

MOD_07_17
Credit Assessment Volume
for Generator Units

19th October 2017

Summary Information

- Proposal seeks to correct a drafting error in the rules to align with the policy decision in the area
- The Credit Volume in respect of Generator Units for New Participants currently states that this shall be a forecast of Metered Generation
- The decision on this item during the rules working groups was that this should be a forecast of Imbalance
- As currently drafted this would result in credit cover requirements being higher than intended
