Suspension Delay Periods under the SEM Trading and Settlement Code

Dear Michael,

On the 5th September the Regulatory Authorities published a paper setting out their response to comments received on the consultation on the values that should be adopted for the Generator Suspension Delay Period and the Supplier Suspension Delay Period under the SEM Trading and Settlement Code (TSC). The purpose of this letter is formally to notify the Market Operator in accordance with paragraph 2.249 of the TSC of the values that the Regulatory Authorities have determined. Those values are set out below and shall apply with effect from the Market Start Date:

Supplier Suspension Delay Period	14 calendar days
Generator Suspension Delay Period	7 calendar days

The Regulatory Authorities also note that the Market Operator is required by paragraph 2.250 of the TSC to publish the Regulatory Authorities' determination and that such publication is required by paragraph 1.7.15 to make the information available to members of the public and by paragraph 8.64 to publish the information within 3 Working Days of receipt of the Regulatory Authorities' determination.

Yours sincerely,

Philip Newsome
On behalf of the Regulatory Authorities
