- **Credit report publications:** No credit reports to publish on the 28th December, with one credit report to publish on the 29th December. Three reports to publish on December 30th .

Settlements: Other updates...

- FMOC Invoice published on Nov 15th included the incorrect CMOAU and CMOAV rates for ROI and NI market participants: [Market message](#) published on the 18/11/2022.
 - As per updates provided on the weekly market participant calls, SEMO Settlements are intending to publish an Oct 2022 MO Invoice which will reverse the original invoice issued, and to then re-publish the correct Oct 2022 MO invoice with the correct rates.
 - This invoice correction will be scheduled to take place in the New Year, with a date to be confirmed with market participants once the scenario has been fully replicated and tested in the systems test environment.

System Operations Update

Charlie McGee

System Operations Update

- New all-time SEM peak demand of **7015 MW** @ 17:15 on December 14th

Plant Position <i>December 15th 2022</i>	Total Available Generation	% Registered Capacity
IE Conventional Gen + Hydro + Pumped Storage	5.52 GW	87.7
NI Conventional Gen + AGUs	1.58 GW	79.9

- Generation adequacy situation tight in both jurisdictions, especially NI
- Risk of System **Alert** / **Emergency** remains, measures in place
- Close daily coordination with NGESO & continental European TSOs

A nighttime photograph of a city waterfront. On the left, a large, curved building with a glass facade is illuminated with bright red lights. The building's structure is visible through the glass. To the right, several other modern buildings are lit up with various colors of light, including blue and white. The lights from the buildings and streetlights reflect on the calm water of the river or harbor. A full moon is visible in the dark blue sky. In the foreground, there are some buoys or markers in the water.
