SEM Committee Decision for the Regulatory Authorities in relation to Mod_22_19 (Final Recommendation FRR_22_19)

Dear Esther,

On 7 January 2020, the Modifications Committee submitted its Final Recommendation Report (FRR) with regard to Modification Proposal Mod_22_19 'Correction of QUNDELOTOL Calculations to Convert TOLUG and TOLOG to MWh' in accordance with Paragraph B.17.18.1 of Part B of the SEM Trading and Settlement Code (TSC).

This Modification Mod_22_19 was raised by the SEMO and received by the Secretariat on 21 November 2019. The proposal was raised and voted on at Meeting 95 on 5 December 2019.

The Regulatory Authorities note that this Modification aims to correct an error whereby MW is not converted to MWh during the calculation of Outside Tolerance Undelivered Quantities for subsequent use in determining Uninstructed Imbalance Charges. If this change is not made, tolerance bands will continue to be overstated in error. This will result in premiums and

discounts for Under and Over Generation not being applied to Uninstructed Imbalance volumes to which they should apply.

The Regulatory Authorities note that a discussion took place with the Modifications Committee at Modifications Committee Meeting 95. Following the discussion, the Modification was recommended for approval by all Committee Members.

Considering the above, and in accordance with Paragraph B.17.20 of the Code, the SEM Committee direct that a Modification, as set out in Appendix 1 of FRR_22_19, is implemented on a Settlement day basis following delivery of required system changes.

Yours sincerely,
