null field. <input type="checkbox"/> Null for Unit is not under test <input type="checkbox"/> Y for Unit is under test
FIRM ACCESS QUANTITY	NUMBER(8,3)	Total deep connected capacity designation for the unit
NON FIRM ACC QUANTITY	NUMBER(8,3)	Non-firm capacity for a unit in MW, i.e. part of a Generator Unit's Availability that does not have Firm Access.
SHORT TERM MAXIMISATION CAP	NUMBER(8,3)	Capacity above MAXGEN that can be sustained for a finite period of time (MW)
MINIMUM GENERATION	NUMBER(8,3)	Minimum Output of Generator Unit. The lowest value to which a unit can be scheduled.
MAXIMUM GENERATION	NUMBER(8,3)	Maximum stable Generation level in MW.
MINIMUM ON TIME	NUMBER(11,3)	Minimum time that must elapse from the time a Generation Unit is instructed to start-up before it can be instructed to shut down.
MINIMUM OFF TIME	NUMBER(11,3)	Minimum time that a Generation Unit must remain producing no Active Power commencing at the time when it first stops producing no Active Power.
MAXIMUM ON TIME	NUMBER(11,3)	Maximum time that can be elapse from the time a Generation Unit is instructed to start-up and run continuously before it must be instructed to shut down.
HOT COOLING BOUNDARY	NUMBER(5,2)	The duration in hours off load that indicates the standby status change of the unit from Hot to Warm.
WARM COOLING BOUNDARY	NUMBER(5,2)	The duration in hours off load that indicates the standby status change of the unit from Warm to Cold.
SYNCHRONOUS START UP TIME HOT	NUMBER(5,2)	Notification/Start-up times in hour for hot state
SYNCHRONOUS START UP TIME WARM	NUMBER(5,2)	Notification/Start-up times in hour for warm state
SYNCHRONOUS START UP TIME COLD	NUMBER(5,2)	Notification/Start-up times in hour for cold state
BLOCK LOAD COLD	NUMBER(8,3)	Block Loads for Cold state expressed in MW.
BLOCK LOAD HOT	NUMBER(8,3)	Block Loads for Hot state expressed in MW.
BLOCK LOAD WARM	NUMBER(8,3)	Block Loads for Warm state expressed in MW.
LOADING RATE COLD 1	NUMBER(8,3)	First point of Load up rates between load up break points expressed in MW/min for Cold state.
LOADING RATE COLD 2	NUMBER(8,3)	Second point of Load up rates between load up break points expressed in MW/min for Cold state.
LOADING RATE COLD 3	NUMBER(8,3)	Third point of Load up rates between load up break points expressed in MW/min for Cold state.
LOAD UP BREAK POINT COLD 1	NUMBER(8,3)	First break points of the cold state load up curve expressed in MW.
LOAD UP BREAK POINT COLD 2	NUMBER(8,3)	Second break points of the cold state load up curve expressed in MW.
LOADING RATE HOT 1	NUMBER(8,3)	First point of Load up rates between load up break points expressed in MW/min for Hot state.
LOADING RATE HOT 2	NUMBER(8,3)	Second point of Load up rates between load up break points expressed in MW/min for Hot state.
LOADING RATE HOT 3	NUMBER(8,3)	Third point of Load up rates between load up break points expressed in MW/min for Hot state.
LOAD UP BREAK POINT HOT 1	NUMBER(8,3)	First break points of the hot state load up curve expressed in MW.

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Field Name	Format	Description
LOAD UP BREAK POINT HOT 2	NUMBER(8,3)	Second break points of the hot state load up curve expressed in MW.
LOADING RATE WARM 1	NUMBER(8,3)	First point of Load up rates between load up break points expressed in MW/min for Warm state.
LOADING RATE WARM 2	NUMBER(8,3)	Second point of Load up rates between load up break points expressed in MW/min for Warm state.
LOADING RATE WARM 3	NUMBER(8,3)	Third point of Load up rates between load up break points expressed in MW/min for Warm state.
LOAD UP BREAK POINT WARM 1	NUMBER(8,3)	First break points of the warm state load up curve expressed in MW.
LOAD UP BREAK POINT WARM 2	NUMBER(8,3)	Second break points of the warm state load up curve expressed in MW.
SOAK TIME COLD 1	NUMBER(3)	First point of the Soak Time associated with Trigger point in cold state. Soak times used during start up.
SOAK TIME COLD 2	NUMBER(3)	Second point of the Soak Time associated with Trigger point in cold state. Soak times used during start up.
SOAK TIME TRIGGER POINT COLD 1	NUMBER(8,3)	First trigger points for soak times in Cold state expressed in MW
SOAK TIME TRIGGER POINT COLD 2	NUMBER(8,3)	Second trigger points for soak times in Cold state expressed in MW
SOAK TIME HOT 1	NUMBER(3)	First point of the Soak Time associated with Trigger point in hot state. Soak times used during start up.
SOAK TIME HOT 2	NUMBER(3)	Second point of the Soak Time associated with Trigger point in hot state. Soak times used during start up.
SOAK TIME TRIGGER POINT HOT 1	NUMBER(8,3)	First trigger points for soak times in Hot state expressed in MW
SOAK TIME TRIGGER POINT HOT 2	NUMBER(8,3)	Second trigger points for soak times in Hot state expressed in MW
SOAK TIME WARM 1	NUMBER(3)	First point of the Soak Time associated with Trigger point in warm state. Soak times used during start up.
SOAK TIME WARM 2	NUMBER(3)	Second point of the Soak Time associated with Trigger point in warm state. Soak times used during start up.
SOAK TIME TRIGGER POINT WARM 1	NUMBER(8,3)	First trigger points for soak times in Warm state expressed in MW
SOAK TIME TRIGGER POINT WARM 2	NUMBER(8,3)	Second trigger points for soak times in Warm state expressed in MW
RAMP UP RATE 1	NUMBER(8,3)	First point of Ramp Up Curve (MW/min).
RAMP UP RATE 2	NUMBER(8,3)	Second point of Ramp Up Curve (MW/min).
RAMP UP RATE 3	NUMBER(8,3)	Third point of Ramp Up Curve (MW/min).
RAMP UP RATE 4	NUMBER(8,3)	Fourth point of Ramp Up Curve (MW/min).
RAMP UP RATE 5	NUMBER(8,3)	Fifth point of Ramp Up Curve (MW/min).
RAMP UP BREAK POINT 1	NUMBER(8,3)	First break point of the Ramp Up Curve (MW)
RAMP UP BREAK POINT 2	NUMBER(8,3)	Second break point of the Ramp Up Curve (MW)
RAMP UP BREAK POINT 3	NUMBER(8,3)	Third break point of the Ramp Up Curve (MW)
RAMP UP BREAK POINT 4	NUMBER(8,3)	Fourth break point of the Ramp Up Curve (MW)
DWELL TIME 1	NUMBER(3)	First point of the Dwell Times associated with Trigger point for Dwell Times in MW.
DWELL TIME 2	NUMBER(3)	Second point of the Dwell Times associated with Trigger point for Dwell Times in MW.
DWELL TIME 3	NUMBER(3)	Third point of the Dwell Times associated with Trigger point for Dwell Times in MW.
DWELL TIME TRIGGER POINT 1	NUMBER(8,3)	First trigger points for Dwell times in MW.
DWELL TIME TRIGGER POINT 2	NUMBER(8,3)	Second trigger points for Dwell times in MW.
DWELL TIME TRIGGER POINT 3	NUMBER(8,3)	Third trigger points for Dwell times in MW.
DWELL TIME DOWN 1	NUMBER(3)	First point of the Dwell Times Down associated with Trigger point for Dwell Times Down in MW.
DWELL TIME DOWN 2	NUMBER(3)	Second point of the Dwell Times Down associated with Trigger point for Dwell Times Down in MW.
DWELL TIME DOWN 3	NUMBER(3)	Second point of the Dwell Times Down associated with Trigger point for Dwell Times Down in MW.
DWELL TIME DOWN TRIGGER POINT 1	NUMBER(8,3)	First trigger points for Dwell times Down in MW.
DWELL TIME DOWN TRIGGER POINT 2	NUMBER(8,3)	Second trigger points for Dwell times Down in MW.
DWELL TIME DOWN TRIGGER POINT 3	NUMBER(8,3)	Third trigger points for Dwell times Down in MW.
RAMP DOWN RATE 1	NUMBER(8,3)	Fifth point of Ramp Down Curve (MW/min).
RAMP DOWN RATE 2	NUMBER(8,3)	Fourth point of Ramp Down Curve (MW/min).
RAMP DOWN RATE 3	NUMBER(8,3)	Third point of Ramp Down Curve (MW/min).
RAMP DOWN RATE 4	NUMBER(8,3)	Second point of Ramp Down Curve (MW/min).
RAMP DOWN RATE 5	NUMBER(8,3)	First point of Ramp Down Curve (MW/min).
RAMP DOWN BREAK POINT 1	NUMBER(8,3)	First break point of the Ramp Down Curve (MW)
RAMP DOWN BREAK POINT 2	NUMBER(8,3)	Second break point of the Ramp Down Curve (MW)
RAMP DOWN BREAK POINT 3	NUMBER(8,3)	Third break point of the Ramp Down Curve (MW)
RAMP DOWN BREAK POINT 4	NUMBER(8,3)	Fourth break point of the Ramp Down Curve (MW)
DELOADING RATE 1	NUMBER(8,3)	Second point of the de-load rate curve from end point of startup period to de-loading break point to zero expressed in MW.

Volume C: Balancing Market

Field Name	Format	Description
DELOADING RATE 2	NUMBER(8,3)	First point of the deload rate curve from end point of startup period to deloading break point to zero expressed in MW.
DELOAD BREAK POINT	NUMBER(8,3)	Deloading break expressed in MW.
MAXIMUM STORAGE CAPACITY	NUMBER(8,3)	Maximum possible capacity that can be produced by a Battery Storage Unit, or by the reservoir for a Pumped Storage Unit (MWh)
MINIMUM STORAGE CAPACITY	NUMBER(8,3)	Minimum possible capacity that can be produced by a Battery Storage Unit, or by the reservoir for a Pumped Storage Unit (MWh)
ESPS STORAGE CYC EFY	NUMBER(3)	Storage Cycle Efficiency for Battery Storage Units, expressed as a percentage value.
PUMPING LOAD CAP	NUMBER(8,3)	The maximum amount of Active Power consumed by a Pumped Storage Unit when in Pumping Mode
ENERGY LIMIT MWH	NUMBER(8,3)	For Energy Limited Unit
FIXED UNIT LOAD	NUMBER(8,3)	Fixed Unit Load (FUL) ≥ 0
UNIT LOAD SCALAR	NUMBER(5,4)	Unit Load Scalar (ULS). 0 < ULS ≤ 1.9999.
DUAL FUEL FLAG	CHAR(1)	Dual Fuel capable flag. The valid values are 'Y' and 'N'
SECONDARY FUEL TYPE	VARCHAR2(22)	Secondary Fuel Type.
MAXIMUM RAMP UP RATE	NUMBER(8,3)	Rate of load increase. Rate of decreasing demand (MW/min). DSU-only field.
MAXIMUM RAMP DOWN RATE	NUMBER(8,3)	Rate of load reduction; Rate of increasing demand (MW/min). DSU-only field.
MINIMUM DOWN TIME	NUMBER(11,3)	Minimum amount of time the demand-side unit can be scheduled to be off (in Hours) DSU-only field.
MAXIMUM DOWN TIME	NUMBER(11,3)	Maximum amount of time the demand-side unit can be scheduled to be off (in Hours) DSU-only field.

6.7.4.4 FORECAST AVAILABILITY REPORT

This report details the forecast availability per Generator Unit and Demand Side Unit for each Trading Period in the previous Trading Day (including wind units).

I-SEM Report Reference: REPT_012
Data Source: Market Participant
Periodicity: Daily
Report Name: PUB_DailyForecastAvailability

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

File Names: PUB_DailyForecastAvailability.xml
Report Title: Forecast Availability Report
Audience: Member Public
Resolution: Trading Period
Time Span: At a user-configurable time prior to the start of the Trading Day, for the entire Trading Day
Frequency: Daily
Report Format: XML

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day
PARTICIPANT NAME	VARCHAR2(12)	The PT Identifier, which represents the name of Market Participant, as registered in the Balancing Market.
RESOURCE NAME	VARCHAR2(32)	The name of the resource (e.g. the name of the Generating Unit, Supplier Unit, Demand Side Unit, Interconnector for which data is being reported).
RESOURCE TYPE	VARCHAR2(4)	Indicates the type of resource for which data is being submitted – permitted values include: GEN and DSU
JURISDICTION	VARCHAR2(5)	ROI (Republic of Ireland) or NI (Northern Ireland)
DELIVERY DATE	DATE (YYYY-MM-DD)	Calendar Day (referred to as "Day" in the Code).
START TIME	TIME(YYYY-MM-DDTH24:MI)	Start Time
END TIME	TIME(YYYY-MM-DDTH24:MI)	End Time
FORECAST AVAILABILITY	NUMBER(8,3)	Forecast Availability Profile (MW)
FORECAST MINIMUM STABLE GEN	NUMBER(8,3)	Forecast Minimum Stable Generation Profile (MW)
FORECAST MINIMUM OUTPUT	NUMBER(8,3)	Forecast Minimum Output Profile (MW)
FUEL USE FLAG	CHAR(1)	Indicates the fuel use type selected. The valid values are 'P' and 'S' (denoting Primary and Secondary respectively).

6.7.9.6 DAILY METER DATA REPORT

This report contains metered generation (MWh) for each Generator Unit and Interconnectors per Imbalance Settlement Period, on a Settlement Day basis. This report is published D+1 and D+4, M+4, M+13 & Adhoc.

I-SEM Report Reference: REPT_017
Data Source: Meter Data Provider
Periodicity: Daily
Report Name: PUB_DailyMeterDataD1
File Names: PUB_DailyMeterDataD1.xml
Report Title: Daily Meter Data Report
Audience: Member Public
Resolution: Imbalance Settlement Period
Time Span: Calendar Day (TD-1WD), (TD-5WD), (M+4 5WD), (M+13 5WD) and (Ad-hoc 5WD)
Frequency: Daily
Report Format: XML

Field Name	Format	Description
TRADE DATE	DATE (YYYY-MM-DD)	Trading Day commences at 23:00hrs (GMT)
PARTICIPANT NAME	VARCHAR2(12)	The PT Identifier, which represents the name of Market Participant, as registered in the Balancing Market.
RESOURCE NAME	VARCHAR2(32)	The name of the resource (e.g. the name of the Generating Unit, Interconnector for which data is being reported).
RESOURCE TYPE	VARCHAR2(4)	Indicates the type of resource for which data is being submitted - permitted values include: GU, Interconnector.
START TIME	TIME(YYYY-MM-DDTH24:MI)	Imbalance Settlement Period Start Time
END TIME	TIME(YYYY-MM-DDTH24:MI)	Imbalance Settlement Period End Time
JURISDICTION	VARCHAR2(32)	ROI (Republic of Ireland) or NI (Northern Ireland)
METERED_MW	NUMBER(8,3)	Represents the total generation (MWh)

6.7.9.15 HOURLY SO INTERCONNECTOR TRADES REPORT

This report is available to all the Market Participants and general public. It is produced each hour for the previous hour, containing all SO Interconnector Trades for which the start time is less than or equal to the end of the hour for which the report is being published, or where the end time is greater than or equal to the start of the hour for which the report is being produced. The report includes interconnector import/export prices and trade MW quantities. The report will not be published where there are no applicable SO Interconnector Trades applicable for the relevant hour.

Figure 119424: REPT_043: Settlement Statement - Sample

6.7.11.2 SETTLEMENT REPORT

The Settlement Report is a report detailing the Settlement Determinants as defined by the Trading and Settlement code. For certain charges such as CAOPO (charge for accepted offers above the PN), the charge determinants must be considered in the order they are received in a single imbalance settlement period. Other determinants such as QMLF (loss-adjusted meter volume) are not. Settlement Reports are issued to Participants for markets and run types on a schedule defined by the settlement calendar.

<i>I-SEM Report Reference:</i>	REPT_044

6.7.11.3 PARTICIPANT INFORMATION REPORT (PIR)

The content of this report is issued as part of the SETTLEMENT REPORT, Refer to Section 6.7.11.2.

6.7.11.4 SETTLEMENT DOCUMENT

I-SEM Technical Specification (ITS)

Volume C: Balancing Market

The Settlement Document report consolidates all sales and purchases made by a participant over a billing period. The Settlement Document rolls up all of the daily total payment and charge amounts on each BALIMB and Capacity Market statement in the billing period, including any resettlement statements. If the participant is a party to any Reallocation Agreements the settlement document totals are adjusted accordingly. VAT proportions and amounts are also provided.

Report Title: Settlement Document
Audience: Member Private
Resolution: Settlement Charges by Charge Component by Billing Period
Time Span: Billing Period (weekly) and ad hoc as necessary
Frequency: Billing Period (weekly) and ad hoc as necessary
Report Format: XML

Field Name	Format	Description
REPORT_TYPE	VARCHAR2(2)	Identifier for report (SD)
PARTICIPANT_ID	VARCHAR2(12)	Participant name (e.g. PT_456789)
PARTICIPANT_NAME	VARCHAR2(64)	Company name
MARKET_NAME	VARCHAR2(6)	Market name (BMCRR or MO)
PUBLICATION_DATE	DATE (YYYY-MM-DD)	Calendar day for publication
PUBLICATION_TIMESTAMP	TIME(YYYY-MM-DDTH24:MI)	Timestamp of publication
DUE_DATE	DATE (YYYY-MM-DD)	Date for payment due to the MO or payments due from the MO
DOCUMENT_CURRENCY	VARCHAR2(3)	The currency all amounts on the document are reported in (EUR or GBP)
DOCUMENT_ID	VARCHAR2(20)	Unique identifier for this settlement document
DOCUMENT_TYPE	VARCHAR2(20)	Identifier of the type of document (Invoice, Self-Billing Invoice or Settlement Document)

Table 123424: Invoice/Settlement Document Header Field Description

Field Name	Format	Description
SENDER_ID	VARCHAR2(12)	Identifier of the sender of the document (e.g. AIPSEM for Invoices)
SENDER_NAME	VARCHAR2(60)	Name of sender of Settlement Document, will relate to SMO for Settlement Documents and Invoices, and the Participant name for Self-Billing Invoices
SENDER_ADDRESS	VARCHAR2(512)	Sender Address
SENDER_GL_NUMBER	VARCHAR2(20)	VAT number for the sender (will only be present for Invoices and Self-Billing Invoices)
RECIPIENT_ID	VARCHAR2(12)	Identifier of the recipient of the document (e.g. PT_456789)
RECIPIENT_NAME	VARCHAR2(60)	Name of recipient of Settlement Document, will relate to SMO for Self-Billing Invoices and Participant for Settlement Documents and Invoices
RECIPIENT_ADDRESS	VARCHAR2(512)	Recipient Address
RECIPIENT_GL_NUMBER	VARCHAR2(20)	VAT number for the recipient (will only be present for Invoices and Self-Billing Invoices)
VAT_JURISDICTION	VARCHAR2(3)	VAT Jurisdiction (will only be present for Invoices and Self-Billing Invoices)

Table 124125: Invoice/Settlement Document Contact Field Description

Field Name	Format	Description
NET_AMOUNT	NUMBER(22,2)	Net amount to be paid or pay (prior to any application of VAT), only present for Invoices and Self-Billing Invoices
TAX_RATE	NUMBER(22,2)	VAT Rate to be applied (e.g. 0.23 representing 23%), only present for Invoices and Self-Billing Invoices
TAX_AMOUNT	NUMBER(22,2)	Tax amount (Net Amount multiplied by Tax Rate), only present for Invoices and Self-Billing Invoices

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Field Name	Format	Description
S_TOTAL (TOTAL SALES)	NUMBER(22,2)	Sales Totals (sum of S_LOCAL, S_EU, S_NONEU). The change in value from the previous Settlement document.
S_LOCAL (LOCAL SALES)	NUMBER(22,2)	Local Sales Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
S_EU (EU SALES)	NUMBER(22,2)	EU Sales Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
S_NEU (NON-EU SALES)	NUMBER(22,2)	Non-EU Sales Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
P_TOTAL (TOTAL PURCHASES)	NUMBER(22,2)	Purchases Totals (sum of P_LOCAL, P_EU, P_NONEU). The change in value from the previous Settlement document.
P_LOCAL (LOCAL PURCHASES)	NUMBER(22,2)	Local Purchases Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
P_EU (EU PURCHASES)	NUMBER(22,2)	EU Purchases Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
P_NEU (NON-EU PURCHASES)	NUMBER(22,2)	Non-EU Purchases Totals, only present for Settlement Documents. The change in value from the previous Settlement document.
INTEREST	NUMBER(22,2)	Total Interest
PRELIMINARY TOTAL	NUMBER(22,2)	Total Amount before SRA
REALLOCATION_TOTAL	NUMBER(22,2)	Reallocation Total
GRAND TOTAL	NUMBER(22,2)	Total Amount. A positive Grand Total on a Settlement Document will indicate payment direction "SEMO to Pay Participant". A negative Grand Total on a Settlement Document will indicate payment direction "Participant to Pay SEMO"
PAYMENT_TYPE	VARCHAR2(48)	Indicator of payment direction, "Participant to Pay SEMO" or "SEMO to Pay Participant"

Table 125426: Invoice/Settlement Document Summary Field Description

Field Name	Format	Description
RUN_TYPE	VARCHAR2(4)	INIT, M4, M13 or AH
BP_START_DATE	DATE (YYYY-MM-DD)	Billing Period Start Date
BP_END_DATE	DATE (YYYY-MM-DD)	Billing Period End Date
MARKET	VARCHAR2(6)	Market name (BALIMB, CRM, FMOO or MO)
CHARGE_NAME	VARCHAR2(16)	Charge Identifier (see Appendix B for details)
PREVIOUS_GROSS_AMOUNT	NUMBER(22,2)	Previous Gross Amount for Charge (will be zero for Initial Run). Amount used on previous Settlement Document. (VAT Is not included in this amount)
NEW_GROSS_AMOUNT	NUMBER(22,2)	Gross Amount Calculated based on latest Settlement Statements. (VAT Is not included in this amount)
NET_AMOUNT	NUMBER(22,2)	NEW_GROSS_AMOUNT - PREVIOUS_GROSS_AMOUNT
TAX_CATEGORY	VARCHAR2(16)	Tax Category
TAX_AMOUNT	NUMBER(22,2)	vat Amount is based on NET_AMOUNT and TAX_RATE, only present for Invoices and Self-Billing Invoices
TAX_RATE	NUMBER(22,2)	VAT Rate to be applied (e.g. 0.23 representing 23%), only present for Invoices and Self-Billing Invoices, only present for Invoices and Self-Billing Invoices

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

Field Name	Format	Description
INTEREST	NUMBER(22,2)	Applicable interest in relation to settlement or resettlement, only present for Invoices and Self-Billing Invoices
SALES: S_TOTAL	NUMBER(22,2)	Total Sales
SALES: S_LOCAL	NUMBER(22,2)	Local Sales
SALES: S_EU	NUMBER(22,2)	EU (excluding Local) Sales
SALES: S_NEU	NUMBER(22,2)	Non-EU Sales
SALES: S_TOTAL_PREV	NUMBER(22,2)	Previous Total Sales
SALES: S_LOCAL_PREV	NUMBER(22,2)	Previous Local Sales
SALES: S_EU_PREV	NUMBER(22,2)	Previous EU Sales
SALES: S_NEU_PREV	NUMBER(22,2)	Previous Non EU Sales
SALES: S_VAT_TOTAL	NUMBER(22,2)	Total Sales VAT amount, only present for Invoices and Self-Billing Invoices
SALES: S_VAT_LOCAL	NUMBER(22,2)	Local Sales VAT amount, only present for Invoices and Self-Billing Invoices
SALES: S_VAT_EU	NUMBER(22,2)	EU (excludes Local) Sales VAT amount, only present for Invoices and Self-Billing Invoices
SALES: S_VAT_EU_PREV	NUMBER(22,2)	Previous EU Sales VAT amount, only present for Invoices and Self-Billing Invoices
SALES: S_VAT_LOCAL_PREV	NUMBER(22,2)	Previous Local Sales VAT amount, only present for Invoices and Self-Billing Invoices
SALES: S_VAT_TOTAL_PREV	NUMBER(22,2)	Previous Total Sales VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_TOTAL	NUMBER(22,2)	Total Purchases
PURCHAS: P_LOCAL	NUMBER(22,2)	Local Purchases
PURCHAS: P_EU	NUMBER(22,2)	EU (excluding Local) Purchases
PURCHAS: P_NEU	NUMBER(22,2)	Non-EU Purchases
PURCHAS: P_TOTAL_PREV	NUMBER(22,2)	Previous Total Purchases
PURCHAS: P_LOCAL_PREV	NUMBER(22,2)	Previous Local Purchases
PURCHAS: P_EU_PREV (EU PURCHASES)	NUMBER(22,2)	Previous EU (excluding Local) Purchases
PURCHAS: P_NEU_PREV (NON-EU PURCHASES)	NUMBER(22,2)	Previous Non-EU Purchases
PURCHAS: P_VAT_TOTAL	NUMBER(22,2)	Total Purchases VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_VAT_LOCAL	NUMBER(22,2)	Local Purchases VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_VAT_EU	NUMBER(22,2)	EU (excludes Local) Purchase VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_VAT_EU_PREV	NUMBER(22,2)	Previous EU (excluding Local) Purchases VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_VAT_LOCAL_PREV	NUMBER(22,2)	Previous Local Purchases VAT amount, only present for Invoices and Self-Billing Invoices
PURCHAS: P_VAT_TOTAL_PREV	NUMBER(22,2)	Previous Total Purchase VAT amount, only present for Invoices and Self-Billing Invoices

Figure 123428: REPT_046: Reallocation Agreement Report - Sample

6.7.11.6 COLLATERAL REPORT

The credit calculation is expected to be run at least daily on a Business Day. The collateral report is a member private report on the result of the credit calculation. The result set and the components making up the Required Credit Cover Amount (such as Posted Credit Cover, Fixed Credit Cover, Actual Liability, Traded Not Delivered, Undefined Exposure and Forecast Reallocation Agreement) will be determinants in the report. In addition, the report will have a flag indicating if the participant's collateral status is either:

- OK (Credit Cover Requirement is less than posted collateral);
- WARNING if the ratio of Required Credit Cover to Posted Credit Cover exceeds the Warning Limit;
- BREACH if the ratio of Required Credit Cover to Posted Credit Cover exceeds the Breach Limit; EXCESS when posted collateral is greater than the Credit Cover Requirement by a defined margin.

Field Name	Format	Description
REPORT_TYPE	VARCHAR(2)	Identifier for Report (EI)
MARKET_NAME	VARCHAR2(6)	Market name (BALIMB)
SETTLEMENT_DATE	DATE (YYYY-MM-DD)	Calendar day of settlement
PUBLICATION_DATE	DATE (YYYY-MM-DD)	Calendar day for publication
PUBLICATION_TIMESTAMP	TIME(YYYY-MM-DDTH24:MI)	Timestamp of publication
RUN_TYPE	VARCHAR2(5)	Type of run (INDIC, INIT, M4, M13, AH)

Table 137438: Energy Market Information Publication Header Field Description

Field Name	Format	Description
VALUE: DATETIME	TIME(YYYY-MM-DDTH24:MI)	Date and time of the ISP for this determinant and resource
VALUE: DATE	DATE (YYYY-MM-DD)	Date. Only present if applicable.
DETERMINANT: NAME	VARCHAR2(16)	Name of the determinant
RESOURCE: NAME	VARCHAR2(32)	Name of the resource (if applicable)
DETERMINANT: UNIT	VARCHAR2(8)	Units for the determinant (e.g. MW)
VALUE: AMOUNT	NUMBER(28,8)	Amount of the determinant in the ISP
VALUE: ORDER	STRING(25)	Number of the order (may be negative). Only populated for determinants which are order-specific.
VALUE: BAND	NUMBER(2)	Number of the Price Quantity Pair for an Imbalance Settlement Period. Only present if applicable.
VALUE: ACCEPT_TIME	TIME(YYYY-MM-DDTH24:MI)	Accept Time. Determines the Rank. Only present if applicable.

6.7.11.34 SETTLEMENT CALENDAR

This report is available to all Participants and the general public. Each entry in the settlement calendar has a Calendar Event describing an expected event such as the availability of settlement reports or payment timelines.

I-SEM Report Reference:	REPT_067
Data Source	CSB Settlement System
Periodicity:	Annually Set, updated ad hoc as required
File Names:	SC_PT_ALL_<SettlementDay/OperatingDay>_<PublicationDay>_ALL_REPT_<Timestamp> (see note below ²⁸)
Report Title:	Settlement Calendar
Audience:	General Public
Resolution:	Event by Calendar Day
Time Span:	Annually, updated ad hoc as required
Frequency:	Annually set, updated as necessary
Report Format:	XML

Field Name	Format	Description
REPORT_TYPE	VARCHAR2(2)	Identifier for report (SC)
PUBLICATION_TIMESTAMP	TIME(YYYY-MM-DDTH24:MI)	Timestamp of publication

Table 147148: Settlement Calendar Header Field Description

Field Name	Format	Description
OPERATIONAL DATE	DATE (YYYY-MM-DD)	This is the date the run defined by the calendar entry occurs on, and is the default sort key for the calendar.
MARKET	VARCHAR2(6)	This describes the primary separation of settlements, and is expected to have the following four values: <ul style="list-style-type: none"> o Imbalance (BALIMB) o Capacity Market (CRM) o Market Operator (MO) o Fixed Market Operator Charge (FMO)

²⁸ File Type – can be either Operational day or Settlement day depending on how the report is generated

I-SEM Technical Specification (ITS)
Volume C: Balancing Market

PUBLICATION	VARCHAR2(24)	This field contains those calendar events marked as Publish, and describes the type of document produced by the run for this calendar entry. Following the SEM settlement calendar, the Publication field is expected to have the following values: <ul style="list-style-type: none"> o Statements o Settlement Documents o Payments IN o Payments OUT o MDP submission timelines
RUN_TYPE	VARCHAR2(5)	This field describes the run identifier. Following the SEM settlement calendar, the Run field is expected to have the following values: <ul style="list-style-type: none"> o Indicative (INDIC) o Initial (INIT) o M4 (M4) o M13 (M13) o Ad hoc (AH)
PERIOD_TYPE	VARCHAR2(24)	This field defines the number of days that make up the particular run. In I-SEM, Indicative and Initial runs for Statements are anticipated to have a Period Type of Day and otherwise a Period Type of Week, while all runs applying to Settlement Documents are anticipated to have a Period Type of Week. Although it is currently anticipated to follow the same timeline as the Imbalance market, the Capacity Market may require a Month period type.
PERIOD_END_DATE	DATE (YYYY-MM-DD)	This field defines the end of the last day in the settlement period defined by the Period Type.
MODIFIED	DATE (YYYY-MM-DD)	This value of this field is the last modification date of the calendar entry. Here, "modification" includes both a new entry and an updated entry.
COMMENTS	VARCHAR2(512)	This field is a free-form text entry. The current SEM settlement calendar uses comments such as "Payments in by 12:00", "Published by 17:00", and "Week 44 2015".

7 APPENDIX A: SPECIAL CHARACTERS

The following Special Characters are allowed for the free text fields in Registration and is referred in applicable data field validation rules:

- Space
- Tilde (~)
- Exclamation Mark (!)
- 'at' Symbol (@)
- Hash (#)
- Dollar (\$)
- Percent (%)
- Caret (^)
- Ampersand (&)
- Asterisk (*)
- Left Parenthesis [(]
- Right Parenthesis [)]
- Underscore (_)
- Hyphen (-)
- Equal (=)
- Plus (+)
- Left Curly Bracket ({)
- Right Curly Bracket (})
- Left Square Bracket ([)
- Right Square Bracket (])
- Pipe (|)
- Back Slash (\)
- Colon (:
- Semicolon (;)
- Double Quotation (")
- Apostrophe (')
- Less Than Sign (<)
- Greater Than Sign (>)
- Comma (,)
- Period (.)
- Question Mark (?)
- Forward Slash (/)

8 APPENDIX B: CHARGE CODE MAPPING TO SETTLEMENT REPORTS

The table below provides the mapping of charge codes to the reports in which they are contained. All charge codes are the same acronym as used by the Trading & Settlement Code.

Charge Code	Report ID
CABBPO	REPT_043, REPT_055, REPT_056, REPT_104, REPT_105, REPT_106
CAOOPO	REPT_043, REPT_055, REPT_056, REPT_104, REPT_105, REPT_106
CCA	REPT_043
CCBDUC	REPT_043
CCBDUE	REPT_043
CCC	REPT_043
CCP	REPT_043, REPT_059, REPT_060, REPT_110, REPT_111, REPT_112, REPT_069 (by jurisdiction), REPT_070 (by unit)
CCURL	REPT_043, REPT_055, REPT_056, REPT_104, REPT_105, REPT_106,
CDIFFCDA	REPT_043, REPT_055, REPT_056, REPT_104, REPT_105, REPT_106, REPT_059, REPT_060, REPT_110, REPT_111, REPT_112
CDIFFCNP	REPT_043, REPT_055, REPT_056, REPT_059, REPT_060, REPT_110, REPT_111, REPT_112
CDIFFCWD	REPT_043, REPT_055, REPT_056, REPT_104, REPT_105, REPT_106, REPT_059, REPT_060, REPT_110, REPT_111, REPT_112
